Build Your Own Keyword Density Checker with Python & AI

Create an AI-powered tool to analyze keyword usage on any website.

Based on Build Your Own Keyword Density Checker With Python Ai No Coding Experience Required by Casey Builds It

---

Understand the Tool

- Learn how to scan competitor websites for keyword frequency.
- Discover how the tool exports results to a CSV file.
- Identify content gaps and optimization opportunities.

AI-Assisted Build Process

- Use Cursor AI to generate Python code from prompts.
- Build a website crawler for keyword counting.
- Export keyword counts and URLs to a CSV.

Enhance Functionality

- Implement options for max pages to scan.
- Add whole-word matching functionality.
- Dynamically name exported files with domain and timestamp.

Package and Deploy

- Package the Python script into a standalone .exe file.
- Enable running the tool without a Python installation.

Key Skills Gained

- AI-powered coding with plain-English prompts.
- Web scraping for SEO and content analysis.
- Building a simple GUI for user interaction.
- Packaging Python scripts for distribution.

Who This Is For

- SEO professionals.
- Content marketers.
- Anyone automating research tasks.
