

Build Your Own Broken Link Checker with Cursor AI

Create a free, no-code broken link checker tool in minutes.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Why Build Your Own Tool?

Instead of paid crawlers, this article suggests building your own broken link checker to save money and avoid a steep learning curve. This is especially useful for SEO professionals, freelancers, or anyone managing multiple websites. What is the primary benefit of building your own tool mentioned in the article?

Tool Functionality

The broken link checker tool built in this article scans a website and identifies broken links. What two types of links does the tool flag as broken?

User Interface

To make the tool user-friendly, it includes a simple GUI. What is the advantage of having a GUI for this tool?

Exporting Results

After a scan is completed, the results are automatically exported. What file format is used for the export, and how are the files named to ensure organization?

Cursor AI's Role

The article highlights the use of Cursor AI in this build. What is the estimated time it takes to create a working broken link checker using Cursor AI?

Standalone Application

The Python script generated can be converted into a standalone application. What type of file is created, and what is the benefit of this conversion for users who don't have Python installed?

Future Enhancements

The article suggests several ways to improve the broken link checker. Name two potential enhancements for the tool.

Part of a Toolkit

This broken link checker is presented as one component of a larger project. What is the overall goal of the series this build is part of?
