

Allied Health Framework

The mission of the Allied Health Science (AHS) Program at Carl Albert State College is to meet the general education requirements of the college and to provide the foundational groundwork for students who are interested in the many interdisciplinary fields associated with health care. The program accomplishes this by providing tools for theoretical and practical application by developing an appreciation of the importance of a healthy lifestyle, and facilitating a beginning mastery of knowledge in introductory courses.

Curricular Goals:

Provide graduates the foundational groundwork in the many fields associated with medicine
Provide graduates an appreciation of the importance of a healthy lifestyle
Facilitate a mastery of knowledge in introductory courses in the field

Program Student Learning Outcomes:

Upon completion of the program, the student will analyze the cardiovascular system.

- A. Identify the functions of the cardiovascular system
- B. Examine the parts of cardiovascular system
- C. Classify common cardiovascular conditions

Upon completion of the program, the student will develop evidence-based dietary plans that include balanced nutritional intake.

- A. Define common terminology used in nutrition
- B. Identify the role of nutrition in the human body
- C. Identify nutrients as they relate to food groups and their functions, toxicities, and deficiencies

Upon completion of the program, the student will use appropriate medical terminology.

- A. Utilize prefixes, word roots and combining vowels utilized in healthcare
- B. Utilize terms and abbreviations related to healthcare
- C. Apply and comprehend medical language
