

Build Your Own Broken Link Checker with Cursor AI

Create a free, no-code broken link checker tool in minutes.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Why Build Your Own Tool?

Instead of paid crawlers like Screaming Frog, building your own tool offers a cost-effective alternative, especially for SEO professionals or freelancers managing multiple sites. This build is part of a series to create a complete free SEO toolkit. What are two benefits of building your own lightweight version of these tools?

Tool Functionality

The broken link checker tool scans a website and identifies broken links. What are the two types of links it flags?

User Interface

To make the tool user-friendly, it includes a simple GUI. What does this GUI allow users to do without touching any code?

Exporting Results

After a scan finishes, the results are automatically exported. What file format is used for the export, and how are the files named to ensure organization?

Cursor AI's Role

The article explains how to prompt Cursor AI to generate the necessary script. What three key functionalities does Cursor AI help build for this tool?

Standalone Application

The Python script can be converted into a standalone EXE application. What is the main advantage of this conversion for users who may not have Python installed?

Future Enhancements

The article suggests several ways to improve the tool. Name two potential enhancements for the broken link checker.

Time to Build

According to the article, approximately how long does it take to build a working broken link checker with Cursor AI?
