Super 25 Stress

SweetPro[®] Super 25 Stress lick blocks are designed for the essential fortification of Cow requirements for vitamins A, D & E, plus protein, calcium, phosphorus and trace elements including selenium. Super 25 Stress should be used for cattle on below average to poor forages. Daily intake will vary depending on forage quality and nutritional needs.

Feeding Instructions:

1. Before feeding SweetPro[®] Super 25 Stress lick blocks for the first time, animals should be well fed.
2. Provide access for animals to have plenty of clean, fresh water at all times.
3. Have one lick block available per 25 head of beef cows.
4. Provide an adequate source of good quality roughage and forage at all times (all they can consume).
5. Place lick blocks near water sources or areas cattle frequent regularly.
6. Make lick blocks available in more than one location in large pastures or where more than one water source is available.
7. Other salt and minerals may be provided free choice to balance specific needs.
8. A two week adaptation period will be required to establish a base consumption rate. After adaptation period, recommended range of intake is .75 to 1.25 lbs. per day.
9. Once animals consistently consume more than 1.25 lbs/hd/day, transition to SweetPro Magnum Stress. If daily consumption is consistently below .75 lbs/hd/day, transition to SweetPro FiberMate 20 Stress.

The above feeding directions are general guidelines and will vary with the overall feeding conditions. Always use good management practices.

Caution!

Contains 600 ppm copper. **DO NOT FEED TO SHEEP!**
Do not use in association with another feed containing supplemental selenium.
