High flexibility from design to production

SUCTION AND LOW-PRESSURE FITTINGS

High flexibility from design to production

Our customers can choose from a comprehensive range of suction and low pressure fittings in straight, 45° and 90° designs. In addition, special angular positions and customised solutions are available at short notice.

Standard designs

- Straight
- Angle 45°
- Angle 90°

Custom made solutions

The Dietzel building-block system and the flexible production allows for the manufacture of custom made solutions within a short time. Special fittings for your applications may include:

- Deviating angular positions
- Special leg lengths
- Step sizes
- Short nipples for restricted installation space

Insertion of fittings

Different fastening elements are available for controlled insertion of sucking and low pressure fittings. In principle, ferrules are preferred for assembled hose lines. If corrections are necessary during the installation, hose clamps and clamping shells are a suitable alternative.

Inserts at a glance:

Ferrules
Hose clamps
Clamp mounting

Connection types:

DKOL
DKM
SAE-flanges
DIN-flanges
Adjustable gear pump connections
with hole circle (LK 35, 40, 55)

Seals:

O-ring sealing variants
New suction hose inserts for high
tear prevention and seal integrity
