

Casey Builds It: Broken Link Checker FAQ

Build your own free broken link checker tool with Cursor AI.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Q: What is this article about?

A: This article explains how to use Cursor AI to build a free, working broken link checker tool without any coding experience. It's designed to be a lightweight alternative to paid tools like Screaming Frog.

Q: How long does it take to build this tool?

A: You can build a working broken link checker with Cursor AI in approximately 10 minutes.

Q: What kind of links does the tool check?

A: The tool scans both internal and external links on any website to identify broken ones.

Q: Do I need to know how to code to build this?

A: No, the article specifically states that no coding experience is needed. Cursor AI generates the Python script for you.

Q: What happens to the scan results?

A: Once a scan finishes, the results automatically export into a clean CSV file. This file is named with the site's domain and a timestamp for easy organization.

Q: Is the tool difficult to use?

A: The tool comes with a simple GUI (Graphical User Interface), making it easy to run scans and view results without needing to interact with code.

Q: Can I use this tool on any computer?

A: Yes, the Python script can be converted into a standalone EXE application. This means it can run on any Windows machine without requiring Python to be installed.

Q: Why would I build my own broken link checker instead of using a paid tool?

A: Building your own tool is a cost-effective alternative to paid subscriptions like Screaming Frog. It's ideal for SEO professionals, freelancers, or anyone wanting to save money and build a custom toolkit.

Q: Is this a standalone tool, or part of something bigger?

A: This broken link checker is one piece of a larger, free SEO toolkit being built from scratch in an ongoing series. Previous tools include a sitemap extractor and a keyword density tracker.

Q: What are some ways to improve this tool in the future?

A: Future improvements could include scheduling automated scans, using a JSON config file for multiple client sites, and integrating it further into a larger custom SEO tool stack.

Q: Who is this tool useful for?

A: This tool is useful for SEO professionals, freelancers managing multiple client sites, or anyone who wants a free, custom solution for checking broken links.

Q: What are the benefits of fixing broken links?

A: Broken links can negatively impact your website's SEO and user experience. Catching them with a checker helps maintain a healthy website.
