EMFIRE

Advanced DocuSign Integration with Salesforce

This solution allows organizations to shorten and simplify the document signature process and get the contracts signed in a bulk
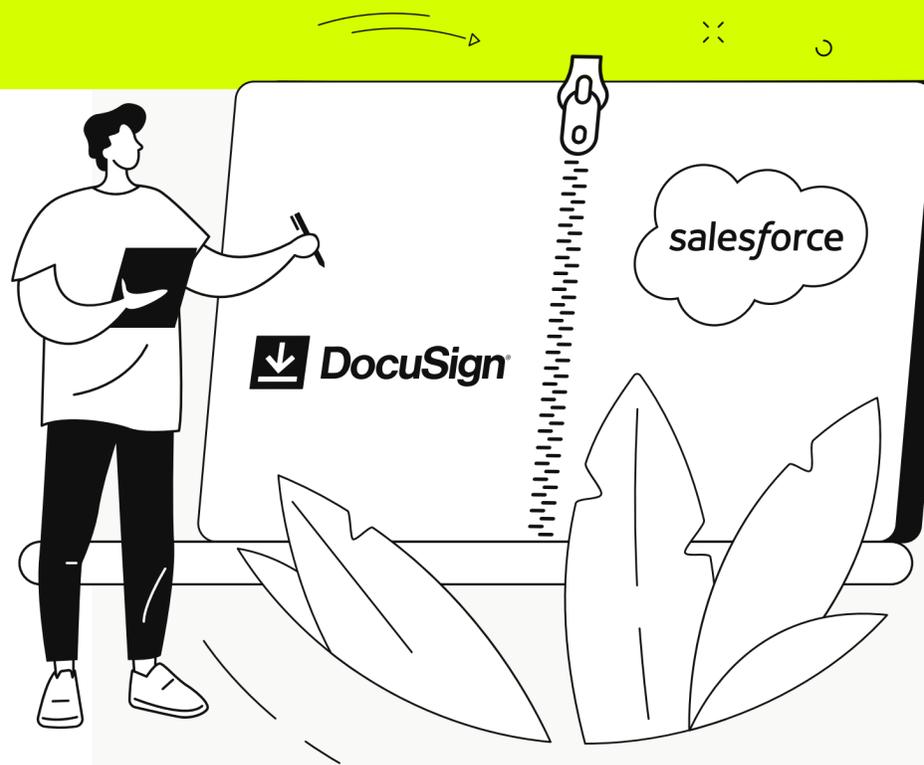

For: any company using Salesforce & DocuSign

Sample Features: pre-configured steps in the document creation process allowing skipping the DS editor; Sending contracts in bulk with automation; custom contract circulation; real-time status updates, easy error handling.

Benefits: Less time spent on contract preparation and sending, less errors in the templates, better user experience, up-to-date contract signature status.
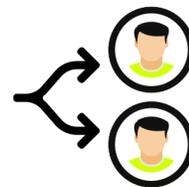

Save time
on document preparation

Send bulk
contracts

Circulate documents
according to your process
