

Casey Builds It - Broken Link Checker FAQ

Build your own broken link checker tool with Cursor AI in minutes.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Q: What is this article about?

A: This article explains how to use Cursor AI to build a free, working broken link checker tool without needing any coding experience. The tool can scan internal and external links on any website.

Q: How long does it take to build this tool?

A: You can build a working broken link checker with Cursor AI in approximately 10 minutes.

Q: What kind of links can this tool check?

A: The tool scans both internal and external links on any given website to identify broken ones.

Q: Do I need to know how to code to build this tool?

A: No, this build is designed for users with no coding experience. Cursor AI generates the necessary Python script for you.

Q: What are the benefits of building my own broken link checker?

A: Building your own tool avoids the cost and learning curve of paid software like Screaming Frog. It's a great way for SEO professionals, freelancers, or individuals to save money and create a custom SEO toolkit.

Q: What happens to the scan results?

A: Once a scan finishes, the results automatically export into a clean CSV file. This file is named with the site's domain and a timestamp for easy organization.

Q: Does the tool have a graphical interface?

A: Yes, the tool comes with a simple GUI, making it easy to run scans and view results without needing to interact with a terminal window.

Q: Can I use this tool on any computer?

A: The Python script can be converted into a standalone EXE application. This means it can run on any Windows machine without requiring Python to be installed.

Q: Is this a standalone tool, or part of something bigger?

A: This broken link checker is one piece of a larger, free SEO toolkit being built from scratch in this series. Previous tools include a sitemap extractor and a keyword density tracker.

Q: What are some ideas for improving the tool?

A: Future enhancements could include scheduling automated scans, using a JSON config file for multiple client sites, or integrating it further into a larger custom SEO tool stack.

Q: Why are broken links bad?

A: Broken links can negatively impact your SEO and degrade the user experience on your website.

Q: Who is this tool for?

A: This tool is ideal for SEO professionals, freelancers managing multiple client sites, or anyone looking to build their own custom SEO toolkit without incurring costs.
