

Online Recurring Payments with Stripe & Salesforce

This solution allows customers to pay for products or services stored in Salesforce via a web or mobile channel (incl. recurring payments) and track all these transactions back in Salesforce.

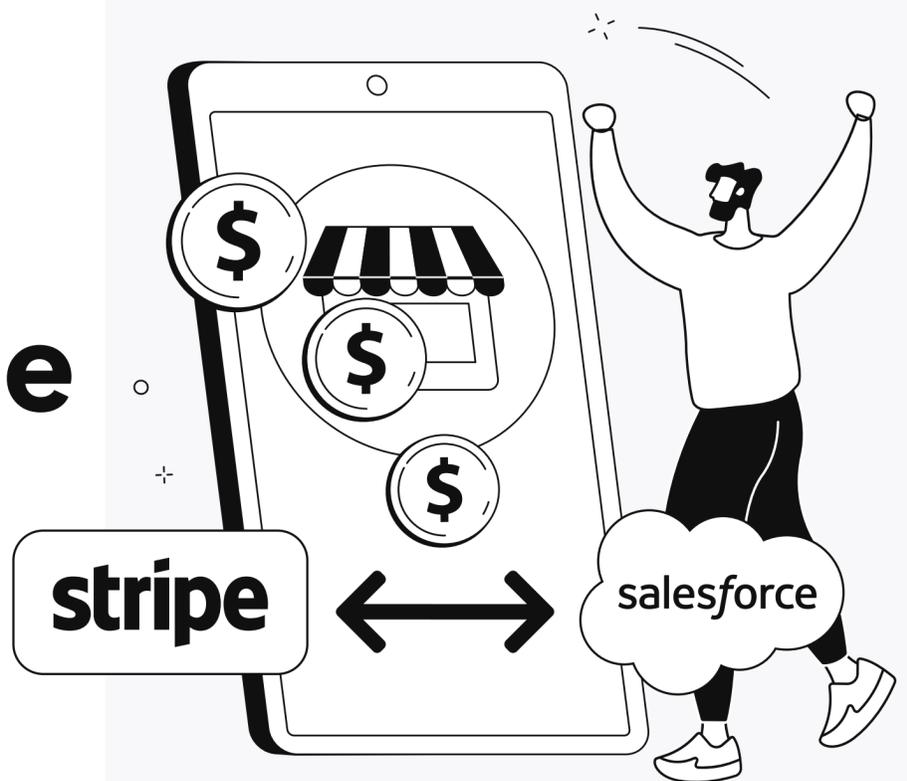

For: Any company using Salesforce that sells products and services online (including subscription-based business models)

Sample Features: Salesforce products integrated with Stripe Products and displayed in the web channel; Fully branded and integrated Stripe checkout, without redirects; Recurring subscription payments billed at any interval (automated billing); All transactions are tracked in Salesforce, including the statuses and stock updates; Split payments - one transaction is distributed to different accounts, Payment links sent for unfinished or failed transactions, Automated invoices, Payments can be refunded from Salesforce

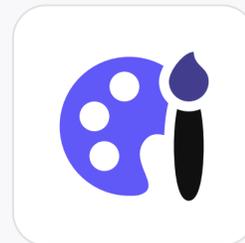

Benefits: Fast checkout; no redirect issues; less transaction costs; fast cash collection; your branding; seamless Salesforce integration; less manual work with invoicing
