List of Contributors	xv
Preface	xvii
Noise Pollution—Basic Introductory Survey	1
<i>R. W. B. Stephens</i>	
PART I FUNDAMENTALS OF NOISE AND HEARING	
Chapter 1. Physics of Noise	45
<i>A. Lara Sáenz</i>	
1.1 Noise Generation: Mechanical Vibration	45
1.2 Acoustic Waves: Propagation of Mechanical Vibrations ...	51
1.3 Sound in Enclosures	68
1.4 Measurement of Noise	80
1.5 References	91
Bibliography	93
Chapter 2. Review of Noise Propagation in the Atmosphere	95
<i>J. E. Piercy, T. W. F. Embleton and L. C. Sutherland</i>	
2.1 Introduction	95
2.2 Propagation away from Boundaries (Air to Ground)	96
2.3 Propagation near the Ground	101
2.4 Effect of Surface Meteorology	115
2.5 Effect of Topography	124
2.6 Propagation Problems Specific to Community Noise	126
2.7 References	128
Chapter 3. Acoustic Shielding: Noise Reduction by Thin and Wide Barriers	133
<i>Z. Maekawa</i>	
3.1 Introduction	133
3.2 Simple Design Method for a Noise Barrier	134

3.3	Application of Exact Solutions of Sound Diffraction	138
3.4	Effect of Surface Absorption of the Barrier	139
3.5	Effect of Sound Reflection from the Ground	140
3.6	Calculation of Sound Fields by Integral Equation Methods	144
3.7	References	145
Chapter 4. Psychophysics of Hearing		147
<i>E. Zwicker</i>		
4.1	Introduction	147
4.2	Structure of the Ear	147
4.3	Pitch and Critical Band-Rate	150
4.4	Masking and Excitation	152
4.5	Fundamental Loudness Phenomena	157
4.6	Excitation Pattern and Loudness Pattern	160
4.7	Loudness Calculation Procedure Based on Psychoacoustical Excitation	162
4.8	Applications	164
4.9	Bibliography	167
Chapter 5. Aural Reception		169
<i>E. A. G. Shaw</i>		
5.1	Introduction	169
5.2	The Directionality of the Human Hearing System	169
5.3	Reception and Perception	172
5.4	The Human Ear as a Receiver of Sound Energy	174
5.5	Sound Pressure Measurements within the Ear	175
5.6	Sound Pressure Measurements with Body-mounted Microphones	178
5.7	References	181
Chapter 6. Recent Advances in Understanding Hearing Mechanisms and Hearing Impairment		183
<i>E. F. Evans</i>		
6.1	Introduction	183
6.2	Frequency Analysis by the Cochlea	183
6.3	Cochlear Hearing Loss	193
6.4	Tinnitus	194
6.5	References	196

PART II EFFECTS OF NOISE ON MAN

Chapter 7. Auditory After-effects of Noise	201
<i>W. Dixon Ward</i>	
7.1 Introduction	201
7.2 Impairment and Handicap	202
7.3 Hearing Damage	203
7.4 Threshold Shifts, Temporary and Permanent	204
7.5 Individual Susceptibility	219
7.6 Summary	221
7.7 References	222
Chapter 8. Non-auditory Effects of Noise: Physiological and Psychological Effects	225
<i>G. Jansen and E. Gros</i>	
8.1 Introduction	225
8.2 Physiological Effects of Noise	225
8.3 Psychological Effects of Noise	237
8.4 Noise and Critical Groups	244
8.5 References	246
Chapter 9. Noise Interference with Oral Communication	249
<i>T. Tarnóczy</i>	
9.1 Communication by Speech	249
9.2 Mechanism of Speech Formation	251
9.3 Speech as Information	256
9.4 Acoustical Data of Speech and Intelligibility	259
9.5 References	263
Chapter 10. Noise Pollution during the Night—A Possible Risk Factor for Health	265
<i>B. Griefahn</i>	
10.1 Introduction	265
10.2 Primary Effects	267
10.3 After-Effects	276
10.4 Conclusion	277
10.5 References	279

Chapter 11. Hearing Conservation	283
<i>A. Glorig</i>	
11.1 Introduction	283
11.2 Components of a Hearing Conservation Programme	284
11.3 Implementation of the Programme	290
11.4 Methods of Hearing Conservation	291
11.5 Summary	293
11.6 Bibliography	294
PART III SOURCES OF NOISE AND CONTROL	
Chapter 12. Road Traffic Noise: Generation, Propagation and Control	297
<i>C. Lamure</i>	
12.1 Road Vehicles as Sources of Noise	297
12.2 Noise Due to Road Traffic	310
12.3 Noise Propagation and Ground Effect	316
12.4 Methods for Predicting Noise Levels	320
12.5 Methods for Reducing Noise Levels in the Vicinity of a Main Road	323
12.6 Reduction of Noise Levels on Applying Traffic-Control Measures in Built-up Areas	331
12.7 Noise Regulations and Prospects Concerning the Sound-proofing of Vehicles	339
12.8 References	341
Chapter 13. Aircraft Noise Generation and Control: Noise Around Airports	343
<i>J. O. Powers</i>	
13.1 Introduction	343
13.2 Aircraft Noise Generation	345
13.3 Control of Noise Around Airports	352
13.4 Concluding Remarks	356
13.5 References	358
Chapter 14.1 Solid-borne Noise Control in Buildings and Machinery	359
<i>M. Heckl</i>	
14.1 The Nature of 'Noise' in Solids	359

<i>Contents</i>	xiii	
14.2	Resumé of Different Wave-types in Solids	360
14.3	Measuring Techniques	360
14.4	Reduction of Structure-borne Noise at its Origin	364
14.5	Reduction of Solid-borne Noise during Propagation	366
14.6	Future Trends	368
14.7	Bibliography	369
Chapter 15.	Impact Machinery Noise—Prediction and Control	371
	<i>E. J. Richards</i>	
15.1	Introduction	371
15.2	Acceleration Noise	372
15.3	Ringling Noise	373
15.4	Noise Reduction: Design Changes	375
15.5	Noise and its Relation to Force Derivatives	378
15.6	Conclusion	385
15.7	References	386
Chapter 16.	Building Noise Control: The Main Problems, Available Technology and Future Trends	387
	<i>T. J. Schultz</i>	
16.1	Introduction	387
16.2	The Main Problem: First-order Solutions to First-order Problems	387
16.3	Privacy as an Amenity	389
16.4	How to Achieve Privacy from Noise	389
16.5	Building Codes as a Means of Dealing with the Main Problem	391
16.6	Persuasion of People to Accept Tests for Compliance with a Specification	394
16.7	Coupling Noise Control with Energy Conservation	396
16.8	Conclusion	396
16.9	References	397
Chapter 17.	Noise Pollution Control: Present Possibilities of Controlling Noise inside Buildings	399
	<i>G. L. Fuchs</i>	
17.1	Introduction	399
17.2	Design Criteria	399
17.3	Urban Planning	400
17.4	Airborne and Solid-borne Noise	402

17.5	Façades and Roofs	404
17.6	Interior Noise Sources	408
17.7	Partition Insulation	409
17.8	Other Interior Noise Sources	411
17.9	The Sound Field inside Enclosures	412
17.10	Volume and Shape	412
17.11	Concluding Remarks	414
17.12	References	417
Chapter 18. Judicial and Legal Aspects of Noise Control		419
<i>W. Aecherli</i>		
18.1	Introduction	419
18.2	Judicial Basis of Noise Control Legislation	420
18.3	Some National Regulations on the Legal Structure of Noise	422
18.4	Noise Abatement Legislation	424
18.5	International Co-operation	426
18.6	Economic Implications	427
18.7	Medico-Legal Aspects	428
18.8	Bibliography	429
Index		431
