

Build Your Own Broken Link Checker with Cursor AI

Create a free, no-code broken link checker tool in minutes.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Why Build Your Own Tool?

Instead of paid crawlers, this article suggests building your own broken link checker to save money and avoid a steep learning curve, especially for SEO professionals or freelancers managing multiple client sites. What are the two main benefits mentioned for building your own tool?

Tool Functionality

The broken link checker tool scans a website and identifies broken links. What two types of links does it flag?

User Interface

To make the tool user-friendly, it includes a simple _____ so users can easily run scans and view results without needing to interact with code.

Exporting Results

After a scan finishes, the results are automatically exported into a clean _____ file, which helps in organizing scans when checking multiple sites over time.

Cursor AI's Role

The article explains that Cursor AI is used to generate the _____ script, build the GUI, and implement the export functionality.

Standalone Application

The Python script can be converted into a standalone _____ application, allowing it to run on any Windows machine without needing Python installed.

Future Enhancements

The article suggests several ways to improve the tool. Name one potential enhancement for future development.

Time to Build

According to the article, approximately how long does it take to build a working broken link checker with Cursor AI?
