Foreword <i>C.R. Krishna Murti</i>	xiii
Foreword <i>Michel J. Mercier</i>	xiv
Preface <i>Norton Nelson</i>	xv
Scientific Group on Methodologies for the Safety Evaluation of Chemicals	xix
Participants of the Workshop on Methods for Assessing and Reducing Injury from Chemical Accidents	xxi

PART A JOINT REPORT

Chapter 1	Introduction	3
	1.1 Objectives and Scope	3
	1.2 Context	4
	1.3 Major Conclusions and Recommendations	7
Chapter 2	The Assessment and Control of Chemical Accidents	11
	2.1 Chemical Substances in the Modern World	11
	2.2 The Nature and Scale of Chemical Accidents	15
	2.2.1 The Build-Up to an Accident	15
	2.2.2 Some General Statistics on Chemical Accidents	17
	2.2.3 Specific Examples of Chemical Accidents	21
	2.3 The Control of Operations with Large-Scale Accident Potential	23
	2.3.1 The Origin of Hazards Regulation	23
	2.3.2 The Intents of Hazards Regulation	24
	2.3.3 The Obligation of Notification	25
	2.3.4 The Safety Case	28
	2.3.5 The Reporting of Accidents	30
	2.3.6 What Present Regulations do not Cover	31
	2.4 The Physical Consequences of an Accident	33
	2.4.1 Release of Hazardous Substances	33
	2.4.2 Dispersion to the Atmosphere	34
	2.4.3 Dispersion via Solid or Liquid Phases	35
	2.4.4 Input Requirements for Damage Assessment	36

2.5	Engineering Management of Initial Events following an Accident.....	37
2.6	The Information Needs for Assessment and Control.....	37
2.7	The Investigation of Accidents	38
2.8	Recommendations	41
Chapter 3	Health Assessment and Medical Response	45
3.1	Introduction	45
3.2	Toxicology and Risk Assessment.....	46
3.2.1	Exposure Assessment of the Target Population	46
3.2.2	Dose to Target Tissue	47
3.2.3	Biological Response	48
3.2.4	Dose-Response Relationships	49
3.3	Immediate Response to a Chemical Accident	49
3.3.1	Emergency Medical Response	50
3.3.2	Public Health Responses	52
3.3.3	Investigations and Studies.....	54
3.4	Long-Term Responses	56
3.4.1	Medical Response.....	57
3.4.2	Public Health Response	59
3.4.3	Investigations and Studies.....	60
3.4.4	Recommendations.....	62
Chapter 4	Ecological Aspects	67
4.1	Exposure	67
4.1.1	Terrestrial Organisms.....	67
4.1.2	Aquatic Organisms	68
4.1.3	Ecosystems	68
4.1.4	Problems in Estimating Exposure and Dose for Non-Human Targets.....	68
4.2	Ecological Effects	69
4.2.1	Domestic Animals	70
4.2.2	Wildlife Concerns	70
4.2.3	Endangered Species	70
4.2.4	Plants	71
4.2.5	Food Chain Contamination.....	71
4.2.6	Plants and Animals as Indicators.....	72
4.2.7	Ecosystem Effects.....	72
4.3	Conclusions and Recommendations.....	73
4.3.1	Conclusions	73
4.3.2	Recommendations	74

<i>Contents</i>		xi
Chapter 5	Disaster Emergency Planning	75
	5.1 Introduction	75
	5.2 Essential Elements of Emergency Planning.....	75
	5.3 On-Site Planning.....	76
	5.4 Off-Site (Community) Planning.....	77
	5.5 Public Health Planning	78
	5.6 Public Awareness.....	80
	5.7 Recommendations	80
Appendix	Information on Locations of International Poison Control Centres and Supplementary Resource Documents	83
PART B CONTRIBUTED CHAPTERS		
Chapter 6	Evaluation of Exposure and Hazard in Chemical Catastrophes	89
	<i>Vladimir Dolezal and Jiri Pokorny</i>	
Chapter 7	Industrial/Chemical Disasters: Medical Care, Public Health and Epidemiology in the Acute Phase	105
	<i>Henry Falk</i>	
Chapter 8	Biological Effects of Chemical Disasters: Human Victims	115
	<i>C.R. Krishna Murti</i>	
Chapter 9	Biological Effects in Humans, Initial Management and Role and Responsibility of Poison Centres in Chemical Accidents	127
	<i>Per Kulling</i>	
Chapter 10	Communications and Preparedness for Chemical Accidents	141
	<i>Adeline Levine</i>	
Chapter 11	Dispersal of Chemicals	157
	<i>James McQuaid</i>	
Chapter 12	Ecotoxicological Considerations of Chemical Accidents	189
	<i>David B. Peakall</i>	
Chapter 13	Planning for the Emergency Medical Service Response to Chemical Disaster	199
	<i>Jiri Pokorny, Vladimir Dolezal and Eric K. Noji</i>	
Chapter 14	Chemical Accidents: Long-Term Health Issues	211
	<i>V. Silano and P. Comba</i>	
Chapter 15	Background Paper on Pathology – Collection, Processing and Storage of Pathological Material for Immediate Analysis and Later Study of Toxicological Effects and their Long-Term Implication	223
	<i>S. Sriramachari</i>	

Chapter 16 Factors Affecting the Occurrence and Initial Management of Chemical Accidents 235
S. Varadarajan

Chapter 17 The Nature of Chemical Hazards, their Accident Potential and Consequences 251
Jacques Vilain

Index 291
