Product report

Wet wipes Smile Antibacterial with D-panthenol, Smile Antibacterial with plantain extract, Smile Antibacterial with lime & vitamins, Smile Antibacterial with alcohol effectively clean the skin hands and body from various contaminants, including pathogens germs. The impregnating lotion contains quaternary ammonium compounds – Alkyldimethylbenzylammonium chloride (INCI: Benzalkonium chloride), having a wide range of anti-microbial activity. Due to its ability to remain on the skin surface as a thin film, Benzalkonium chloride creates a prolonged protection against pathogens.

The antimicrobial effect of wipes when used is confirmed by studies conducted in laboratory - The Institute of Ecohygiene and Toxicology.

Instructions for use: carefully wipe the skin of your palms and between the fingers until completely moistened.

Warnings: avoid contact with eyes. Do not use if you are allergic to any of the ingredients.

Wet wipes Smile Antibacterial help keep adults and children healthy and clean when soap and water are not available.
