Center of Excellence
presents:

Clinical Strategies for HIV Prevention: PEP & PrEP

Tuesday, October 20, 2026

12:00 - 1:00 PM

Register here!

LEARNING OBJECTIVES

1. Explain the role of HIV Post-exposure prophylaxis (PEP) and pre-exposure prophylaxis (PrEP) as tools to end the HIV epidemic.
2. Review guidelines for prescribing PEP and PrEP, including baseline testing, rapid initiation, and monitoring.
3. Discuss best practices for improving access, retention in care, and clinical management.
4. Describe the future of PrEP and agents in development.
