

# DIY Mod Safety Checklist Generator

Create tailored safety checklists, disclaimers, and B-roll suggestions for your DIY projects.

Based on [I Built A Free Diy Mod Safety Checklist Generator Using Cursor Ai No Coding Needed](#) by Casey Builds It

---

## 1. Project Definition

*Provide details about your specific DIY mod project.*

- Identify the project title.
- Specify the target skill level (e.g., beginner, intermediate, advanced).
- List the primary tools you will be using.
- Define the intended audience for your video.
- Describe the core task or modification being performed.

## 2. Safety Checklist Generation

*Ensure all necessary safety precautions are covered.*

- Review Personal Protective Equipment (PPE) recommendations.
- Check for fire safety considerations.
- Verify step-by-step safety tips are included.
- Confirm checks for specific component safety (e.g., GPU clearance).
- Include first boot safety checks if applicable.
- Add any other project-specific safety warnings.

## 3. Disclaimer Text

*Generate appropriate legal and informational disclaimers.*

- Review the generated disclaimer for accuracy.
- Ensure the disclaimer addresses potential risks.
- Confirm the disclaimer protects both you and your audience.
- Verify the disclaimer is tailored to the project's complexity.

## 4. B-roll Shot Planning

*Identify essential shots to capture during filming.*

- List suggested B-roll shots for project overview.
- Include shots for specific tool usage.
- Identify B-roll for key build steps.
- Suggest shots for cable management and routing.
- Plan for shots demonstrating final assembly.
- Consider shots for the first boot or testing phase.

## 5. Tool Usage & Adaptation

*Understand how to use and adapt the generator.*

- Input project details into the generator.
- Review the generated safety checklist.
- Review the generated disclaimer text.
- Review the generated B-roll shot list.
- Adapt prompts for different DIY niches (e.g., woodworking, electronics).
- Consider customizing prompts for specific project types.

## 6. Workflow Integration

*Incorporate the checklist generator into your content creation process.*

- Use the generator before starting a new project.
- Capture B-roll based on the generated list.
- Include the generated disclaimer in your video description.
- Add the generated safety checklist to your video.
- Ensure consistency in safety information across videos.
- Save time on pre-production tasks.

## 7. Future Enhancements

*Explore potential improvements and next steps for the tool.*

- Investigate connecting to an AI endpoint for further automation.
- Consider generating full video descriptions.
- Evaluate adding support for other content types.
- Explore integrating with video editing software.
- Think about creating a user interface for easier access.
