

Free Schema Validator Tool Workbook

Learn how to audit your website's schema markup efficiently.

Based on [Free Schema Validator Tool Built With Cursor Ai Find Seo Schema Errors Fast](#) by Casey Builds It

The Problem with Schema Auditing

Before building the tool, the author found checking schema markup across a site to be a tedious process. What were the two manual methods mentioned?

Tool's Core Functionality

Instead of checking pages one by one, the tool automates schema auditing. What are the three input options for scanning schema?

Data Extraction

The tool fetches and parses HTML to extract structured data. What two formats of structured data does it look for?

Validation Method

The tool flags critical schema issues using its own rules. What does it NOT use for validation?

Live Testing Integration

After local validation, flagged pages can be sent to another tool for live testing. What is this tool called?

Result Management

What are two benefits of being able to export the results from the tool?

Target Audience

Who is this tool particularly useful for, according to the article?
