Human Action

A Treatise on Economics

LUDWIG VON MISES

Edited by Bettina Bien Greaves

Volume 1

LIBERTY FUND *Indianapolis*

This book is published by Liberty Fund, Inc., a foundation established to encourage study of the ideal of a society of free and responsible individuals.

The cuneiform inscription that serves as our logo and as the design motif for our endpapers is the earliest-known written appearance of the word “freedom” (*amagi*), or “liberty.” It is taken from a clay document written about 2300 B.C. in the Sumerian city-state of Lagash.

EDITOR'S NOTE

This edition of Mises's *Human Action* is reproduced from the Foundation for Economic Education's 4th edition which was a reprint of the 3rd 1966 Henry Regnery edition. In this book Mises cited many foreign language works in footnotes. Whenever feasible, if English-language translations are available, the editor has referenced the pertinent pages in those English translations. Also when the meaning of foreign words and phrases are not readily apparent from the context, English translations of those foreign terms have been inserted, in brackets, immediately following.

For the benefit of scholars who have read, studied, and cited Mises's *Human Action* over many years, this Liberty Fund edition has been typeset, insofar as possible, to preserve the pagination of the 3rd (1966) and 4th (1996) editions, which were identical. As it was not always possible to keep the page divisions exactly the same, a careful scrutiny will detect minor discrepancies on pages 206–207, 234–235, 373–374, 404–407, 468–478, 564–565, and 689–690.

Because the vocabulary Mises used in *Human Action* included many words and phrases which will be unfamiliar to modern readers, this Liberty Fund Edition reproduces Percy L. Greaves, Jr.'s *Mises Made Easier: A Glossary to Ludwig von Mises' HUMAN ACTION*, first published in 1974. This glossary defines and explains technical terms and historical references and includes translations of all foreign-language words and phrases in *Human Action*.

FOREWORD TO THE FOURTH EDITION

Mises' contribution was very simple, yet at the same time extremely profound. He pointed out that the whole economy is the result of what individuals do. Individuals act, choose, cooperate, compete, and trade with one another. In this way Mises explained how complex market phenomena develop. Mises did not simply describe economic phenomena — prices, wages, interest rates, money, monopoly and even the trade cycle — he explained them as the outcomes of countless conscious, purposive actions, choices, and preferences of individuals, each of whom was trying as best as he or she could under the circumstances to attain various wants and ends and to avoid undesired consequences. Hence the title Mises chose for his economic treatise, *Human Action*. Thus also, in Mises' view, Adam Smith's "invisible hand" was explainable on the basis of logic and utilitarian principles as the outcome of the countless actions of individuals.

Sprinkled throughout Mises' scholarly and erudite explanations of market operations are many colorful descriptions of economic phenomena. For instance, on the difference between economic and political power: "A 'chocolate king' has no power over the consumers, his patrons. He provides them with chocolate of the best quality and at the cheapest price. He does not rule the consumers, he serves them. The consumers . . . are free to stop patronizing his shops. He loses his 'kingdom' if the consumers prefer to spend their pennies elsewhere." (p. 300) On why people trade: "The inhabitants of the Swiss Jura prefer to manufacture watches instead of growing wheat. Watchmaking is for them the cheapest way to acquire wheat. On the other hand the growing of wheat is the cheapest way for the Canadian farmer to acquire watches." (p. 431) For Mises a price is a ratio arrived at on the market by the competitive bids of consumers for money on the one hand and some particular good or service on the other. A government may issue decrees, but "A government can no more determine prices than a goose can lay hen's eggs." (pp. 433–34)

In Mises' view, the inequality of men was the beginning of peaceful interpersonal social cooperation and the source of all the advantages it brings: "The liberal champions of equality under the law were fully aware of the fact that men are born unequal and that it is precisely their inequality that generates social cooperation and civilization. Equality under the law was in their opinion not designed

to correct the inexorable facts of the universe and to make natural inequality disappear. It was, on the contrary, the device to secure for the whole of mankind the maximum of benefits it can derive from it. . . . Equality under the law is in their eyes good because it best serves the interests of all. It leaves it to the voters to decide who should hold public office and to the consumers to decide who should direct production activities.” (p. 915)

Mises’ 1949 comments on Social Security and government debt read as if they had been written yesterday: “Paul in the year 1940 saves by paying one hundred dollars to the national social security institution. He receives in exchange a claim which is virtually an unconditional government IOU. If the government spends the hundred dollars for current expenditures, no additional capital comes into existence, and no increase in the productivity of labor results. The government’s IOU is a check drawn upon the future taxpayer. In 1970 a certain Peter may have to fulfill the government’s promise although he himself does not derive any benefit from the fact that Paul in 1940 saved one hundred dollars. . . . The trumpery argument that the public debt is no burden because ‘we owe it to ourselves’ is delusive. The Pauls of 1940 do not owe it to themselves. It is the Peters of 1970 who owe it to the Pauls of 1940. . . . The statesmen of 1940 solve their problems by shifting them to the statesmen of 1970. On that date the statesmen of 1940 will be either dead or elder statesmen glorying in their wonderful achievement, social security.” (p. 921)

In the “Foreword to the Third Edition” of *Human Action*, Mises mentioned the Italian and Spanish translations of this book. Since then it has been translated by Tao-Ping Hsia into Chinese (1976/77), by Raoul Audouin into French (1985), by Donald Stewart, Jr., into Portuguese (1990), and by Toshio Murata into Japanese (1991). Its German-language precursor, *Nationalökonomie* (1940) has also been republished (1980).

The publishers of this new edition of *Human Action* have tried to correct the typos that inevitably creep into almost any book, especially one of this size. They have also included a completely new index, which they hope will help make the ideas in this book more readily accessible to readers.

FOREWORD TO THE THIRD EDITION

It gives me great satisfaction to see this book, handsomely printed by a distinguished publishing house, appear in its third revised edition.

Two terminological remarks may be in order.

First, I employ the term “liberal” in the sense attached to it everywhere in the nineteenth century and still today in the countries of continental Europe. This usage is imperative because there is simply no other term available to signify the great political and intellectual movement that substituted free enterprise and the market economy for the precapitalistic methods of production; constitutional representative government for the absolutism of kings or oligarchies; and freedom of all individuals for slavery, serfdom, and other forms of bondage.

Secondly, in the last decades the meaning of the term “psychology” has been more and more restricted to the field of experimental psychology, a discipline that resorts to the research methods of the natural sciences. On the other hand, it has become usual to dismiss those studies that previously had been called psychological as “literary psychology” and as an unscientific way of reasoning. Whenever reference is made to “psychology” in economic studies, one has in mind precisely this literary psychology, and therefore it seems advisable to introduce a special term for it. I suggested in my book *Theory and History* (New Haven, 1957, pp. 264–74) the term “thymology,” and I used this term also in my recently published essay *The Ultimate Foundation of Economic Science* (Princeton, 1962). However, my suggestion was not meant to be retroactive and to alter the use of the term “psychology” in books previously published, and so I continue in this new edition to use the term “psychology” in the same way I used it in the first edition.

Two translations of the first edition of *Human Action* have come out: an Italian translation by Mr. Tullio Bagiotti, Professor at the Università Bocconi in Milano, under the title *L’Azione Umana, Trattato di economia*, published by the Unione Tipografico-Editrice Torinese in 1959; and a Spanish-language translation by Mr. Joaquin Reig Albiol under the title *La Acción Humana (Tratado de Economía)*, published in two volumes by Fundación Ignacio Vialalonga in Valencia (Spain) in 1960.

I feel indebted to many good friends for help and advice in the preparation of this book.

First of all I want to remember two deceased scholars, Paul Mantoux and William E. Rappard, who by giving me the opportunity of teaching at the famous Graduate Institute of International Studies in Geneva, Switzerland, provided me with the time and the incentive to start work upon a long-projected plan.

I want to express my thanks for very valuable and helpful suggestions to Mr. Arthur Goddard, Mr. Percy Greaves, Doctor Henry Hazlitt, Professor Israel M. Kirzner, Mr. Leonard E. Read, Mr. Joaquin Reig Albiol and Doctor George Reisman.

But most of all I want to thank my wife for her steady encouragement and help.

Ludwig von Mises

CONTENTS

VOLUME 1

Editor's Note	iii
Foreword to the Fourth Edition	v
Foreword to the Third Edition	vii
Introduction	
1 Economics and Praxeology	1
2 The Epistemological Problem of a General Theory of Human Action	4
3 Economic Theory and the Practice of Human Action	7
4 Résumé	10
PART 1 Human Action	
<hr/>	
CHAPTER 1 Acting Man	11
1 Purposeful Action and Animal Reaction	11
2 The Prerequisites of Human Action	13
On Happiness	
On Instincts and Impulses	
3 Human Action as an Ultimate Given	17
4 Rationality and Irrationality; Subjectivism and Objectivity of Praxeological Research	19
5 Causality as a Requirement of Action	22
6 The Alter Ego	23
On the Serviceableness of Instincts	
The Absolute End	
Vegetative Man	
CHAPTER 2 The Epistemological Problems of the Sciences of Human Action	30
1 Praxeology and History	30
2 The Formal and Aprioristic Character of Praxeology	32
The Alleged Logical Heterogeneity of Primitive Man	
3 The A Priori and Reality	38
4 The Principle of Methodological Individualism	41
I and We	
5 The Principle of Methodological Singularism	44

6	The Individual and Changing Features of Human Action	46
7	The Scope and the Specific Method of History	47
8	Conception and Understanding Natural History and Human History	51
9	On Ideal Types	59
10	The Procedure of Economics	64
11	The Limitations on Praxeological Concepts	69
CHAPTER 3 Economics and the Revolt Against Reason		72
1	The Revolt Against Reason	72
2	The Logical Aspect of Polylogism	75
3	The Praxeological Aspect of Polylogism	76
4	Racial Polylogism	84
5	Polylogism and Understanding	86
6	The Case for Reason	89
CHAPTER 4 A First Analysis of the Category of Action		92
1	Ends and Means	92
2	The Scale of Value	94
3	The Scale of Needs	96
4	Action as an Exchange	97
CHAPTER 5 Time		99
1	Time as a Praxeological Factor	99
2	Past, Present, and Future	100
3	The Economization of Time	101
4	The Temporal Relation Between Actions	102
CHAPTER 6 Uncertainty		105
1	Uncertainty and Acting	105
2	The Meaning of Probability	106
3	Class Probability	107
4	Case Probability	110
5	Numerical Evaluation of Case Probability	113
6	Betting, Gambling, and Playing Games	115
7	Praxeological Prediction	117
CHAPTER 7 Action Within the World		119
1	The Law of Marginal Utility	119
2	The Law of Returns	127

3	Human Labor as a Means Immediately Gratifying Labor and Mediatly Gratifying Labor The Creative Genius	131
4	Production	140
PART 2 Action Within the Framework of Society		143
<hr/>		
CHAPTER 8	Human Society	143
1	Human Cooperation	143
2	A Critique of the Holistic and Metaphysical View of Society Praxeology and Liberalism Liberalism and Religion	145
3	The Division of Labor	157
4	The Ricardian Law of Association Current Errors Concerning the Law of Association	159
5	The Effects of the Division of Labor	164
6	The Individual Within Society The Fable of the Mystic Communion	165
7	The Great Society	169
8	The Instinct of Aggression and Destruction Current Misinterpretations of Modern Natural Science, Especially of Darwinism	170
CHAPTER 9	The Role of Ideas	177
1	Human Reason	177
2	World View and Ideology The Fight Against Error	178
3	Might Traditionalism as an Ideology	187
4	Meliorism and the Idea of Progress	191
CHAPTER 10	Exchange Within Society	194
1	Autistic Exchange and Interpersonal Exchange	194
2	Contractual Bonds and Hegemonic Bonds	195
3	Calculative Action	198
PART 3 Economic Calculation		200
<hr/>		
CHAPTER 11	Valuation Without Calculation	200
1	The Gradation of the Means	200

2	The Barter-Fiction of the Elementary Theory of Value and Prices	201
	The Theory of Value and Socialism	
3	The Problem of Economic Calculation	206
4	Economic Calculation and the Market	209
CHAPTER 12 The Sphere of Economic Calculation		212
1	The Character of Monetary Entries	212
2	The Limits of Economic Calculation	214
3	The Changeability of Prices	217
4	Stabilization	219
5	The Root of the Stabilization Idea	223
CHAPTER 13 Monetary Calculation as a Tool of Action		229
1	Monetary Calculation as a Method of Thinking	229
2	Economic Calculation and the Science of Human Action	231

VOLUME 2

PART 4	Catallactics or Economics of the Market Society	232
--------	--	-----

CHAPTER 14 The Scope and Method of Catallactics		232
1	The Delimitation of Catallactic Problems The Denial of Economics	232
2	The Method of Imaginary Constructions	236
3	The Pure Market Economy The Maximization of Profits	237
4	The Autistic Economy	243
5	The State of Rest and the Evenly Rotating Economy	244
6	The Stationary Economy	250
7	The Integration of Catallactic Functions The Entrepreneurial Function in the Stationary Economy	251
CHAPTER 15 The Market		257
1	The Characteristics of the Market Economy	257
2	Capital Goods and Capital	259
3	Capitalism	264
4	The Sovereignty of the Consumers The Metaphorical Employment of the Terminology of Political Rule	269

5	Competition	273
6	Freedom	279
7	Inequality of Wealth and Income	287
8	Entrepreneurial Profit and Loss	289
9	Entrepreneurial Profits and Losses in a Progressing Economy	294
	The Moral Condemnation of Profit	
	Some Observations on the Underconsumption Bogey and on the Purchasing Power Argument	
10	Promoters, Managers, Technicians, and Bureaucrats	303
11	The Selective Process	311
12	The Individual and the Market	315
13	Business Propaganda	320
14	The “Volkswirtschaft”	323
CHAPTER 16	Prices	327
1	The Pricing Process	327
2	Valuation and Appraisalment	331
3	The Prices of the Goods of Higher Orders A Limitation on the Pricing of Factors of Production	333
4	Cost Accounting	339
5	Logical Catallactics Versus Mathematical Catallactics	350
6	Monopoly Prices The Mathematical Treatment of the Theory of Monopoly Prices	357
7	Good Will	379
8	Monopoly of Demand	383
9	Consumption as Affected by Monopoly Prices	384
10	Price Discrimination on the Part of the Seller	388
11	Price Discrimination on the Part of the Buyer	391
12	The Connexity of Prices	391
13	Prices and Income	393
14	Prices and Production	394
15	The Chimera of Nonmarket Prices	395
CHAPTER 17	Indirect Exchange	398
1	Media of Exchange and Money	398
2	Observations on Some Widespread Errors	398
3	Demand for Money and Supply of Money The Epistemological Import of Carl Menger’s Theory of the Origin of Money	401
4	The Determination of the Purchasing Power of Money	408

5	The Problem of Hume and Mill and the Driving Force of Money	416
6	Cash-Induced and Goods-Induced Changes in Purchasing Power Inflation and Deflation; Inflationism and Deflationism	419
7	Monetary Calculation and Changes in Purchasing Power	424
8	The Anticipation of Expected Changes in Purchasing Power	426
9	The Specific Value of Money	428
10	The Import of the Money Relation	430
11	The Money-Substitutes	432
12	The Limitation on the Issuance of Fiduciary Media Observations on the Discussions Concerning Free Banking	434
13	The Size and Composition of Cash Holdings	448
14	Balances of Payments	450
15	Interlocal Exchange Rates	452
16	Interest Rates and the Money Relation	458
17	Secondary Media of Exchange	462
18	The Inflationist View of History	466
19	The Gold Standard International Monetary Cooperation	471
CHAPTER 18	Action in the Passing of Time	479
1	Perspective in the Valuation of Time Periods	479
2	Time Preference as an Essential Requisite of Action Observations on the Evolution of the Time-Preference Theory	483
3	Capital Goods	490
4	Period of Production, Waiting Time, and Period of Provision Prolongation of the Period of Provision Beyond the Expected Duration of the Actor's Life Some Applications of the Time-Preference Theory	493
5	The Convertibility of Capital Goods	503
6	The Influence of the Past Upon Action	505
7	Accumulation, Maintenance and Consumption of Capital	514
8	The Mobility of the Investor	517
9	Money and Capital; Saving and Investment	520

CHAPTER 19	Interest	524
1	The Phenomenon of Interest	524
2	Ordinary Interest	526
3	The Height of Interest Rates	532
4	Ordinary Interest in the Changing Economy	534
5	The Computation of Interest	536
CHAPTER 20	Interest, Credit Expansion, and the Trade Cycle	538
1	The Problems	538
2	The Entrepreneurial Component in the Gross Market Rate of Interest	539
3	The Price Premium as a Component of the Gross Market Rate of Interest	541
4	The Loan Market	545
5	The Effects of Changes in the Money Relation Upon Ordinary Interest	548
6	The Gross Market Rate of Interest as Affected by Inflation and Credit Expansion The Alleged Absence of Depressions Under Totalitarian Management	550
7	The Gross Market Rate of Interest as Affected by Deflation and Credit Contraction The Difference Between Credit Expansion and Simple Inflation	566
8	The Monetary or Circulation Credit Theory of the Trade Cycle	571
9	The Market Economy as Affected by the Recurrence of the Trade Cycle The Role Played by Unemployed Factors of Production in the First Stages of a Boom The Fallacies of the Nonmonetary Explanations of the Trade Cycle	575
CHAPTER 21	Work and Wages	587
1	Introversive Labor and Extroversive Labor	587
2	Joy and Tedium of Labor	588
3	Wages	592
4	Catallactic Unemployment	598
5	Gross Wage Rates and Net Wage Rates	600

6	Wages and Subsistence	602
	A Comparison Between the Historical Explanation of Wage Rates and the Regression Theorem	
7	The Supply of Labor as Affected by the Disutility of Labor	611
	Remarks About the Popular Interpretation of the “Industrial Revolution”	
8	Wage Rates as Affected by the Vicissitudes of the Market	624
9	The Labor Market	625
	The Work of Animals and of Slaves	
CHAPTER 22 The Nonhuman Original Factors of Production		635
1	General Observations Concerning the Theory of Rent	635
2	The Time Factor in Land Utilization	637
3	The Submarginal Land	640
4	The Land as Standing Room	642
5	The Prices of Land	643
	The Myth of the Soil	
CHAPTER 23 The Data of the Market		646
1	The Theory and the Data	646
2	The Role of Power	647
3	The Historical Role of War and Conquest	649
4	Real Man as a Datum	651
5	The Period of Adjustment	652
6	The Limits of Property Rights and the Problems of External Costs and External Economies	654
	The External Economies of Intellectual Creation	
	Privileges and Quasi-privileges	
CHAPTER 24 Harmony and Conflict of Interests		664
1	The Ultimate Source of Profit and Loss on the Market	664
2	The Limitation of Offspring	667
3	The Harmony of the “Rightly Understood” Interests	673
4	Private Property	682
5	The Conflicts of Our Age	684
