

Build Your Own Broken Link Checker with Cursor AI

Create a free, no-code broken link checker tool in minutes.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Why Build Your Own Checker?

Instead of paid tools like Screaming Frog, building your own checker can save money and offer a custom solution for managing multiple client sites or personal projects. This tool is part of a larger free SEO toolkit being built in this series. What are the benefits of building your own lightweight SEO tools?

Tool Functionality

The broken link checker tool scans a website and identifies both internal and external links. What are two key features of the tool's output and usability?

The Build Process

The article explains that Cursor AI is used to generate the Python script. What are the main components that the walkthrough covers prompting Cursor to create?

Exporting Results

Once a scan finishes, the results are automatically exported. What format is used for the export, and how are the files named to ensure organization?

Standalone Application

The Python script can be converted into a standalone application. What is the advantage of converting it to an EXE file?

Future Enhancements

The article suggests several ways to improve the broken link checker. Name two potential enhancements for the tool.

Time to Build

According to the article, approximately how long does it take to build a working broken link checker with Cursor AI?
