<td>1. Noting the risk to CGIAR’s reputation/ability to operate if the Governing Body in 2019 finds that CGIAR Intellectual Assets Reports do not provide adequate information, and adopts a resolution to increase the power of Secretariat and GB to require information on an ad hoc basis from CGIAR, the Board recommended that the System Organization and CGIAR Centers work together to make additional information available to the Governing Body through expanded annual Intellectual Assets reports and/or other means. 2. The Board re-affirmed the importance of the subscription system as a component of a revised multilateral system and encouraged the Article 15 CGIAR Centers to confirm if they would, in principle, be willing to become subscribers (subject to satisfactory resolution of outstanding details) and if so, make a related statement to next Working Group meeting (October 2018). 3. Noting: a. growing controversy in international fora concerning benefit sharing and genomic sequence information; and b. the risk to CGIAR’s reputation if it is perceived that Centers’ genomic sequencing activities are not protecting/promoting the international public goods nature of the Centers’ Article 15 collections, and/or not demonstrably linked to the generation of benefits for farmers in developing countries, The Board recommended to Centers that they: i. Build in and demonstrate/communicate benefit-sharing for developing countries and farmers in genomic sequencing projects, and collectively across the CGIAR System; and ii. Revisit the guiding principles developed ad hoc in 2017; consider raising their profile (e.g., for a CGIAR statement on genomic sequence information, conservation, sustainable use and benefit sharing). 4. Noting the importance of compliance with both the ITPGRFA and the Nagoya Protocol to protect the reputation of CGIAR the Board recommended that CGIAR Centers: i. Include a statement of compliance in annual Intellectual Assets reports to the System Organization, and/or additional information on how they are complying; or ii. Consider other means of providing public assurance of compliance.</td>

  a. Endorsed the option presented by the Gender Equality and Diversity Reference Group that a call for proposals be issued for a “Gender Equality in Agriculture Research Platform”, which would respond to the following:  
  i. Overall the Platform should demonstrate CGIAR as a clear steward of its gender research work  
  ii. The Platform should address the strategic and operational objectives outlined in the business case.  
  iii. Proposals should be submitted by a CGIAR Center as Lead Center, which would carry overall fiduciary and programmatic responsibility for the Platform vis-à-vis the System Organization, and which would preferably work in partnership with at least 1 additional CGIAR Center  
  iv. Platform Director with senior-level gender expertise  
  v. Platform should be hosted by a CGIAR Center, preferably in a multi-Center location (not necessarily in Lead Center HQ)  
  vi. Arrangements for Platform activities should be clearly articulated in the proposal, and should maximize involvement of other CGIAR entities  
  vii. Additional governance through advisory body with a balance of perspectives from within CGIAR and from outside.  
  viii. Adequate funding to be provided via the FinPlan with a resource mobilization strategy to outline additional fundraising by the Platform, plus a strategy for using funding to support wider gender research  
  ix. Platform should have specific mechanisms for engaging gender researchers including building on positive activities undertaken currently by the Gender collaborative platform and ensure robust mechanisms for monitoring and reporting at System-level.  
  x. A clear plan to outline necessary transition between current and future structures.

The Board recognized that:

i. A gender balance of 40/40/20 (meaning a minimum of 40% male and minimum 40% female, with the remaining 20% to provide flexibility across genders) is a medium-to-long term aspiration for consideration in the context of the 2030 Plan.

ii. Gender, diversity and inclusivity are separate, albeit related workstreams.

iii. Gender, diversity and inclusivity are cultural issues above all and that it is incumbent on the System, as a global movement, to take a lead in bringing about change, by promoting constructive and proactive thinking about gender balance, diversity and inclusivity within the System. This means challenging stereotypes, assumptions and preconceptions, encouraging appropriate use of language and ways of framing issues, while acknowledging the need to be realistic about the constraints and requirements of operating in certain environments in terms of the System’s commitment to ensure staff safety and wellbeing.
