

Index

- Accelerating winds of sand and dust, 44
Acid rain, 64, 67
Aerodynamic enclosure, 105
Aerodynamic factors, 72–75
Aerodynamic lift and drag, 80
Aerosols, 37, 49–51
 crust enrichment factor, 244
 crustal, chemical importance in atmosphere, 244–48
 dust component in, 58
 enrichment factors, 244
 impact on atmospheric chemistry, 243–66
 in physics and chemistry of atmosphere, 243
 mass distributions of sand and sand storm, 55
 measurements, 176
 optical thickness, 173
 over Atlantic, refraction index for, 91
 production mechanisms, 50
 radiation effects of, 58–59
 residence time in troposphere, 56
 sources, 50
 transport monitoring, 171–86, 211–32
 versus soil, 259–65
African dust plume, *see* Dust plume
Agricultural practice, 17
Air concentration gauges, 212, 220, 230
Air-filtration equipment, 212
Air pollution, 66, 67, 255
Air stream, deceleration or convergence, 98
Airborne dust particles, 5, 58, 67, 74, 114, 193
 data on, 121
 deposition on receptor surfaces, 218
 documentation of, 8–9
 monitoring of, 8
 size distribution, 74
 statistical studies of, 8
Airborne soil particulate suspension, 82
Alaska, Asian dust over, 253–59
Algiers-Provencal Basin, 197, 207
Alpine glaciers, 47
Aluminium, 50, 244, 246, 254, 262
Ångström wavelength exponent (α), 173, 185, 186
Antimony, 263
Application Technology Satellite (ATS), 105
Arctic haze, 253–59
Arosa, 200
Atlantic depressions, 42
Atlantic Ocean
 dust loadings over, 248–53
 dustfall over, 65
 refraction index for aerosols over, 91
 transport over, 65, 267–77
 mutual mass distribution, 270
 volume and mass concentration at sea level, 272
 volume distributions, 274–76
Atlas Chain wind, 42
Atmosphere
 aerosol impact on chemistry of, 243–66
 aerosol in physics and chemistry of, 243
 crustal elements in, 245
 dust content of, 59, 156–60
Atmospheric turbidity, 172–76
 parameters of, 176
Bagnères, 44
Barbados, 98, 186, 261
Barium, 263
Barrow, Alaska, 254
Bilma, 95–98, 102, 117
Biotite, 205

- Botswana, 67, 68
 Boulders, 7

 Cadmium, 68, 216
 Calcite, 188–200
