Planning timely and effective commitment to pledging moment for One CGIAR

Documents: No advance documents

System Council Collective Commitment of Investment Intent for One CGIAR:

A minimum threshold of \$1 billion (\$1.4 billion high case scenario) in pooled funding for the 2022-2024 period is required to launch new initiatives, signal confidence in One CGIAR transition and raise the public profile of CGIAR during important global moments.

The CGIAR Champions Group - Bill & Melinda Gates Foundation, Canada, Germany, The Netherlands, United Kingdom, and World Bank is calling for System Council members and CGIAR funders join for a shared ambition of:

- 100% participation from System Council members in supporting CGIAR research & innovation;
- prioritize pooled funding mechanisms in support of CGIAR research initiatives;
- strive for \$1+ billion in pooled funding for 2022-2024 period;
- pledge early, where possible, to build momentum for investments;
- help position CGIAR, and investment in Food Systems Research and Innovation in key political processes (G20, UNFSS, COP26, Nutrition4Growth...)

Ultimately, funding will be based on individual funder decisions linked to the confidence in process management following the design principles, assurance of impact and value proposition in the research initiatives proposed by One CGIAR.
