

RISK, STRATEGY & OPERATIONS CONSULTING

SERVICES FOR YOUR **HEALTH SYSTEM**

OUR EXPERIENCE

100+ years of combined industry experience across providers & payers, spanning operations, finance, IT, and data.

90+ software implementations completed, integrating business expertise into technical specifications.

We know **healthcare**, we know **data**, and we know **technology**.

YOUR ADVANTAGE

Marry **technology** and **business** needs into any implementation. Any new tool is only as good as how you implement it.

Accelerate ROI for your implementation by getting it right the first time.

Generate **actionable analytical insights** using data, technology, and thought leadership to realize cost, quality, and efficiency gains.

Create **transparency** and **accountability** across your organization, and lead a culture of **collaboration**.

Take advantage of a **client-centric** approach as we tailor our services to address your specific set of issues to identify and implement **feasible solutions**.

WHAT IS RISK, STRATEGY, AND OPERATIONS CONSULTING?

Every day, providers like hospitals and integrated delivery systems face mounting pressure to be profitable while managing patient care. Staff shortages & cutbacks, increased competition & consolidation, new & modified government legislation (and so on) intensify the situation. medASTUTE partners with these organizations to help guide them and cope with this delicate balancing act.

Our areas of expertise include (but are not limited to) revenue integrity, operational efficiency, compliance, service line monitoring & performance, and patient throughput. From this knowledge base, medASTUTE applies data analytics and thought leadership to develop strategies for operational, quality, and reimbursement improvements. In addition, we teach using boot camps, rapid redesign, and dashboards to ensure a sustainable program.

WHAT YOU CAN EXPECT

A **RS&O** consulting engagement may include:

Revenue Integrity

- Compliance risk analysis & education
- Documentation improvement analysis & intervention

Service Line Analytics

- Product line volume trend, quality & profitability
- Utilization variance / cost reduction
- Length of stay analysis & management
- Payer trend & financial performance
- Physician scorecards

Throughput & Productivity

- Provider practice maximization
- ED performance
- Surgical suite performance
- Internal productivity variation
- Cost reduction opportunity

Supply Chain & Fixed Assets

- Spend analysis — high vendor opportunities
- Resource utilization variation
- Professional practice capacity & operational analysis
- Market analysis & network expansion strategy
