

Casey Builds It Schema Validator FAQ

Answers to common questions about the free schema validator tool.

Based on [Free Schema Validator Tool Built With Cursor Ai Find Seo Schema Errors Fast](#) by Casey Builds It

Q: What is the Casey Builds It Schema Validator Tool?

A: It's a Python-based GUI tool designed to automate schema auditing across websites. It helps find and flag common structured data errors that can impact SEO.

Q: What problems does this tool solve?

A: It addresses the tedious nature of checking schema markup manually across many pages. It provides a fast, free way to scan an entire site, unlike most tools that require subscriptions or only check one page at a time.

Q: How does the tool work?

A: The tool fetches a page's HTML, parses it for structured data (JSON-LD scripts or microdata), and then runs it through custom validation rules to catch common SEO-damaging issues.

Q: Can I check just one page with this tool?

A: Yes, you can drop in a single URL to check the schema on one specific page.

Q: Can I check an entire website?

A: Yes, you can feed the tool an entire sitemap to scrape and validate every page on your site at once.

Q: Does the tool only look for JSON-LD?

A: No, the tool fetches and parses HTML to extract both JSON-LD scripts and inline microdata.

Q: What kind of schema errors does it flag?

A: It flags critical schema issues using handwritten validation rules designed to catch problems that actually hurt SEO, such as missing required fields and malformed types.

Q: Can I verify the findings with Google?

A: Yes, flagged pages can be sent directly to Google Rich Results for a live, side-by-side test, so you aren't solely relying on local validation.

Q: Can I check specific sections of a site?

A: Yes, you can run the tool against a custom list of URLs, which is useful for spot-checking specific templates or page types without scanning the entire domain.

Q: Can I save the results?

A: Yes, the results can be exported, allowing you to reference past findings, track fixes over time, or hand off reports to clients or teammates.

Q: Is this tool free to use?

A: Yes, the tool is free to use and does not require a monthly SaaS subscription.

Q: Who is this tool built for?

A: It's built for SEOs, developers, and agencies who manage multiple sites and need an efficient way to audit structured data.

Q: What are the key benefits of using this tool?

A: It automates schema audits, extracts both JSON-LD and microdata, uses custom rules for real SEO issues, links to Google Rich Results, and exports results, all without a monthly fee.
