

Energy Resources Regulations (Performing a Study to Find a Potential to Energy Conservation), 5753-1993

(Published in 5753 page 1099, 5764, page 243)

The English version is a non-binding, unofficial translation from the original, binding, Hebrew version and is posted here exclusively for the convenience of the Public. Only the Hebrew version, as officially published in the official gazette (Reshumot) shall be binding.

By virtue of the power vested in me pursuant to Section 3 of the Energy Sources Law, 5750-1989¹. And with the approval of the Knesset's Economic Committee, I hereby enact these regulations:

Definitions

1. In these Regulations -
"The Specification" – the specification to execute a study to energy conservation in plants and institutions whereby copies thereof are deposited with the Ministry for Energy and Infrastructures head office available to the public.

"Plant" – an area in which energy is consumed by one body or a number of bodies under one ownership or an area in which energy is consumed by a number of different bodies;

"Consumer Plant " –

A plant whose annual energy consumption is less than 2000 ton equivalent fuel oil of other fuels or electricity whereby the electricity consumption is calculated based on 260 grams fuel oil kilowatt per hour;

"Study" – a study to find a potential to energy conservation;

"Special Energy Consumption" – energy consumption for a product unit or a factor that characterizes the consumer's activities.

**Duty
Perform
Study**

- to 2. (a) A consumer plant must perform, once every 5 years, a study pursuant to a plan approved by the commissioner based on the specification.
a (b) The study will be completed by the consumer plant within one year from the day the commissioner's written approval of the study plan is received.

**Updating
Study**

- the 3. A year after the study is submitted and every year thereafter, on the same date until a new study is

¹ Sefer Hahukim 5750, page 28.

submitted, the consumer plant will submit an updated study to include the following details:

- (1) The electricity consumption in kilowatts per hour, the electricity supply coefficient and the demand peaks that were measured, consumption of the types of liquid fuels in liters and gas and coal consumption in kilograms in each of the months of the year and an annual summary;
- (2) Special energy consumption in each one of the months of the year and an annual summary.

- | | | |
|---|----|---|
| Approving the Study and Amendments Thereto | 4. | <p>(a) The study and updates to the study must be approved in writing by the commissioner.</p> <p>(b) The consumer plant must amend any detail in the study or the study update within three months of receiving a written demand to do so by the commissioner.</p> |
| Inspection | 5. | <p>The commissioner may at any reasonable time visit the consumer plant in order to verify the reliability of the study that was filed.</p> |
| Repealed | 6. | <p>The National Energy Authority Regulations (Performing an Energy Study) 5745-1985² (hereinafter – The Previous Regulations)– Repealed.</p> |
| Transitional Provisions | 7. | <p>A consumer plant will submit to the commissioner, for approval, a study plan within four months of the date these regulations come into force and if a study was conducted pursuant to the previous regulations – within five years of it being submitted.</p> |
