

COLLECTED WORKS OF JOHN STUART MILL

VOLUME II

The Collected Edition of the works of John Stuart Mill was planned and directed by an editorial committee appointed from the Faculty of Arts and Science of the University of Toronto, and from the University of Toronto Press. The primary aim of the edition is to present fully collated texts of those works which exist in a number of versions, both printed and manuscript, and to provide accurate texts of works previously unpublished or which had become relatively inaccessible.

Editorial Committee

F. E. L. PRIESTLY, *General Editor*

J. M. ROBSON, *Associate Editor*

V. W. BLADEN, ALEXANDER BRADY, J. B. CONACHER

R. F. McRAE, A. S. P. WOODHOUSE

MARSH JEANNERET, FRANCES HALPENNY

Principles of Political Economy

*with Some of Their Applications
to Social Philosophy*

by JOHN STUART MILL

BOOKS I–II

Introduction by

V. W. BLADEN

Dean of Arts and Professor of Political Economy,
University of Toronto

Textual Editor

J. M. ROBSON

Associate Professor of English,
Victoria College, University of Toronto

Liberty Fund
Indianapolis

This book is published by Liberty Fund, Inc., a foundation established to encourage study of the ideal of a society of free and responsible individuals.

The cuneiform inscription that serves as our logo and as the design motif for our endpapers is the earliest-known written appearance of the word “freedom” (*amagi*), or “liberty.” It is taken from a clay document written about 2300 B.C. in the Sumerian city-state of Lagash.

This Liberty Fund paperback edition of 2006 is a reprint from the original edition published by The University of Toronto Press in 1965.

VOLUME 2

Introduction, by V. W. Bladen	xxiii
Textual Introduction, by J. M. Robson	lxv
PREFACES	lxxxix
PRELIMINARY REMARKS	3

BOOK I: PRODUCTION¹

CHAPTER I. Of the Requisites of Production	25
§ 1. Requisites of production, what, 25	
2. The function of labour defined, 26	
3. Does nature contribute more to the efficacy of labour in some occupations than in others? 28	
4. Some natural agents limited, others practically unlimited, in quantity, 29	
CHAPTER II. Of Labour as an Agent of Production	31
§ 1. Labour employed either directly about the thing produced, or in operations preparatory to its production, 31	
2. Labour employed in producing subsistence for subsequent labour, 33	
3. Labour employed in producing materials, 35	
4. Labour employed in producing implements, 36	
5. Labour employed in the protection of labour, 37	
6. Labour employed in the transport and distribution of the produce, 38	
7. Labour which relates to human beings, 40	
8. Labour of invention and discovery, 41	
9. Labour agricultural, manufacturing, and commercial, 43	
CHAPTER III. Of Unproductive Labour	45
§ 1. Labour does not produce objects, but utilities, 45	
2. These utilities are of three kinds, 46	
3. Productive labour is that which produces utilities fixed and embodied in material objects, 48	

¹In this Table of Contents the only variants indicated are those involving major alterations in sections.

4. All other labour, however useful, is classed as unproductive, 50	
5. Productive and Unproductive Consumption, 52	
6. Labour for the supply of Productive Consumption, and labour for the supply of Unproductive Consumption, 53	
CHAPTER IV. Of Capital	55
§ 1. Capital is wealth appropriated to reproductive employment, 55	
2. More capital devoted to production than actually employed in it, 57	
3. Examination of some cases illustrative of the idea of Capital, 59	
CHAPTER V. Fundamental Propositions Respecting Capital	63
§ 1. Industry is limited by Capital, 63	
2. Industry is limited by Capital, but does not always come up to that limit, 65	
3. Increase of capital gives increased employment to labour, without assignable bounds, 66	
4. Capital is the result of saving, 68	
5. All capital is consumed, 70	
6. Capital is kept up, not by preservation, but by perpetual reproduction, 73	
7. Why countries recover rapidly from a state of devastation, 74	
8. Effects of defraying government expenditure by loans, 75	
9. Demand for commodities is not demand for labour, 78	
10. Fallacy respecting Taxation, 88	
CHAPTER VI. On Circulating and Fixed Capital	91
§ 1. Fixed and Circulating Capital, what, 91	
2. Increase of fixed capital, when at the expense of circulating, might be detrimental to the labourers, 93	
3. But this detriment to the labourers seldom if ever occurs, 97	
CHAPTER VII. On What Depends the Degree of Productiveness of Productive Agents	100
§ 1. Land, labour, and capital, are of different productiveness at different times and places, 100	
2. Causes of superior productiveness. Natural advantages, 101	
3. Causes of superior productiveness. Greater energy of labour, 102	
4. Causes of superior productiveness. Superior skill and knowledge, 106	
5. Causes of superior productiveness. Superiority of intelligence and trustworthiness in the community generally, 107	
6. Causes of superior productiveness. Superior security, 112	
CHAPTER VIII. Of Co-operation, or the Combination of Labour	116
§ 1. Combination of Labour a principal cause of superior productiveness, 116	
2. Effects of separation of employments analyzed, 118	
3. Combination of labour between town and country, 120	
4. The higher degrees of the division of labour, 122	

5. Analysis of the advantages of the division of labour, 124	
6. Limitations of the division of labour, 129	
CHAPTER IX. Of Production on a Large, and Production on a Small Scale	131
§ 1. Advantages of the large system of production in manufactures, 131	
2. Advantages and disadvantages of the joint-stock principle, 135	
3. Conditions necessary for the large system of production, 140	
4. Large and small farming compared, 142	
CHAPTER X. Of the Law of the Increase of Labour	153
§ 1. The law of the increase of production depends on those of three elements, Labour, Capital, and Land, 153	
2. The Law of Population, 154	
3. By what checks the increase of population is practically limited, 156	
CHAPTER XI. Of the Law of the Increase of Capital	160
§ 1. Means and motives to saving, on what dependent, 160	
2. Causes of diversity in the effective strength of the desire of accumulation, 161	
3. Examples of deficiency in the strength of the desire of accumulation, 164	
4. Exemplification of excess in the strength of the desire of accumulation, 170	
CHAPTER XII. Of the Law of the Increase of Production from Land	173
§ 1. The limited quantity and limited productiveness of land are the real limits to production, 173	
2. The law of production from the soil is a law of diminishing return in proportion to the increased application of labour and capital, 173	
3. Antagonist principle to the law of diminishing return; the progress of improvements in production, 177	
CHAPTER XIII. Consequences of the Foregoing Laws	186
§ 1. Remedies when the limit to production is the weakness of the principle of accumulation, 186	
2. Necessity of restraining population not confined to a state of inequality of property, 187	
3. Necessity of restraining population not superseded by free trade in food, 190	
4. Necessity of restraining population not in general superseded by emigration, 194	

BOOK II: DISTRIBUTION

CHAPTER I. Of Property	199
§ 1. Introductory remarks, 199	
2. Statement of the question concerning Property, 201	

3. Examination of Communism, 203	
4. ^a Examination of St. Simonism ^b and Fourierism ^b , 210	
CHAPTER II. The Same Subject Continued	215
§ 1. The institution of property implies freedom of acquisition by contract, 215	
2. The institution of property implies the validity of prescription, 217	
3. The institution of property implies the power of bequest, but not the right of inheritance. Question of inheritance examined, 218	
4. Should the right of bequest be limited, and how? 223	
5. Grounds of property in land are different from those of property in moveables, 226	
6. Grounds of property in land are only valid on certain conditions, which are not always realized. The limitations considered, 228	
7. Rights of property in abuses, 232	
CHAPTER III. Of the Classes Among Whom the Produce Is Distributed	235
§ 1. The produce is sometimes shared among three classes, 235	
2. The produce sometimes belongs undividedly to one, 235	
3. The produce is sometimes divided between two, 237	
CHAPTER IV. Of Competition, and Custom	239
§ 1. Competition is not the sole regulator of the division of the produce, 239	
2. Influence of custom on rents, and on the tenure of land, 240	
3. Influence of custom on prices, 242	
CHAPTER V. Of Slavery	245
§ 1. Slavery considered in relation to the slaves, 245	
2. Slavery in relation to production, 246	
3. Emancipation considered in relation to the interest of the slave-owners, 249	
CHAPTER VI. Of Peasant Proprietors	252
§ 1. Difference between English and Continental opinions respecting peasant properties, 252	
2. Evidence respecting peasant properties in Switzerland, 254	
3. Evidence respecting peasant properties in Norway, 259	
4. Evidence respecting peasant properties in Germany, 262	
5. Evidence respecting peasant properties in Belgium, 267	
^c 6. Evidence respecting peasant properties in the Channel Islands ^c , 271	
^a 7. ^d Evidence respecting peasant properties in France, 273	

^a48 [in addition] § 5. The institution of property requires, not subversion, but improvement] 49 [in addition] § 5. Examination of Fourierism § 6. [as § 5. in 48]

^{b-b}+52, 57, 62, 65, 71

^{c-c}+49, 52, 57, 62, 65, 71

^{d-d}48 § 6.

CHAPTER VII. Continuation of the Same Subject	278
§ 1. Influence of peasant properties in stimulating industry, 278	
2. Influence of peasant properties in training intelligence, 280	
3. Influence of peasant properties in promoting forethought and self-control, 281	
4. Their effect on population, 283	
5. Their effect on the subdivision of land, 292	
CHAPTER VIII. Of Metayers	297
§ 1. Nature of the metayer system, and its varieties, 297	
2. Its advantages and inconveniences, 299	
3. Evidence concerning its effects in different countries, 301	
4. Is its abolition desirable? 310	
CHAPTER IX. Of Cottiers	313
§ 1. Nature and operation of cottier tenure, 313	
2. In an overpeopled country its necessary consequence is nominal rents, 316	
3. Nominal rents are inconsistent with industry, frugality, or restraint on population, 318	
4. Ryot tenancy of India, 319	
CHAPTER X. Means of Abolishing Cottier Tenancy	324
^e § 1. Irish cottiers should be converted into peasant proprietors, 324	
2. Present state of this question ^e , 331	
CHAPTER XI. Of Wages	337
§ 1. Wages depend on the demand and supply of labour—in other words, on population and capital, 337	
2. Examination of some popular opinions respecting wages, 338	
3. Certain rare circumstances excepted, high wages imply restraints on population, 343	
4. Restraints on population are in some cases legal, 346	
5. Restraints on population are in other cases the effect of particular customs, 348	
6. Due restriction of population the only safeguard of a labouring class, 351	
CHAPTER XII. Of Popular Remedies for Low Wages	355
§ 1. A legal or customary minimum of wages, with a guarantee of employment, 355	
2. Such a minimum and guarantee would require as a condition legal measures for repression of population, 357	
<p>^{e-48}, 49 § 1. Mode of disposing of a cottier population, the vital question for Ireland § 2. To convert them into hired labourers not desirable nor practicable § 3. Limitation of rent, by law or custom, indispensable § 4. Fixity of Tenure considered § 5. Tenant Right § 6. Location of peasant proprietors on the waste lands § 7. Resources supplementary to the waste lands § 8. Probable consequences of the measures recommended] 52, 57 § 1. [<i>as</i> 48] § 2. Means of effecting this object § 3. [<i>as</i> § 8. <i>in</i> 48, 49]] 62 § 1. [<i>as</i> 48] § 2. Inapplicability of this advice to present circumstances</p>	

3. Allowances in aid of wages, 360	
4. The Allotment System, 362	
CHAPTER XIII. The Remedies for Low Wages Further Considered	367
§ 1. Pernicious direction of public opinion on the subject of population, 367	
2. Grounds for expecting improvement, 370	
3. Twofold means of elevating the habits of the labouring people: by education, 374	
4. Twofold means of elevating the habits of the labouring people: by large measures of immediate relief, through foreign and home colonization, 376	
CHAPTER XIV. Of the Differences of Wages in Different Employments	380
§ 1. Differences of wages arising from different degrees of attractiveness in different employments, 380	
2. Differences of wages arising from natural monopolies, 385	
3. Effect on wages of a class of subsidized competitors, 388	
4. Effect on wages of the competition of persons with independent means of support, 391	
5. Wages of women, why lower than those of men, 394	
6. Differences of wages arising from restrictive laws, and from combinations, 396	
7. Cases in which wages are fixed by custom, 398	
CHAPTER XV. Of Profits	400
§ 1. Profits resolvable into three parts; interest, insurance, and wages of superintendence, 400	
2. The minimum of profits; and the variations to which it is liable, 402	
3. Differences of profits arising from the nature of the particular employment, 403	
4. General tendency of profits to an equality, 405	
^f 5. Profits do not depend on prices, nor on purchase and sale, 410	
^g 6. ^g The advances of the capitalist consist ultimately in wages of labour, 411	
^h 7. ^h The rate of profit depends on the Cost of Labour, 413	
CHAPTER XVI. Of Rent	416
§ 1. Rent is the effect of a natural monopoly, 416	
2. No land can pay rent except land of such quality or situation, as exists in less quantity than the demand, 417	
3. The rent of land consists of the excess of its return above the return to the worst land in cultivation, 419	
4. The rent of land consists of the excess of its return above the return to the worst land in cultivation or to the capital employed in the least advantageous circumstances, 420	
5. Is payment for capital sunk in the soil, rent, or profit? 423	
6. Rent does not enter into the cost of production of agricultural produce, 428	
^{f-f} +57, 62, 65, 71	^{g-g} 48, 49, 52 § 5.
	^{h-h} 48, 49, 52 § 6.

APPENDIX [TO BOOK II]

431

Substance of three articles in the *Morning Chronicle* of 11th, 13th, and 16th January, 1847, in reply to MM. Mounier and Rubichon and to the *Quarterly Review*, on the Sub-division of Landed Property in France, 434

VOLUME 3

BOOK III: EXCHANGE

CHAPTER I. Of Value

455

- § 1. Preliminary remarks, 455
- 2. Definitions of Value in Use, Exchange Value, and Price, 456
- 3. What is meant by general purchasing power, 457
- 4. Value a relative term. A general rise or fall of values is a contradiction, 458
- 5. How the laws of Value are modified in their application to retail transactions, 460

CHAPTER II. Of Demand and Supply, in Their Relation to Value

462

- § 1. Two conditions of Value: Utility, and Difficulty of Attainment, 462
- 2. Three kinds of Difficulty of Attainment, 464
- 3. Commodities which are absolutely limited in quantity, 465
- 4. The Equation of Demand and Supply is the law of their value, 466
- 5. Miscellaneous cases falling under this law, 468

CHAPTER III. Of Cost of Production, in Its Relation to Value

471

- §1. Commodities which are susceptible of indefinite multiplication without increase of cost. Law of their Value, Cost of Production, 471
- 2. Law of their Value, Cost of Production operating through potential, but not actual, alterations of supply, 473

CHAPTER IV. Ultimate Analysis of Cost of Production

477

- § 1. Principal element in Cost of Production—Quantity of Labour, 477
- 2. Wages not an element in Cost of Production, 479
- 3. Wages not an element in Cost of Production except in so far as they vary from employment to employment, 480
- 4. Profits an element in Cost of Production, in so far as they vary from employment to employment, 481
- 5. Profits an element in Cost of Production, in so far as they are spread over unequal lengths of time, 482
- 6. Occasional elements in Cost of Production: taxes, and scarcity value of materials, 485

CHAPTER V. Of Rent, in Its Relation to Value	488
§ 1. Commodities which are susceptible of indefinite multiplication, but not without increase of cost. Law of their Value is Cost of Production in the most unfavourable existing circumstances, 488	
2. Such commodities, when produced in circumstances more favourable, yield a rent equal to the difference of cost, 490	
3. Rent of mines and fisheries, and ground-rent of buildings, 492	
4. Cases of extra profit analogous to rent, 494	
CHAPTER VI. Summary of the Theory of Value	497
§ 1. The theory of Value recapitulated in a series of propositions, 497	
2. How the theory of Value is modified by the case of labourers cultivating for subsistence, 499	
3. How the theory of Value is modified by the case of slave labour, 500	
CHAPTER VII. Of Money	502
§ 1. Purposes of a Circulating Medium, 502	
2. Why Gold and Silver are fitted for the purposes of a Circulating Medium, 503	
3. Money is a mere contrivance for facilitating exchanges, which does not affect the laws of Value, 505	
CHAPTER VIII. Of the Value of Money, as Dependent on Demand and Supply	508
§ 1. The value of money is an ambiguous expression, 508	
2. The value of money depends, <i>cæteris paribus</i> , on its quantity, 509	
3. The value of money depends also on the rapidity of circulation, 512	
4. Explanations and limitations of this principle, 514	
CHAPTER IX. Of the Value of Money, as Dependent on Cost of Production	517
§ 1. The value of money, in a state of freedom, conforms to the value of the bullion contained in it, 517	
2. The value of bullion is determined by the cost of production, 519	
3. How this law is related to the principle laid down in the preceding chapter, 521	
CHAPTER X. Of a Double Standard, and Subsidiary Coins	524
§ 1. Objections to a double standard, 524	
2. How the use of the two metals as money is obtained without making both of them legal tender, 525	
CHAPTER XI. Of Credit, as a Substitute for Money	527
§ 1. Credit is not a creation but a transfer of the means of production, 527	

2. In what manner credit assists production, 528
3. Function of credit in economizing the use of money, 530
4. Bills of exchange, 531
5. Promissory notes, 535
6. Deposits and cheques, 536

CHAPTER XII. Influence of Credit on Prices 538

- § 1. The influence of bank notes, bills, and cheques, on price is a part of the influence of Credit, 538
2. Credit is a purchasing power similar to money, 539
3. Effects of great extensions and contractions of credit. Phenomena of a commercial crisis analyzed, 540
4. Bills are a more powerful instrument for acting on prices than book credits, and bank notes than bills, 544
5. The distinction between bills, book credits, and bank notes is of little practical importance, 546
6. Cheques are an instrument for acting on prices, equally powerful with bank notes, 550
- ⁱ7. Are bank notes money?ⁱ 552
- ^j8.^j There is no generic distinction between bank notes and other forms of credit, 553

CHAPTER XIII. Of an Inconvertible Paper Currency 556

- § 1. The value of an inconvertible paper, depending on its quantity, is a matter of arbitrary regulation, 556
2. If regulated by the price of bullion, an inconvertible currency might be safe, but not expedient, 558
3. Examination of the doctrine that an inconvertible currency is safe if representing actual property, 560
- ^l4.^l Examination of the doctrine that an increase of the currency promotes industry^k, 562
- ^m5.^m Depreciation of currency is a tax on the community, and a fraud on creditors, 565
- ⁿ6.ⁿ Examination of some pleas for committing this fraud, 566

CHAPTER XIV. Of Excess of Supply 570

- § 1. Can there be an oversupply of commodities generally? 570
2. The supply of commodities in general cannot exceed the power of purchase, 571
3. The supply of commodities in general never does exceed the inclination to consume, 572
4. Origin and explanation of the notion of general oversupply, 574

^l4+57, 62, 65, 71

^j48, 49, 52 § 7.

^k49, 52, 57 § 4. Examination of the doctrine that a convertible currency does not expand with the increase of wealth

^l49, 52, 57 § 5.

^m49, 52, 57 § 6.

ⁿ49, 52, 57 § 7.

CHAPTER XV. Of a Measure of Value	577
§ 1. In what sense a Measure of Exchange Value is possible, 577	
2. A Measure of Cost of Production, 578	
CHAPTER XVI. Of Some Peculiar Cases of Value	582
§ 1. Values of Commodities which have a joint cost of production, 582	
2. Values of the different kinds of agricultural produce, 584	
CHAPTER XVII. Of International Trade	587
§ 1. Cost of production is not the regulator of international values, 587	
2. Interchange of commodities between distant places is determined by differences not in their absolute, but in their comparative, cost of production, 589	
3. The direct benefits of commerce consist in increased efficiency of the productive powers of the world, 590	
4. The direct benefits of commerce do not consist in a vent for exports, or in the gains of merchants, 591	
5. Indirect benefits of commerce, economical and moral, are still greater than the direct, 593	
CHAPTER XVIII. Of International Values	595
§ 1. The values of imported commodities depend on the terms of international interchange, 595	
2. The terms of international interchange depend on the Equation of International Demand, 596	
3. Influence of cost of carriage on international values, 600	
4. The law of values which holds between two countries and two commodities, holds of any greater number, 601	
5. Effect of improvements in production on international values, 604	
^o 6. The preceding theory not complete, 607	
7. International values depend not solely on the quantities demanded, but also on the means of production available in each country for the supply of foreign markets, 609	
8. The practical result is little affected by this additional element ^o , 612	
^p 9. ^p On what circumstances the cost to a country of its imports depends, 615	
CHAPTER XIX. Of Money, Considered as an Imported Commodity	618
§ 1. Money imported in two modes; as a commodity, and as a medium of exchange, 618	
2. As a commodity, it obeys the same laws of value as other imported commodities, 619	
3. Its value does not depend exclusively on its cost of production at the mines, 621	

CHAPTER XX. Of the Foreign Exchanges	623
§ 1. Purposes for which money passes from country to country as a medium of exchange, 623	
2. Mode of adjusting international payments through the exchanges, 623	
3. Distinction between variations in the exchanges which are self-adjusting, and those which can only be rectified through prices, 627	
CHAPTER XXI. Of the Distribution of the Precious Metals Through the Commercial World	630
§ 1. The substitution of money for barter makes no difference in exports and imports, nor in the law of international values, 630	
2. The preceding theorem further illustrated, 633	
3. The precious metals, as money, are of the same value, and distribute themselves according to the same law, with the precious metals as a commodity, 636	
4. International payments of a non-commercial character, 637	
CHAPTER XXII. Influence of the Currency on the Exchanges and on Foreign Trade	639
§ 1. Variations in the exchange which originate in the currency, 639	
2. Effect of a sudden increase of a metallic currency, or of the sudden creation of bank notes or other substitutes for money, 640	
3. Effect of the increase of an inconvertible paper currency. Real and nominal exchange, 644	
CHAPTER XXIII. Of the Rate of Interest	647
§ 1. The rate of interest depends on the demand and supply of loans, 647	
2. Circumstances which determine the permanent demand and supply of loans, 648	
3. Circumstances which determine the fluctuations, 650	
4. The rate of interest ^a , how far, and in what sense connected with the value of money ^a , 653	
5. The rate of interest determines the price of land and of securities, 658	
CHAPTER XXIV. Of the Regulation of a Convertible Paper Currency	660
§ 1. Two contrary theories respecting the influence of bank issues, 660	
2. Examination of each theory, 662	
3. Reasons for thinking that the Currency Act of 1844 produces a part of the beneficial effect intended by it, 665	
4. But the Currency Act produces mischiefs more than equivalent, 670	
^a - <i>q</i> 48, 49, 52, 57, 62 not really connected with the value of money, but often confounded with it	

5. Should the issue of bank notes be confined to a single establishment? 682	
6. Should the holders of notes be protected in any peculiar manner against failure of payment? 684	
CHAPTER XXV. Of the Competition of Different Countries in the Same Market	686
§ 1. Causes which enable one country to undersell another, 686	
2. Low wages is one of the causes which enable one country to undersell another, 688	
3. Low wages is one of those causes when peculiar to certain branches of industry, 689	
4. Low wages is not one of those causes when common to all branches of industry, 691	
5. Some anomalous cases of trading communities examined, 693	
CHAPTER XXVI. Of Distribution, as Affected by Exchange	695
§ 1. Exchange and Money make no difference in the law of wages, 695	
2. Exchange and Money make no difference in the law of rent, 697	
3. Exchange and Money make no difference in the law of profits, 698	
BOOK IV: INFLUENCE OF THE PROGRESS OF SOCIETY ON PRODUCTION AND DISTRIBUTION	
CHAPTER I. General Characteristics of a Progressive State of Wealth	705
§ 1. Introductory remarks, 705	
2. Tendency of the progress of society towards increased command over the powers of nature; increased security; and increased capacity of co-operation, 706	
CHAPTER II. Influence of the Progress of Industry and Population on Values and Prices	710
§ 1. Tendency to a decline of the value and cost of production of all commodities, 710	
2. Tendency to a decline of the value and cost of production of all commodities except the products of agriculture and mining, which have a tendency to rise, 711	
3. That tendency from time to time is counteracted by improvements in production, 713	
4. Effect of the progress of society in moderating fluctuations of value, 714	
5. Examination of the influence of speculators, and in particular of corn-dealers, 715	
CHAPTER III. Influence of the Progress of Industry and Population, on Rents, Profits, and Wages	719
§ 1. First case; population increasing, capital stationary, 719	

2. Second case; capital increasing, population stationary, 722	
3. Third case; population and capital increasing equally, the arts of production stationary, 722	
4. Fourth case; the arts of production progressive, capital and population stationary, 723	
5. Fifth case; all the three elements progressive, 729	
CHAPTER IV. Of the Tendency of Profits to a Minimum	733
§ 1. Doctrine of Adam Smith on the competition of capital, 733	
2. Doctrine of Mr. Wakefield respecting the field of employment, 735	
3. What determines the minimum rate of profit, 736	
4. In opulent countries, profits are habitually near to the minimum, 738	
5. Profits are prevented from reaching the minimum by commercial revulsions, 741	
6. Profits are prevented from reaching the minimum by improvements in production, 742	
7. Profits are prevented from reaching the minimum by the importation of cheap necessities and instruments, 743	
8. Profits are prevented from reaching the minimum by the emigration of capital, 745	
CHAPTER V. Consequences of the Tendency of Profits to a Minimum	747
§ 1. Abstraction of capital is not necessarily a national loss, 747	
2. In opulent countries, the extension of machinery is not detrimental but beneficial to labourers, 749	
CHAPTER VI. Of the Stationary State	752
§ 1. Stationary state of wealth and population is dreaded and deprecated by writers, 752	
2. But the stationary state is not in itself undesirable, 753	
CHAPTER VII. On the Probable Futurity of the Labouring Classes	758
§ 1. The theory of dependence and protection is no longer applicable to the condition of modern society, 758	
2. The future well-being of the labouring classes is principally dependent on their own mental cultivation, 763	
3. Probable effects of improved intelligence in causing a better adjustment of population—Would be promoted by the social independence of women, 765	
4. Tendency of society towards the disuse of the relation of hiring and service, 766	
5. Examples of the association of 'labourers with capitalists', 769	
6. 'Examples of the association of labourers among themselves', 775	
7. Competition is not pernicious, but useful and indispensable, 794	
<i>r-r</i> 48, 49 the labourers in the profits of industrial undertakings	
<i>s-s</i> 48, 49 Probable future developement of this principle	
<i>t-t</i> + 52, 57, 62, 65, 71	

BOOK V: ON THE INFLUENCE OF GOVERNMENT	
CHAPTER I. Of the Functions of Government in General	799
§ 1. Necessary and optional functions of government distinguished,	799
2. Multifarious character of the necessary functions of govern-	
ment, 800	
3. Division of the subject, 804	
CHAPTER II. On the General Principles of Taxation	805
§ 1. Four fundamental rules of taxation, 805	
2. Grounds of the principle of Equality of Taxation, 806	
3. Should the same percentage be levied on all amounts of	
income? 808	
4. Should the same percentage be levied on perpetual and on	
terminable incomes? 813	
5. The increase of the rent of land from natural causes is a fit	
subject of peculiar taxation, 819	
6. A land tax, in some cases, is not taxation, but a rent-charge	
in favour of the public, 821	
7. Taxes falling on capital are not necessarily objectionable, 822	
CHAPTER III. Of Direct Taxes	825
§ 1. Direct taxes either on income or on expenditure, 825	
2. Taxes on rent, 825	
3. Taxes on profits, 826	
4. Taxes on wages, 828	
5. An Income Tax, 830	
6. A House Tax, 833	
CHAPTER IV. Of Taxes on Commodities	838
§ 1. A Tax on all Commodities would fall on profits, 838	
2. Taxes on particular commodities fall on the consumer, 839	
3. Peculiar effects of taxes on necessities, 840	
4. How the peculiar effects of taxes on necessities are modified	
by the tendency of profits to a minimum, 843	
5. Effects of discriminating duties, 847	
6. Effects produced on international exchange by duties on	
exports and on imports, 850	
CHAPTER V. Of Some Other Taxes	857
§ 1. Taxes on contracts, 857	
2. Taxes on communication, 860	
3. Law Taxes, 862	
4. Modes of taxation for local purposes, 862	
CHAPTER VI. Comparison Between Direct and Indirect Taxation	864
§ 1. Arguments for and against direct taxation, 864	
2. What forms of indirect taxation are most eligible, 868	
3. Practical rules for indirect taxation, 870	

CHAPTER VII. Of a National Debt	873
§ 1. Is it desirable to defray extraordinary public expenses by loans? 873	
2. Not desirable to redeem a national debt by a general contribution, 876	
3. In what cases it is desirable to maintain a surplus revenue for the redemption of debt, 878	
CHAPTER VIII. Of the Ordinary Functions of Government, Considered as to Their Economical Effects	880
§ 1. Effects of imperfect security of person and property, 880	
2. Effects of over-taxation, 882	
3. Effects of imperfection in the system of the laws, and in the administration of justice, 883	
CHAPTER IX. The Same Subject Continued	887
§ 1. Laws of Inheritance, 887	
2. Law and Custom of Primogeniture, 889	
3. Entails, 892	
4. Law of compulsory equal division of inheritances, 894	
5. Laws of Partnership, 895	
6. Partnerships with limited liability. Chartered Companies, 897	
7. Partnerships in <i>commandite</i> , 901	
8. Laws relating to Insolvency, 906	
CHAPTER X. Of Interferences of Government Grounded on Erroneous Theories	913
§ 1. Doctrine of Protection to Native Industry, 913	
2. Usury Laws, 922	
3. Attempts to regulate the prices of commodities, 926	
4. Monopolies, 927	
5. Laws against Combination of Workmen, 929	
6. Restraints on opinion or on its publication, 934	
CHAPTER XI. Of the Grounds and Limits of the <i>Laisser-Faire</i> or Non-Interference Principle	936
§ 1. Governmental intervention distinguished into authoritative and unauthoritative, 936	
2. Objections to government intervention—the compulsory character of the intervention itself, or of the levy of funds to support it, 937	
3. Objections to government intervention—increase of the power and influence of government, 939	
4. Objections to government intervention—increase of the occupations and responsibilities of government, 940	
5. Objections to government intervention—superior efficiency of private agency, owing to stronger interest in the work, 941	
6. Objections to government intervention—importance of cultivating habits of collective action in the people, 942	
7. <i>Laisser-faire</i> the general rule, 944	

8. Large exceptions to *laissez-faire*. Cases in which the consumer is an incompetent judge of the commodity. Education, 947
9. Case of persons exercising power over others. Protection of children and young persons; of the lower animals. Case of women not analogous, 950
10. Case of contracts in perpetuity, 953
11. Cases of delegated management, 954
12. Cases in which public intervention may be necessary to give effect to the wishes of the persons interested. Examples: hours of labour; disposal of colonial lands, 956
13. Case of acts done for the benefit of others than the persons concerned. Poor Laws, 960
14. Case of acts done for the benefit of others. Colonization, 962
15. Case of acts done for the benefit of others. Miscellaneous examples, 968
16. Government intervention may be necessary in default of private agency, in cases where private agency would be more suitable^u, 970

APPENDICES

APPENDIX A. Book II, Chapter i, "Of Property," §§ 3–6, 2nd edition (1849), collated with the 1st edition and the MS	975
APPENDIX B. Book II, Chapter x, "Means of Abolishing Cottier Tenancy," §§ 1–7, 2nd edition (1849), collated with the 1st edition and the MS	988
APPENDIX C. Book II, Chapter x, "Means of Abolishing Cottier Tenancy," § 3, 4th edition (1857), collated with the earlier editions and the MS	1003
APPENDIX D. Book IV, Chapter vii, "On the Probable Futurity of the Labouring Classes," §§ 5–6, 2nd edition (1849), collated with the 1st edition	1006
APPENDIX E. Appendix to Vol. II, 4th edition (1857)	1015
APPENDIX F. Account of the MS of the <i>Principles</i>	1021
APPENDIX G. John Stuart Mill—Harriet Taylor Mill correspondence concerning the <i>Principles</i>	1026
APPENDIX H. John Stuart Mill—John E. Cairnes correspondence and notes concerning the <i>Principles</i>	1038

^u57 [*in addition*] APPENDIX Latest Information on the French Industrial Associations [*see* Appendix E]
