

**STEEL**

This fork is produced in one solid piece (monoblock).

The stainless steel is austenitic 18/10.

**HANDLES**

This monoblock fork is in one piece and the handle is of the same steel, forming a solid and high quality.

**MANUFACTURING PROCESS**

All ARCOS knives are produced completely in our facilities located in Albacete (Spain), since 1734.

The monoblock fork is made of a steel rod of a certain diameter, achieving the desired shape by cold stamping.

ARCOS knives are identified by a tracking system to control the manufacturing process and the raw materials used in each batch. This customization system allows us to improve our products and respond to possible defects.

**MANUFACTURING ACCORDING TO:**

- UNE-EN-ISO-9001:2015 “Quality Management Systems”.
- UNE-EN-ISO-8442/1: International Standard “Material and articles in contact with food products. Knives and table cutlery”.
- General Foodcontact and Healthy Certificate 39.03065/AB.
