DESIGN YOUR DESIRES

PVC LAMINATES

PVC LAMINATES

OUR STORY

Giving Your Spaces an Artistic Transformation

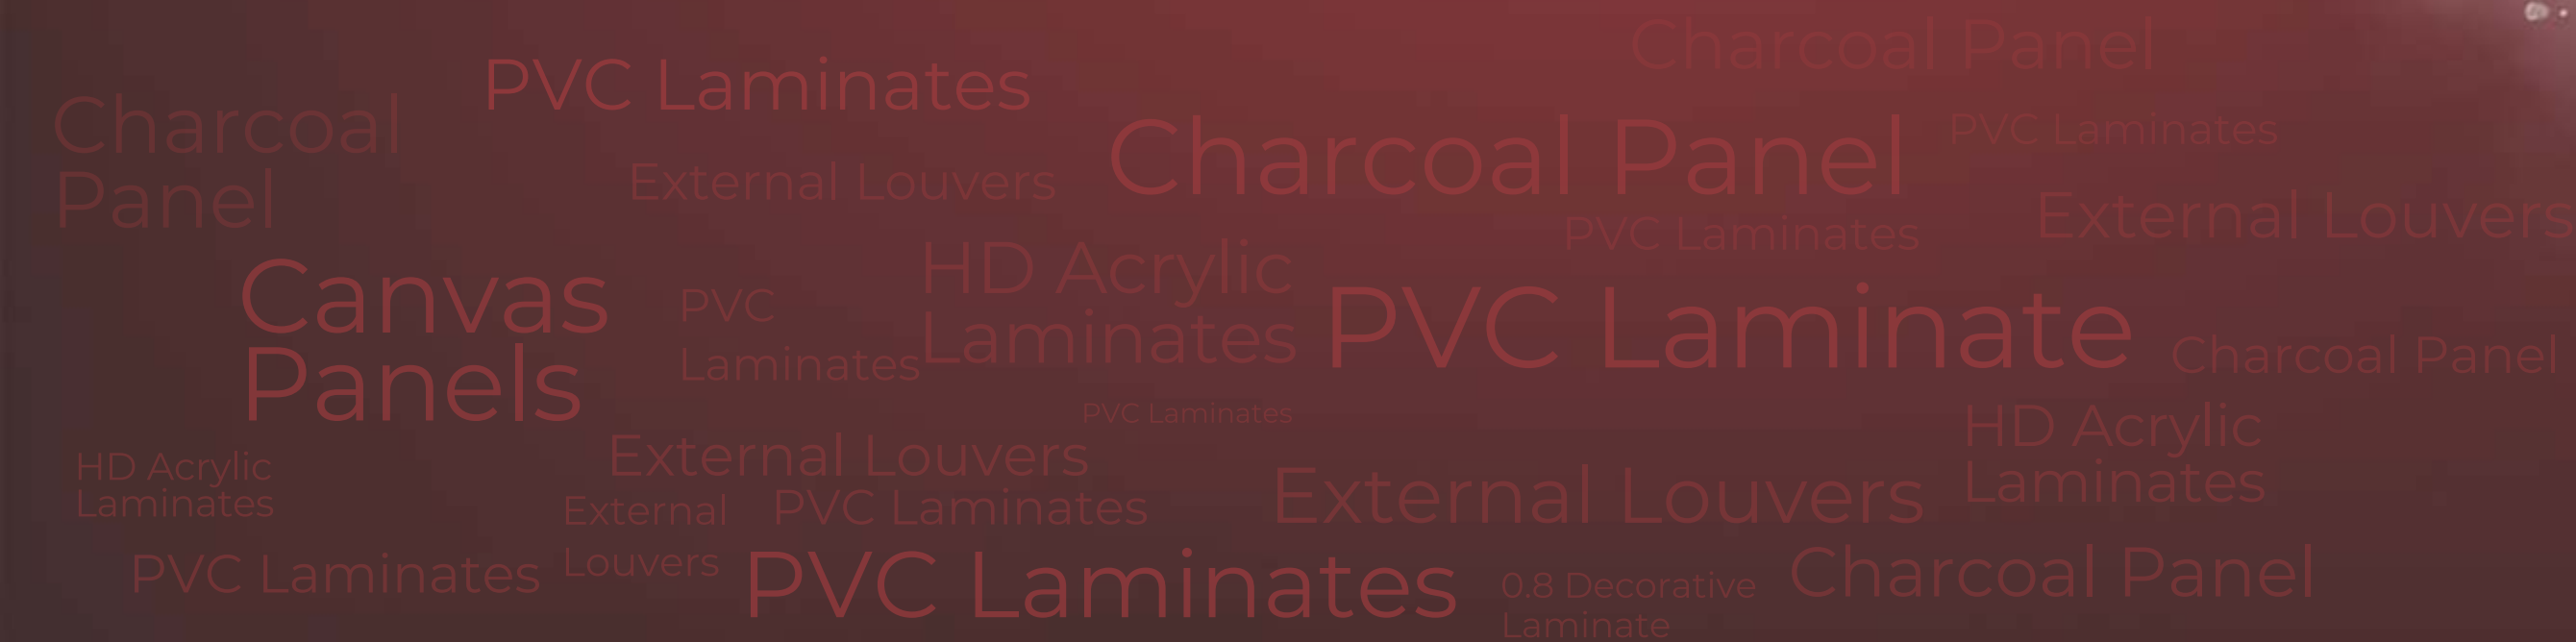

Established in 1984 by Mr. Vinod Goel, the TCS Group embarked on its journey as a plywood trading venture nestled within the Delhi NCR region. Today, operating under the esteemed umbrella of Trend PVC, a distinguished member of the TCS conglomerate, we have transcended into a preeminent brand celebrated for its ingenuity. Trend PVC stands as a beacon of architectural advancement, acclaimed nationwide for our unparalleled quality external louvers, PVC laminates, HD Acrylic Laminates, and charcoal panels.

Central to Trend's ethos lies an unwavering commitment to product development, seamlessly bringing together cutting-edge production technologies with pragmatic solutions tailored for architectural and industrial applications. Our fervor for crafting innovative, aesthetically captivating, and high-performance products is underpinned by a profound comprehension of market dynamics, challenges, and aspirations.

AVISION
Brought to life

“From our hands to your home; transforming the essence of spaces with passion and precision.”

During the founding years of Trend, the vision was clear: to enrich spaces with the beauty and durability of our exquisitely designed laminates. Every piece we create is a testament to our commitment to excellence. We believe that every individual deserves to live in a space that inspires, comforts, and reflects their unique identity, and to deliver that, we meticulously craft innovative designs and relentlessly pursue top-notch quality. Our products are more than just materials; they are the canvas upon which life's precious moments unfold. It is our firm belief that by decorating the world with our laminates, we are not just enhancing spaces; we are enriching lives, fostering creativity, and building legacies. This is our mission, our promise, and our contribution to a more beautiful world.

Technical Specification

THICKNESS : 1.2mm (±5%)

STANDARD SHEET SIZE : 8'x4' (±2%)

RANGE : These laminates come in a wide range of designs & colours.

ADHESIVE : These laminates are easy to apply with the standard laminating system, including most of the conventional adhesives normally used with plastic laminates such as many water based. We do not recommend the use of heat activated adhesives.

LAMINATION : Proper substrates must be used and careful bonding procedures must be observed. Substrates should be of good quality plywood, high density particle board, or high quality board. The face of the substrate must be smooth and free of grease, wax, dust, chips and other foreign matter.

CUTTING & INSTALLATION : These flexible PVC Laminate Sheets can be cut, routed and drilled, with standard wood working tools or equipments (**TREND** recommends use of only diamond cutter blade to cut the sheet). All blades must be sharp to remove any burrs that may occur in the cutting process. We recommend the use of a smooth file to feather all corner edges. **In case of using of hand cutters, The company is not liable for any complaints of de-lamination and other complaints.**

BENDING AND FORMING : For bending the laminate sheets make use of 4"X8mmX6 Tee **TREND** Radius U-Groove Blade. The groove should be of depth 0.6mm to 0.8mm & width 5mm or more. The router sheet will easily bend upto 90 degree.

MAINTENANCE : Any cleaning agent containing acids, alkalis or abrasive should not be used to clean the laminate, exposure to sunlight should be avoided.

NOTE : **TREND** warrants that all its products are free from manufacturing defects and perfectly ideal for use in normal conditions. In case of any claim, the liability of the company is only limited to the cost of the product only. **TREND** is not liable for the color variations from batch to batch production. The sample swatches here only represent the designs, colors and finishes. They do not represent actual thickness.

Kindly remove the protective film after 7 days of installation of PVC Laminates.
