

# The Mobile App for Work Order / Pick-up Service

The Work Order / Pick-up Service Mobile App is designed to receive work or pickup orders from the main service system (Salesforce or other) and pass them to the field service workers.

**For:** Pick up Service Companies, Field Service Companies, Service Partner Networks, those companies that Salesforce Field Service does not fit.

**Sample Features:** Work order assignment and re-assignment, push notifications & emails, appointment making, pick-up schedule, map navigation, QR code scanning, protocols and service reports, surveys, stage completion monitoring, automations.

**Benefits** Less time spent on field worker coordination, better control over the order completion progress, less manual work, improved business efficiency and no bottleneck problems.
