

Casey Builds It Schema Validator FAQ

Quick answers about the free schema validator tool.

Based on [Free Schema Validator Tool Built With Cursor Ai Find Seo Schema Errors Fast](#) by Casey Builds It

Q: What is the Casey Builds It Schema Validator Tool?

A: It's a Python-based GUI tool designed to automate schema auditing across websites. It helps find and flag common structured data errors that can impact SEO.

Q: What problems does this tool solve?

A: It addresses the tediousness of checking schema markup manually across many pages or entire sites. It provides a fast, free alternative to paid SaaS tools that often only check one page at a time.

Q: How can I use the tool to check schema?

A: You can input a single URL to check one page, or provide an entire sitemap to scrape and validate all pages. It can also handle custom lists of URLs for targeted checks.

Q: What types of structured data does the tool find?

A: The tool fetches HTML and parses it to extract both JSON-LD scripts and inline microdata.

Q: How does the tool validate schema?

A: It uses custom, handwritten validation rules specifically designed to catch critical SEO issues like missing required fields and malformed types, rather than just wrapping Google's API.

Q: Can I test my schema live?

A: Yes, flagged pages can be sent directly to Google Rich Results for a live, side-by-side test, ensuring you're not solely relying on local validation.

Q: Is the tool useful for checking specific page types?

A: Absolutely. You can run it against a custom list of URLs, making it ideal for spot-checking specific templates or page types without scanning the entire domain.

Q: Can I save the results of my schema audit?

A: Yes, the results can be exported. This allows you to track fixes over time or easily share reports with clients or teammates.

Q: Who is this tool designed for?

A: It's built for SEOs, developers, and agencies who manage multiple websites and need an efficient way to audit structured data and avoid costly errors.

Q: Does the tool require a subscription fee?

A: No, the tool is free to use and does not require a monthly SaaS subscription.

Q: What are the key benefits of using this validator?

A: It automates audits, extracts multiple schema types, uses custom rules for real SEO issues, links to live testing, and exports results, all without a subscription fee.

Q: What happens if schema issues are found?

A: The tool flags critical schema issues and allows you to send those pages to Google Rich Results for further live testing. Results can also be exported for tracking fixes.
