

A green metal loading chute is shown in a field of brown soil. The chute has a ramp and a vertical frame. The brand name 'ARROWQUIP' is visible on the side. The background features a dramatic sky with large, dark clouds.

LOADING CHUTES

LOADING CHUTES

PRODUCT CODE: STLCT-AD

Arrowquip's Stationary Cattle Loading Chute makes loading cattle an easy task. An essential component of any cattle handling system, our product is designed to work seamlessly with the complete lineup of Arrowquip equipment.

The only stationary loading chute to offer a 12'-long ramp with an adjustable height range between 12" and 51", the Arrowquip Loading Chute is essential for connecting to a semi truck or cattle trailer. Fully sheeted sides reduce stress and the risk of injury, while the 6" vision slot in the side of the ramp allows your crew to assist with the loading process as necessary. The ribbed and checkered floor plate provides exceptional traction. Heavy-duty construction and our premium warranty coverage back your product, offering increased confidence in the reliability of your Loading Chute.

SPECIFICATIONS

- 12' loading ramp.
- Fully sheeted sides.
- Heavy-duty construction.
- Adjustable height ranges from 12" to 51".
- Rib-checkered floor plate.

LOADING CHUTE OPTIONS

VET CAGE

(PRODUCT CODE: VC-STLCT)

The Arrowquip vet cage is constructed with high-quality steel for superior resistance to the elements. The vet cage acts as a pass-through for the operator, stops the flow of cattle along the alley, and allows for safe access into the back of the trailer.

PORTABLE

(PRODUCT CODE: PT-STLCT)

The Arrowquip Portable Loading Chute is the stationary loading chute on wheels, allowing you to move the loading chute easily. Features a removable front hitch and drop-down support stands.
