TERMITE
RESISTANCE

Action TESA HDHMR is a registered trade mark of Balaji Action Buildwell Pvt. Ltd. It has many characteristics which make it apparently the first choice of consumers and influencers. HDHMR characteristics include High Density, High Moisture Resistance, Borer Resistance, Termite Resistance and a ready to use smooth surface.

HDHMR is manufactured using hard wood and its density is over 850 kg/m³, it has a uniform density gradient & a compact core which gives it the best routing characteristics. This is achieved by using special German Technology for MAT formation & 8 cylinders, 18 daylight press-the 1st in India.

Action TESA HDHMR is tougher than any available plywood in the market and it is moisture resistant too, which makes it an ideal board in extreme moist climatic conditions.

Action TESA actually revolutionized the interior infrastructure industry by extending fore stated inherent properties at a very nominal cost, thus replacing plywood rapidly across PAN India. Excellent performance of these boards has succeeded in overcoming the traditional myth regarding plywood pertaining to toughness & longevity. It is needless to mention that Action TESA HDHMR is real value for money & certainly a better option.

Available in Thickness: 3mm, 5.5mm, 8mm, 12mm, 16, 16.75, 18mm (Plain & Prelam)

Size: 8 x 4ft, 10 X 4ft (More than 130 shades in European Paper)

The Key Application Areas Of HDHMR: •Cafeteria •Gyms •Desk & Lockers • Hospital
•Kitchen Shutters •Furniture where risk of moisture exist• Door Shutters •Packing Industry •Partitions etc.
