Foreword by G. F. White	xv
Foreword by M. J. Mercier	xvi
Preface	xvii
Scientific Group on Methodologies for the Safety Evaluation of Chemicals	xix
Participants of the Workshop	xxi

PART A JOINT REPORT

1 Introduction, General Conclusions and Recommendations	3
1.1 Introduction	3
1.2 General Conclusions and Recommendations	5
2 Mammals: Reproductive Function of Females	7
2.1 Integrated Reproduction Studies in Animals	8
2.1.1 Multigeneration Studies	8
2.1.2 Fertility Tests	12
2.1.3 Reciprocal- or Cross-mating Studies	13
2.1.4 Tests for Selective Embryotoxicity	13
2.1.5 Perinatal and Postnatal Studies	14
2.2 Epidemiological Investigations	15
2.2.1 Definition of Exposure	15
2.2.2 Type of Studies	16
2.2.2.1 Studies Using Readily Accessible Data	16
2.2.2.2 Epidemiological Field Studies	17
2.2.2.3 Long-term Follow-up Studies	17
2.3 Impairment of Specific Female Reproductive Processes	17
2.3.1 Oogenesis and Ovulation	17
2.3.1.1 Toxicity to the Developing Ovary	17
2.3.1.2 Toxicity to the Developed Ovary	19
2.3.2 Gamete Transport, Fertilization, Zygote Transport and Implantation	23
2.3.2.1 Existing Tests	23
2.3.2.2 Established Research Methods with Testing Potential	24

2.3.3	Embryonic Differentiation and Fetal Development . . .	25
2.3.3.1	Whole Animal Tests	25
2.3.3.2	Embryo Culture Methods	26
2.3.3.3	Human Studies	27
2.3.3.4	Parturition	29
2.3.3.5	Effects of Chemical Agents on Lactation . . .	31
2.3.3.6	Effects of Chemical Agents on Maternal Behaviour	32
2.4	Conclusions and Recommendations	33
2.5	References	38
3	Mammals: Reproductive Function of Males	45
3.1	Structure and Physiology Background	45
3.1.1	Hypothalamic–Pituitary–Gonadal Axis	45
3.1.2	Testis	47
3.1.2.1	Interstitial	47
3.1.2.2	Seminiferous Tubules	47
3.1.3	Efferent Ducts and Testicular Plasma	50
3.1.4	Epididymis	50
3.1.5	Accessory Organs	52
3.1.5.1	Prostate	53
3.1.5.2	Seminal Vesicle	54
3.1.6	Sexual Behaviour and Libido	54
3.1.7	Erection and Ejaculation	55
3.1.8	Paternally Related Birth Defects	55
3.2	General Evaluation of Function and Morphology	56
3.2.1	Endocrinological Evaluation	56
3.2.2	Histological Examination	57
3.2.3	Sertoli Cell Function	59
3.2.4	Testicular Semen Analysis	59
3.2.5	Epididymal Function	60
3.2.6	Function of Accessory Organs	60
3.2.7	Semen Analysis	61
3.2.7.1	Sperm Concentration, Morphology and Motility	62
3.2.7.2	Split Ejaculate	64
3.2.7.3	Sperm Viability	64
3.2.7.4	Acrosome Reaction	64
3.2.7.5	<i>In Vitro</i> Tests	65
3.2.7.6	Sperm Dilution Experiments	65
3.2.7.7	Foreign Chemicals in Semen	65
3.2.7.8	Sperm–Cervical Mucus Interaction	66
3.2.7.9	Data Interpretation	66

<i>Contents</i>	xi
3.3 Some Laboratory Tests of Reproductive Capacity	67
3.3.1 Serial Mating Fertility Profile	67
3.3.2 Competitive Fertility	68
3.4 Clinical Examination and Evaluation	68
3.4.1 Clinical Examination	68
3.4.2 Clinical Assessment of Male Fertility	69
3.4.3 <i>In Vitro</i> Fertilization	69
3.4.4 Testicular Biopsy	71
3.5 Conclusions and Recommendations	71
3.6 References	72
4 Vertebrates Other Than Mammals	75
4.1 Birds	76
4.1.1 Currently Used Methods	76
4.1.1.1 Reproductive Cycle Tests	76
4.1.1.2 Multigeneration Studies	77
4.1.1.3 Egg Injection Experiments	77
4.1.2 Potential Test Methods	78
4.1.2.1 Cytogenetics	78
4.1.2.2 Liver Enzyme Induction	78
4.1.2.3 Hormonal Cycle	79
4.1.2.4 Adrenocortical Function	79
4.1.2.5 Egg Exchange Experiments	79
4.1.3 Field Experiments on Reproductive Cycle	80
4.2 Fish	81
4.2.1 Currently Used Methods	81
4.2.1.1 Standard Life-Cycle Tests	81
4.2.1.2 Standard Early-Life-History Tests	81
4.2.2 Potential Test Methods	82
4.2.2.1 Gamete Test	82
4.2.2.2 Medaka Embryo Test	83
4.2.2.3 Cytogenetics	83
4.2.2.4 Histopathological Tests	83
4.2.2.5 Inhibition of Spawning	84
4.2.2.6 Mutagenicity Tests	84
4.2.2.7 Tests Based on Hormonal Control Mechanisms	84
4.2.2.8 Spawning Behaviour Tests	85
4.3 Reptiles	86
4.3.1 Test Methods	86
4.4 Amphibians	87
4.4.1 Test Methods	87
4.5 Conclusions and Recommendations	88
4.6 References	88

5	Invertebrates	93
5.1	Field Studies and Analyses of Field-Collected Material	94
5.2	Laboratory Studies	95
5.2.1	Platyhelminthes	97
5.2.2	Cnidaria	97
5.2.3	Aschelminthes	97
5.2.4	Annelida	98
5.2.4.1	Polychaeta	98
5.2.4.2	Oligochaeta	99
5.2.5	Arthropoda	99
5.2.5.1	Crustacea	99
5.2.5.2	Insecta	99
5.2.6	Mollusca	101
5.2.7	Echinodermata	102
5.3	Conclusions and Recommendations	103
5.4	References	103
6	Higher Plants, Algae and Microorganisms	105
6.1	Higher Plants	105
6.1.1	Test Methods	106
6.1.1.1	Stage 1: From Seed Germination to the Reproductive Phase	106
6.1.1.2	Stage 2: Sporogenesis	107
6.1.1.3	Stage 3: From Mature Gametes to Mature Seeds	107
6.2	Algae and Microorganisms	108
6.2.1	Approaches to Testing for Effects on Reproduction .	109
6.2.2	Choice of Organisms	110
6.2.3	Methods of Growth	110
6.2.4	Growth Media and Physicochemical Conditions	110
6.2.5	Growth Systems	111
6.2.5.1	Systems Using Solidified Media	111
6.2.5.2	Closed (Batch) Culture Systems Using Liquid Media	111
6.2.5.3	Continuous-Flow Culture Systems Using Liquid Media	112
6.2.5.4	Cage (Dialysis) Culture	112
6.2.6	Methods for Assessing Algal and Microbial Growth.	113
6.3	Conclusions and Recommendations	113
6.4	References	115
	Annex: General Aspects of Test Procedures in Reproduction Toxicology	117

PART B CONTRIBUTED PAPERS

Adverse Effects of Environmental Agents on Mammalian Female Reproduction.	125
<i>W. LeRoy Heinrichs and Merrit Gadallah</i>	
Adverse Effects of Chemicals on Male Reproductive Function in Mammals	135
<i>Thaddeus Mann and Cecilia Lutwak-Mann</i>	
Laboratory Aspects of Reproductive Toxicology	149
<i>Robert L. Dixon</i>	
Effects of Chemicals on Reproductive Function	163
<i>I. V. Sanockij</i>	
Effects of Chemicals on Reproductive Functions of Mammals: Mechanisms of Cell Injury and Adaptive Responses.	171
<i>Linda R. Wudl and Michael I. Sherman</i>	
Epidemiological Approach to Human Reproductive Failure Assessment	199
<i>Dorothy Warburton, Zena Stein and Jennie Kline</i>	
Laboratory Methods for Evaluating and Predicting Specific Reproductive Dysfunctions: Oogenesis and Ovulation.	217
<i>Donald R. Mattison and Griff T. Ross</i>	
Techniques for Detecting and Evaluating Abnormalities in Testicular Function.	247
<i>Jeffrey B. Kerr and David M. de Kretser</i>	
Morphological and Chemical Methods of Semen Analysis for Quantitating Damage to Male Reproductive Function in Man . . .	263
<i>Rune Eliasson</i>	
The Mammalian Embryo and Fetus in vitro	277
<i>D. A. T. New</i>	
Methods for Evaluating and Predicting Human Fetal Metabolism and Development	299
<i>J. E. Jirásek</i>	
Experimental Methods in Embryotoxicity Risk Assessment	313
<i>Richard Jelinek and Otakar Marhan</i>	
Perinatal Exposure and Teratological End-points: Some Principles and Possibilities	317
<i>Richard Doherty</i>	
Appraisal of Reproductive Failure in Wildlife.	339
<i>J. E. Kihlström</i>	
Methods for Assessment of the Effects of Pollutants on Avian Reproduction.	345
<i>David B. Peakall</i>	

Methods to Test and Assess Effects of Chemicals on Reproduction in Fish	365
<i>Edward M. Donaldson and Eberhard Scherer</i>	
Assessment of the Effects of Chemicals on the Reproductive Functions of Reptiles and Amphibians	405
<i>AnnLouise Martin</i>	
Methods for the Assessment of the Effects of Chemicals on the Reproductive Function of Insects	415
<i>V. Landa, B. Bennettová, I. Gelbič, S. Matolin and T. Soldán</i>	
Methods for Assessing the Effects of Chemicals on Reproductive Function in Marine Molluscs	439
<i>D. R. Dixon</i>	
Methods for Assessing the Effects of Chemicals on Reproduction in Marine Worms	459
<i>Bertil Åkesson</i>	
Methods for Assessing the Effects of Chemicals on Reproductive Function in Certain Invertebrates: Some Principles and Recommendations	483
<i>K. G. Davey, A. S. M. Saleuddin, C. G. H. Steel and R. A. Webb</i>	
Methods for Assessing the Effects of Chemicals on Reproduction in Higher Plants	499
<i>P. L. Pfahler and H. F. Linskens</i>	
Methods for Assessing Effects of Chemicals of Algal Reproduction	515
<i>Arne Jensen</i>	
Methods for Assessing the Effects of Chemicals on the Reproductive Functions of Microorganisms	525
<i>J. Howard Slater</i>	
Subject Index	537
