

Subject Index

- A-weighted level, 210, 213, 214
- A-weighting, 169–171
- Absorber, 368
- Absorption coefficient, 71
- Absorption cross-section, 174, 175
- Absorption materials, 2, 72, 348
 - membrane, 414
 - porous, 414
 - resonance, 414
- Absorption of volume elements, 72
- Acceleration, 360, 362
- Acceleration level, 362
 - reference value for, 362
- Acceleration noise, 372–374
- Accelerometer, 362
- Acoustic efficiency, 378
- Acoustic emission, 24
- Acoustic energy density, 63
- Acoustic environment, 8
- Acoustic impedance, 58
- Acoustic insulation, 77
- Acoustic intensity, 62–64
- Acoustic isolation, 76
- Acoustic perfume, 390
- Acoustic power of vehicle, 307
- Acoustic publicity, 40
- Acoustic radiation, 18
- Acoustic shielding, 133
- Acoustic sounding, 122
- Acoustic trauma, 201
- Acoustic waves, 50
- Acoustical barriers, 401
- Acoustical holography, 18
- Acoustical performance test, 395
- Acoustical space, 173
- Acoustically defined threshold value, 244, 245, 246
- Acoustics
 - education, 36
 - interdisciplinary nature of, 6
- Active attenuation, 17, 18
- Added mass, 368
- Additivity of effects, 206
- Adiabatic state equation (perfect gases), 55
- Aerodynamic noise, 21
- Aerosol, 40
- Aerosol particles, 40
- Affricates, 254
- Age correction (hearing), 207, 208, 209
- Air conduction threshold, 285
- Airborne sound, 402, 410
- Aircraft noise, 20, 344, 349
 - operational control, 344, 345, 353
 - propeller-driven aircraft, 344
 - public complaints, 343
 - supersonic transport, 348
 - takeoff procedures, 349, 353, 354
 - turbofan, 348
 - vortex, 348, 350
- Airport constraints, 344
- Airport design, 345
- Airport use restrictions, 357
- Airports, preferential runways, 353
- Alternative pathway, 16
- Ambient noise, 22
- Anechoic chamber, 60, 176
- Anechoic room, 3
- Angular velocity, 47
- Animal communication, 251
- Annoyance, 225, 229, 241, 242, 243, 244
- Annual test (audiometry), 287
- Anti-noise source, 365, 366
- Anvil, 11
- Approach procedures, 354
- Arousal, 412
- Articulation index, 261
- Artificial speech, 256
- Arytenoid cartilage, 253
- Atmospheric absorption, 97, 118
- Atmospheric static pressure, 80
- Atmospheric turbulence (eddies), 120, 122, 123
- Attention, 173

- Audiogram, 14, 203
- Audiologist, 289
- Audiometry, 13–14, 286, 287
 - in-house programmes, 287
 - mobile vans, 287
 - pre-employment test, 287
 - pre-placement test, 287
 - proper environment, 285
 - pulse tone, 286
 - recheck test, 287
 - referral criteria, 288
 - repeat test, 287
 - self-recording, 286
 - terminal test, 287
- Auditory area, 12
- Auditory cortex, 12–13, 150
- Auditory nerve, 12
- Auditory nerve fibres, 148, 150
- Auditory pathway, 10
- Auditory systems, 183
 - central, 183
 - peripheral, 183
- Auditory threshold, 204
- Aural reception, 169
- Automatic (artificial) recognition, 256, 257
- Average absorption coefficient, 72

- Background levels, 3
- Background noise, city, 97
- Backward masking (pre-masking), 155
- Bandwidth, 82
- Bark, 152, 157, 160
- Barrier on the ground, 140
- Barycentre, 275
- Basilar membrane, 148, 149, 150, 185
- Behaviour, 237, 238, 242
- Bending waves, 52, 74, 75, 360, 361
 - slow, 373
 - speed of propagation, 74
- Binaural displacisus, 203
- Blood circulation, peripheral, 225, 226, 231, 234, 245

 Computer programs, traffic noise prediction, 321, 322
 Computerized audiometer, 286
 Condition monitoring, 24
 Conductive losses, 13
 Conduits, 408
 Consonants, 255
 Constant percentage bandwidth filters, 82
 Constrained layer, 368
 Continuous spectrum, 249
 Cooperative demonstrations, 396
 Core engine noise, 345
 Cortical losses, 13
 Cost increases, 396
 Cricoid cartilage, 253
 Critical bands, 150–155, 157, 160–164
 Critical frequency, 75
 Critical groups, 225, 244, 246
 Critical level, 214, 218
 Cumulative metrics, 355
 Cut-off frequency, 60
 Cylindrical waves, 65

 D'Alembert principle, 46, 49
 Damped plate-like structures, 380
 Damped vibration, 48
 Damping, 366, 368, 404, 405
 Damping factor, 32, 48
 Day–night equivalent level, 85, 86, 402
 dB(A), 82, 284
 dB(B), dB(C), dB(D), 82
De facto specifications, 395
 Deadly silence, 3
 Decibel scale, 64
 Delta-sleep, 265, 273, 274
 Design criteria, 399
 Design levels, 399
 Design source improvements, 408
 Diesel engine, 299, 384
 Difference limens, 204
 Diffraction, 59
 Diffraction (barrier), 134
 Diffraction effects, 171, 179
 head and torso, 171
 Diffuse sound field, 59–62, 162, 164, 171, 174, 176
 Dilatation of pupil, 226, 227
 Direct noise effects, 225, 242, 243
 Directivity, 67, 68
 Directivity index, 67, 68

 Discontinuity, 366, 368
 Discotheque noise, 21
 Dispersion, 360
 Displaced thresholds, 353
 Distinctive features, 258
 Dosimeter, 285
 Drug effects, 220
 Dynamic enclosures, 415

 Ear
 external (cavum, cymba, fosa), 172, 175, 176

- Sabine absorption coefficient, 72
 Sabine formula, 73
 Sandwich plate, 368
 Saturation effect, 119, 123
 Scala media, 148, 149
 Scala tympani, 148, 149
 Scala vestibuli, 148, 149
 Screen effectiveness, 329
 Seasickness, 6, 27
 Secondary effects of noise, 251
 Secondary noise control, 364, 366
 Semi-circular canals, 13, 148, 149
 Semi-vowels, 255
 Sensation level, 156
 Sensitivity to noise, 225, 240, 242, 245, 246
 Sensory cells, 149
 Sex effect on PTS, 221
 Shadow zone, 103, 109, 113, 116, 119, 120
 Shear modulus (G), 55, 56
 Shear wave, 52, 360, 361
 Shielding factor, 119, 123
 Short-time analysis, 257
 Signal stability, 257
 Signal-to-noise ratio, 258, 412
 Simultaneous masking, 155, 156
 Sleep
 body movements, 275–277
 effects of noise, 267
 awakenings, 267, 268, 269, 270, 273
 endogenic factors
 age, 271
 sex, 272
 heart rate, 275, 276
 immediate reactions, 268
 K-complex, 275
 O-reactions, 268, 269, 273
 primary effects, 267
 vegetative reactions, 275–276
 quality of, 276, 277
 Sleep cycle, 265
 Sleep disturbances, 265, 269, 275, 277
 Sleep stages, 265
 Sociacusis, 206
 Social acoustics, 387
 Social-scientific measuring instruments, 243
 Social-scientific noise effects, 243, 245
- Solid-borne sound, 360, 369
 Sonar, 34
 Sone, 157, 158, 159, 164–166
 Sonic boom, 349
 Sound, 45
 impulsive, 8
 intermittent, 8
 steady, 8
 types of, 8
 Sound absorbing materials, *see* Absorption materials
 Sound and man, 6
 Sound diffraction (barrier), 136
 Sound field, types of, 59
 Sound intensity, *see* Acoustic intensity
 Sound intensity level, 65
 Sound level difference, 76
 Sound level meter, 8, 81, 169
 Sound level weighted population (LWP), 88
 Sound perception, 172
 Sound power level (SWL) source, 65, 66
 Sound pressure level (SPL), 65
 Sound propagation outdoors, 95
 effects of surface meteorology, 115
 Sound protective clothing, 233, 234
 Sound reception, 172
 Sound sensation, 12
 Sound source, 65
 Sound transmission class (STC), 78
 Sound waves, 52
 Source location, 18
 Source strength, 66
 Spacial image, 173
 Specific acoustic impedance, 55, 56
 Specific loudness, 160, 161, 165
 Spectral partial masking, 159
 Speech, 202
 Speech communication system, 249, 250
 Speech discrimination, 174
 Speech frequencies, 211
 Speech perception, 202, 203
 Speech spectrum, 259, 260
 Speech understanding, 185
 Speed limitations, 326
 Speed of wave propagation (air), 52, 54, 55, 56
 Speed of wave propagation (solids), 55, 56
 Speed of wave propagation (water), 55
 Spherical waves, 65
 direct and reflected, 103
 Spiral limbus, 148, 150

- Springs, 404
Standards, 344, 349
Standing wave ratio (SWR), 70
Standing waves, 68-70, 403, 414
Stapes, 148, 149
Statistical acoustics, 414
Statistical percentiles level, 84
Stirrup, 11
Stops, 254, 255
Street noise levels, 319
Structure-borne sound, 360, 362, 366, 402, 410
Supersonic transport aircraft, 348
Supporting cells, 148, 150
Surface absorption (barrier), 139
Surface meteorology effects, 115
Surface roughness, 115
Surface waves, 107, 113, 114
Susceptibility to noise, 219
Suspended ceiling, 360, 367
- Tectorial membrane, 148, 150
Temperature profile, 115
 lapse, inversion, neutral, 116, 118, 120
Temporal bone, 149
Temporal damping coefficient, 48
Temporal integration, 202
Temporal partial masking, 159, 160
Temporary threshold shift predictor, 220
Temporary threshold shift (TTS), 14, 205, 212-217
 delayed recovery from, 215
 recovery from, 212
Testing of outdoor sources, 126
Thick barrier, 138
Third octave band level, 163
Threshold in quiet, 152, 153, 156, 158
Threshold shifts, 204
Thyroid cartilage, 253
Time average sound level, 85
Time constant of enclosure, 73
Tinnitus, 15, 194, 201, 203
Tone burst, 155, 156
Topography effects, 124
Total energy theory, 214, 217-219
Total loudness, 162, 165
Town centre noise reduction, 317
Trace matching, 74
Trace speed, 74
Trace wave length, 74
Traffic control measures, 331
Traffic limitation, 327
Traffic noise, 22, 297, 403
 cost reduction, 338
 noise abatement legislation, 424
 propagation of, 316
 reduction methods, 323
 screens, 328-331
 statistical distribution, 307
Traffic noise index (TNI), 84
Traffic noise prediction
 computer programs, 321, 322
 reduced scale models, 322
Traffic noise propagation, transverse
 profile, 318, 319
