

## Contents

Foreword— <i>J. W. M. La Rivière</i> .....	xv
Preface .....	xvii
Authors and Participants in the SCOPE/UNEP Workshop on the Global Biogeochemical Sulphur Cycle .....	xxi
<b>Chapter 1 Principal Reactions of the Global Biogeochemical Cycle of Sulphur—<i>V. A. Grinenko and M. V. Ivanov</i></b> .....	1
1.1 Introduction .....	1
1.2 Low-temperature chemical reactions of the global sulphur cycle .....	1
1.3 High-temperature reactions of the biogeochemical cycle of sulphur .....	4
1.4 Biological processes for the formation and decomposition of sulphur-containing organic compounds .....	5
1.5 Oxidation of sulphur compounds by micro-organisms .....	7
1.6 Oxidation of reduced sulphur under anaerobic conditions .....	8
1.7 Reduction of sulphate by micro-organisms .....	9
1.8 Fractionation of the stable isotopes of sulphur .....	10
<b>Chapter 2 The Sulphur Cycle in the Lithosphere</b>	
Part I RESERVOIRS— <i>A. A. Migdisov, A. B. Ronov and V. A. Grinenko</i> .....	25
2.1 Introduction .....	25
2.2 Sulphur in the sedimentary envelope of continents ..	28
2.2.1 Sulphur reservoirs in the sedimentary envelope of platforms .....	28
2.2.2 Sulphur in sedimentary rocks of geosynclinal zones .....	67
2.2.3 Sulphur in sedimentary rocks of continents ...	80

2.2.4 Sulphur in the sedimentary layer of the oceanic part of the earth's crust (seismic layer I) . . . . .	88
2.2.5 Entire sedimentary envelope of the earth . . . . .	89
2.3 Sulphur in the 'granite' envelope of continents . . . . .	89
2.4 Sulphur in the 'basalt' layer of the continental crust . . . . .	93
2.5 Sulphur in rocks of the oceanic crust . . . . .	93
2.5.1 Seismic layer II . . . . .	93
2.5.2 Seismic layer III . . . . .	94
2.5.3 Sulphur in the oceanic crust as a whole . . . . .	94
2.6 Sulphur in rocks of the entire earth's crust . . . . .	94
Part II CYCLING— <i>A. Yu. Lein</i> . . . . .	95
2.7 Introduction . . . . .	95
2.8 Distribution of sulphur in the earth's crust . . . . .	96
2.9 Sulphur flux from the mantle . . . . .	97
2.10 Sulphur flux due to volcanism in continents and island arcs . . . . .	98
2.10.1 Assessment of the volcanic sulphur flux . . . . .	99
2.10.2 Sulphur emission during fumarole activity of volcanoes . . . . .	101
2.10.3 Emission of sulphur gases during volcanic eruptions . . . . .	103
2.11 Sulphur fluxes in the natural weathering of continents . . . . .	104
2.11.1 Weathering of mineral matter from the earth's crust . . . . .	106
2.11.2 Flux of sulphur due to natural weathering of continents . . . . .	108
2.11.3 Sulphur flux to the surface of continents . . . . .	111
2.12 Flux of sulphur from continents by anthropogenic weathering . . . . .	111
2.12.1 Anthropogenic weathering of the continental lithosphere . . . . .	111
2.12.2 Magnitude of anthropogenic weathering of the continental lithosphere . . . . .	112
2.12.3 Contribution of the anthropogenic flux to the weathering of the lithosphere . . . . .	113
2.12.4 Emission of sulphur during fuel combustion and metallurgical processes . . . . .	116
2.13 The anthropogenic and total sulphur flux from weathering processes . . . . .	117
2.14 Sulphur flux from the lithosphere during the combustion of liquid and gaseous fuels . . . . .	118
2.15 Balance of sulphur in the lithosphere . . . . .	118

<b>Chapter 3</b>	<b>The Sulphur Cycle in Soil—<i>J. R. Freney and C. H. Williams</i></b>	129
3.1	Introduction .....	129
3.2	The natural cycle of sulphur in soil .....	129
3.2.1	Forms of soil sulphur .....	129
3.2.2	Geographical distribution of sulphur in the soils of the world .....	139
3.2.3	Transformations of sulphur compounds in soil ..	143
3.2.4	Leaching, runoff, and erosion of sulphur compounds from unamended soil .....	157
3.3	The effect of man on the sulphur cycle in soil .....	158
3.3.1	Agricultural practices and the cycling of soil sulphur .....	158
3.3.2	Acid rain .....	175
3.3.3	Effect of coal and mineral mining on soils ....	177
3.4	Sulphur budget for the pedosphere .....	179
<b>Chapter 4</b>	<b>The Atmospheric Sulphur Cycle—<i>A. G. Ryaboshapko</i></b> ...	203
4.1	Introduction .....	203
4.2	Concentration and mass of sulphur compounds in the atmosphere .....	203
4.2.1	Concentration of reduced sulphur compounds ..	203
4.2.2	Concentration of sulphur dioxide .....	210
4.2.3	Concentration of sulphate .....	217
4.2.4	Total sulphur content of the atmosphere .....	224
4.2.5	Stratospheric sulphate layer .....	227
4.3	Sources of atmospheric sulphur .....	230
4.3.1	Biogenic emission from coastal regions and the open ocean .....	231
4.3.2	Biogenic emission from land .....	233
4.3.3	Aeolian weathering of sulphates from the continental surface .....	234
4.3.4	Emission of sea salt sulphate from the ocean ..	239
4.3.5	Anthropogenic emission .....	242
4.4	Processes of sulphur removal from the atmosphere ..	247
4.4.1	Oxidation of reduced sulphur compounds in the atmosphere .....	247
4.4.2	Sulphur dioxide oxidation in the atmosphere ..	248
4.4.3	Removal of sulphur compounds by precipitation	252
4.4.4	Sulphur concentration in precipitation— <i>A. G. Ryaboshapko and A. G. Rozanov</i> .....	255
4.4.5	Uptake of sulphur dioxide by underlying surfaces .....	263
4.4.6	Dry deposition of sulphates .....	266

4.5 Atmospheric balance of sulphur .....	268
4.5.1 Sulphur balance in the atmosphere of industrial regions .....	268
4.5.2 Sulphur balance in the dusty continental atmosphere .....	269
4.5.3 Sulphur balance for the clean continental atmosphere .....	270
4.5.4 Sulphur balance in the oceanic atmosphere ...	271
4.5.5 Global atmospheric sulphur budget .....	272
4.5.6 The global sulphur balance in the pre-industrial era .....	275
4.6 The isotopic composition of sulphur in the atmosphere —A. G. Grinenko .....	278
<b>Chapter 5 The Sulphur Cycle in Continental Reservoirs .....</b>	<b>297</b>
Part I THE SULPHUR CYCLE IN LAKES AND CONTINENTAL RESERVOIRS— <i>M. V. Ivanov</i> ..	297
5.1 Introduction .....	297
5.2 The sulphur cycle in lakes .....	299
5.2.1 The sulphur cycle in freshwater monomictic lakes .....	299
5.2.2 The sulphur cycle in meromictic lakes .....	310
5.3 Man's contribution to the sulphur cycle in continental water reservoirs .....	315
5.3.1 Sulphate and hydrogen sulphide in lake-water .....	315
5.3.2 Accumulation of reduced sulphur in lacustrine sediments .....	318
5.3.3 The sulphur cycle in water reservoirs .....	321
5.3.4 Increase in sulphate content and acidification of lake-water due to atmospheric deposition ....	323
5.4 Estimates of sulphur removed from the global cycle by biogeochemical processes in continental water reservoirs .....	328
5.4.1 Sulphur flux to the sediments of freshwater lakes and water reservoirs .....	328
5.4.2 The sulphur flux to inland drainage basins ....	330
Part II SULPHUR FLUX FROM CONTINENTS TO OCEANS— <i>M. V. Ivanov, V. A. Grinenko and A. P. Rabinovich</i> .....	331
5.5 Sulphur flux in river runoff .....	331
5.5.1 Natural sulphur flux in river runoff .....	332
5.5.2 Sulphur flux to the oceans in ground waters ..	337
5.5.3 Man-made contribution .....	337

<i>Contents</i>	xiii
5.5.4 The total sulphur flux in rivers and underground waters .....	340
5.6 Sulphur isotopic composition of river-water sulphate	340
5.6.1 Variation in isotopic composition along rivers	341
5.6.2 Temporal variation in amount and isotopic composition of sulphate .....	346
5.6.3 Characteristics of the sulphate flux from the USSR .....	349
5.7 Conclusions .....	351
<b>Chapter 6 The Sulphur Cycle in Oceans</b> .....	357
Part I RESERVOIRS AND FLUXES— <i>I. I. Volkov and A. G. Rozanov</i> .....	357
6.1 Sulphur fluxes to the ocean .....	357
6.2 Sulphur in ocean and sea-waters .....	358
6.2.1 Sulphate-sulphur .....	358
6.2.2 Dissolved sulphide .....	359
6.2.3 Biogenic sulphur cycle in waters of the world oceans .....	359
6.3 Conditions of sulphur flow into sediments .....	360
6.3.1 Forms of sulphur flow into sediments .....	360
6.3.2 Sediment masses and distribution over the ocean floor .....	361
6.3.3 Moisture content of bottom sediments .....	362
6.3.4 Organic matter distribution in sediments .....	363
6.4 Sulphate flux from ocean water to bottom sediments	365
6.4.1 Sulphate in pore-water .....	365
6.4.2 Sulphates in the solid phase of sediments .....	367
6.4.3 Sulphate in biogenic marine carbonate .....	371
6.4.4 Barite sulphur .....	375
6.4.5 Sulphate flux to bottom sediments .....	376
6.5 Formation and burial of reduced forms of sulphur ...	377
6.5.1 Distribution and geochemical activity of sulphate-reducing bacteria— <i>M. V. Ivanov</i> ...	377
6.5.2 Basic features of reduced sulphur distribution in sediments .....	388
6.5.3 Total reduced sulphur in modern sediments ..	396
6.5.4 Relationship between reduced sulphur and organic matter in sediments .....	398
6.5.5 Relationship between initial sulphate in pore-water and reduced sulphur in sediments .....	404
6.5.6 Accumulation of reduced sulphur in sediments as a function of sedimentation rate .....	406

6.5.7	Iron and the accumulation of reduced sulphur in sediments .....	407
6.5.8	Internal sulphur cycle in bottom sediments ...	410
6.5.9	Annual accumulation of reduced sulphur in ocean sediments .....	412
6.6	Reduced sulphur accumulation in sediments of marine basins with high rates of sulphate reduction—A. Yu. Lein and M. V. Ivanov .....	413
6.6.1	The Black Sea .....	413
6.6.2	The Sea of Azov .....	416
6.6.3	The Baltic Sea .....	416
6.6.4	The Gulf of California .....	419
6.6.5	Sulphur flux into sediments of inland seas ....	420
6.7	Total flux of sulphur into ocean sediments and the sulphur budget of the world oceans .....	420
Part II THE MASS-ISOTOPIC BALANCE OF SULPHUR IN OCEANIC SEDIMENTS— <i>A. Yu. Lein, V. A. Grinenko and A. A. Migdisov</i> 423		
6.8	Fractionation of sulphur isotopes in sea sediments ..	423
6.8.1	Isotopic composition of sulphur compounds in reduced sediments of inland seas .....	424
6.8.2	Isotopic composition of sulphur compounds in sediments of the Gulf of California .....	429
6.8.3	Isotopic composition of sulphur in ocean sediments .....	432
6.8.4	Principal features of the sulphur isotope distribution in sea and ocean sediments .....	436
6.8.5	Sulphur balance in Pacific Ocean sediments ..	436
6.8.6	Sulphur balance in sediments of the world oceans .....	439
<b>Chapter 7 Major Fluxes of the Global Biogeochemical Cycle of Sulphur—M. V. Ivanov</b> .....		
7.1	Nature of the problem and objectives .....	449
7.2	Fluxes of anthropogenic origin .....	454
7.3	Natural sulphur in river runoff .....	454
7.4	Atmospheric cycling of sulphur .....	456
7.5	The sulphur cycle in the ocean .....	456
7.6	Use of isotopic data for source identification .....	458
7.7	Future trends .....	459
<b>Index</b> .....		465
