

Frequently Asked Questions: Build a Free Broken Link Checker Tool

Learn how to create your own broken link checker using Cursor AI without any coding.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Q: What is the main purpose of this article?

A: This article explains how to use Cursor AI to build a free broken link checker tool. It's designed for users who want to avoid paid subscriptions and coding to maintain their website's SEO and user experience.

Q: How long does it take to build this broken link checker?

A: You can build a fully working broken link checker with Cursor AI in approximately 10 minutes.

Q: What kind of links does this tool check?

A: The tool scans and flags both internal and external links on any given website to identify broken ones.

Q: Do I need to know how to code to build this tool?

A: No, this build is specifically designed for users with no coding experience. Cursor AI generates the necessary Python script for you.

Q: What are the benefits of building my own broken link checker?

A: Building your own tool saves money compared to paid subscriptions like Screaming Frog, offers a simpler user experience, and allows you to create a custom SEO toolkit.

Q: What happens to the scan results?

A: Once a scan finishes, the results are automatically exported into a clean CSV file. This file is named with the site's domain and a timestamp for easy organization.

Q: Can I use this tool on any computer?

A: Yes, the Python script can be converted into a standalone EXE application. This means it can run on any Windows machine without requiring Python to be installed.

Q: Is this a standalone tool, or part of something bigger?

A: This broken link checker is one piece of an ongoing series focused on building a complete, free SEO toolkit from scratch.

Q: What are some potential future improvements for this tool?

A: Future enhancements could include scheduling automated scans, using a JSON config file for multiple client sites, and integrating it into a larger custom SEO tool stack.

Q: Who would benefit from using this tool?

A: SEO professionals, freelancers managing multiple client sites, or anyone looking to keep their website links functional and improve user experience without incurring costs.

Q: Does the tool have a graphical interface?

A: Yes, the tool comes with a simple GUI, making it easy to run scans and view results without needing to interact with a terminal.

Q: Can I share the tool with others?

A: Yes, because the script can be converted into a standalone EXE, you can easily hand it off to a client or teammate to use without them needing to install any special software.
