

Build Your Own Broken Link Checker with Cursor AI

Create a free, no-code broken link checker tool in minutes.

Based on [Build A Free Broken Link Checker Tool With Cursor Ai No Coding Experience Needed](#) by Casey Builds It

Why Build Your Own Tool?

Instead of paid tools like Screaming Frog, building your own offers a cost-effective and customizable alternative, especially for SEO professionals or freelancers managing multiple sites. This build is part of a series to create a free, custom SEO toolkit. What are two benefits of building your own tool mentioned in the article?

Tool Functionality

The broken link checker tool is designed to scan a website and identify issues. What two types of links does the tool flag as broken?

User Interface and Output

The tool provides a user-friendly experience and organized results. Describe the two main features that make the tool easy to use and manage.

The Build Process

The article explains how to create the tool using Cursor AI. What is the approximate time it takes to build a working broken link checker?

Exporting Results

To keep scan results organized, the tool automatically exports them. What file format are the results exported to, and what information is included in the filename?

Standalone Application

The Python script can be transformed into a more accessible format. What type of standalone application can the script be converted into, and what is the advantage of this conversion?

Future Enhancements

The article suggests several ways to improve the broken link checker. List two potential enhancements for the tool.
