WEIGHING ACCESSORIES

WEIGH CRATE, WEIGH PLATFORM & SCALE MOUNT PLATES

WEIGH CRATE

PRODUCT CODE: WGCR & WGCT-A

WEIGHT: 1170 lbs

Arrowquip's Cattle Weigh Crate is a durable product that doesn't sacrifice quality for the sake of performance. This weight crate is flexible enough to provide fast and accurate weigh-ins, yet tough enough to deliver years of reliable use. The Weigh Crate features an easy-access 14-gauge steel sheeting that reduces the risk of an injury to your cattle during the weigh-in process, and rolling doors at both ends of the crate so you can move cattle in and out quickly with limited stress. These crates can stand alone or be connected to a crate, cattle squeeze chute, or crowding pen. Heavy-duty construction stands up to repeated weigh-ins, as well as rough weather, and transport between job sites.

SPECIFICATIONS:

- Heavy-duty, durable performance.
- Limited stress due to 14-guage steel sheeting.
- Can stand alone or integrate with your other Arrowquip products.
- Adjustable from 30" down to 17".

WEIGHING ACCESSORIES

WEIGHT CRATE, WEIGH PLATFORM & SCALE MOUNT PLATES

WEIGH PLATFORM

PRODUCT CODE: WPFM

Arrowquip's Cattle Weigh Platforms are made with heavy-duty formed 1/4" aluminum plates. They are pre-engineered, and designed to custom fit Tru-test and Gallagher load bars. The raised sides are designed to prevent the cattle from slipping off, reducing the risk of injury to both cattle and operator. Arrowquip's weigh platform is designed to fit with Arrowquip's 8' compartment alley on the Portable Q-Catch 86 Series and Arrowquip's Adjustable Alleys.

The WPFM can be used with Arrowquip's AA2RRS Alley, QP-868 and the QP-8608.

SCALE MOUNT PLATES

PRODUCT CODE: SMP-GG/SMP-TT

Arrowquip's Cattle Scale Mount Plates are suited for the toughest jobs, durable, and pre-engineered to support 23″ alley way load bars when using Arrowquip's weighing platforms.
