## Statement of the Board Chair

for the year ended 31 December 2021

The mission of International Institute of Tropical Agriculture (IITA) is to be the leading research partner facilitating agricultural solutions to overcome hunger, poverty and natural resource degradation throughout Tropical Africa. The Board of Trustees is committed to provide governance, financial and programmatic oversight to ensure efficient and effective management of the Institute.

IITA has fully embraced the One CGIAR System and holds the view that a unified CGIAR speaking with one voice will be a more effective and impactful organization. Given the institute's broad-based agenda, widespread presence of IITA scientists across Sub-Saharan Africa, and with its wide-ranging activities across the continent, IITA is well positioned to contribute to the One CGIAR.

The decentralization of IITA's structure into five regional hubs managed by Hubs Directors (simultaneously leading a science competency) and its timely implementation from 2012 was crucial to the growth and stability of IITA. In Central Africa, IITA's regional hub headquarter is in Kinshasa (DR Congo); the Eastern Africa hub is in Dar Es Salaam (Tanzania); the Southern Africa hub in Lusaka (Zambia); and the West Africa hub in Ibadan (Nigeria). An additional hub in the Sahel was recently established in Bamako, Mali. IITA hubs have become institutional assets in which donors, governments; various research and delivery partners have invested and where clear impact has been delivered. These hubs will be an asset for the One CGIAR in sub-Saharan Africa.

The effect of COVID 19 pandemic on our research continued to be felt through 2021 even though some countries where we operate started easing most of the restrictions imposed in reaction to the pandemic. This enabled our staff to move to our areas of impact where we conduct research.

Despite the difficulties posed by the pandemic, IITA delivered a strong financial performance in 2021. Total revenue amounted to US\$103.8 million (2020: US\$86.7 million) representing 19.7% increase with expenditure of US\$103.7 million (2020: US\$86.3 million). The Institute's liquidity and reserve levels improved with operating reserves increasing from \$7.6 million to \$7.8 million and days reserves reduced from 41.7 to 41.2 days. The reduction in reserve days is due to an increase in average daily cash expenditure from US \$214,000 to \$264,750. The 2021 audited financial statements show an operating result of US\$138,000. The Board recognizes the continuing need to increase reserves and expense days coverage and will continue to work with management to develop action plans to improve days coverage to a desirable level.

In 2021, the move to One CGIAR continued with the momentum gathered in 2020 with an ambitious aim to further integrate CGIAR's assets, partnerships, and operations to deliver greater impact. One CGIAR will ensure that we can fully and effectively respond to new and emerging global challenges. The major milestones for 2021 included appointment of Global and regional Directors, approval of initiative proposals, the rollout of initiative budgeting guidelines and subsequent preparation of budgets.

The Board of Trustees expresses its appreciation to the Management and staff of IITA for the excellent research and delivery activities conducted during 2021, attracting new partners, funding, and the effective financial and administrative management of the Institute's resources. Finally, the Trustees express deep appreciation to IITA's investors and partners for their contributions to the Institute's mission of reducing hunger and poverty in Africa.

Christian Borgemeister  
 Chair of the IITA Board of Trustees  
 1 June 2022

## BOARD STATEMENT ON IITA RISK MANAGEMENT - 2021

The Center's Board of Trustees has responsibility for overseeing the effectiveness of the risk management system that IITA management has put in place to identify, manage, and monitor significant risks to the achievement of IITA's business objectives, and to ensure alignment with the unified One CGIAR. Consultative Group on International Agriculture Research (CGIAR) principles and guidelines that have been adopted by all CGIAR Centers.

These risks include operational, financial and reputational risks that are inherent in the nature, modus operandi and location of IITA's activities and dynamics of the environment in which IITA operates. Together, they represent the potential for loss resulting from external events, human factors or inadequate or failed internal policies, processes or systems.

To these ends, the Board has adopted a risk management policy and risk mitigation practices, that have been communicated to all staff, that include a risk framework by which IITA management identifies, evaluates and prioritizes risks and opportunities across the organization; assigns risk owners and develops risk mitigation strategies (including internal controls) which balance benefits with costs; monitors the implementation of these strategies and reports semi-annually to the Audit, Finance and Risk Committee of the Board on results. During 2021, the management continued to review and further develop existing risk management strategies and guidelines to ensure the risk management system in IITA is comprehensive, relevant and continues to be in line with best practices.

The Board will monitor and review progress on an on-going basis as the IITA management seeks to deepen the implementation of the risk management framework, focus attention on higher priority risks. The Board notes that the effectiveness of risk management depends not only on the identification of the risks but the implementation of effective mitigation plans. The Board continues to assure itself that risk management is effective and sustained.

With regards to IITA's 2021 financial statements and the effectiveness of internal control specific to financial reporting, the Board notes management's assertion in its 2021 Management Letter of Representation (provided to the external auditors) and Management's Statement of Responsibility for Financial Reporting included as part of the annual Financial Statements.

Christian Borgemeister  
Chair of the IITA Board of Trustees

1 June 2022

## Report of Management

The accompanying financial statements of IITA are the responsibility of management and have been prepared in accordance with International Financial Reporting Standards (IFRS) as prescribed for all international research centers seeking assistance from the Consultative Group on International Agricultural Research (CGIAR).

IITA maintains a system of internal controls designed to provide reasonable assurance that assets are safeguarded, and transactions are properly executed. IITA's Internal Audit system provides ongoing evaluations of the adequacy, effectiveness and adherence to management's established policies and procedures. The Board of Trustees exercises its fiduciary responsibility for these financial statements through its Audit, Finance & Risk Committee (AFRC).

The Audit, Finance & Risk Committee (AFRC), comprises Board of Trustees' members who are not officers of the Institute. The Committee meets with the independent auditors, management, and internal auditors periodically to discuss internal controls, auditing and financial reporting matters. The Committee reviews, with the independent auditors, the scope and results of the audit effort.

The accompanying report is based on an audit by the independent accounting firm of Deloitte & Touche.

## Independent Auditor's report

### To the Trustees of the International Institute of Tropical Agriculture Report on the Audit of the Financial Statements

#### Opinion

We have audited the financial statements of **INTERNATIONAL INSTITUTE OF TROPICAL AGRICULTURE** set out on pages 6 to 41, which comprises the statement of financial position as at 31st December 2021, statement of activities and other comprehensive income, statement of changes in Net assets, statement of cash flows for the year then ended and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of financial position of **INTERNATIONAL INSTITUTE OF TROPICAL AGRICULTURE** as at 31st December 2021, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the CGIAR reporting guidelines.

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Institute in accordance with the requirements of the International Ethics Standards Board for Accountants' (IESBA), International Code of Ethics for Professional Accountants (including International Independence Standards), the Institute of Chartered Accountants of Nigeria Professional Code of Conduct and Guide for Accountants (ICAN Code), and other independence requirements applicable to performing audits of financial statements in Nigeria. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and other ethical requirements that are relevant to our audit of Financial Statements in Nigeria.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Other Information

The board of Trustees are responsible for the other information. The other information comprises the Statement of Board Chair, Board Statement on IITA risk management 2021, Report of management and supplementary information. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Based on the work we have performed on the other information obtained prior to the date of this auditor's report. If we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Trustees and those charged with governance for the Financial Statements

The Trustees are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the IFRS-compliant CGIAR reporting guidelines and for such internal control as the Trustees determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Trustees are responsible for assessing the Institute's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using

the going concern basis of accounting unless the Trustees either intend to liquidate the Institute or to cease operations, or have no realistic alternative but to do so.

### **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Institute's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Trustees.
- Conclude on the appropriateness of the Trustees' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Institute's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Institute to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### **Report on Other Legal and Regulatory Requirements**

We expressly state that:

- i) We have obtained all the information and explanation which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii) The Institute has kept proper books of account, so far as appears from our examination of those books.
- iii) The Institute's financial position and its statement of Activities and other comprehensive income are in agreement with the books of account and returns.

## **Notes to the Financial Statements**

### **1 Corporate information**

The financial statements of the International Institute of Tropical Agriculture ("IITA", "Institute" or "Center") for the year ended 31 December 2021 were authorized for issue in accordance with a resolution of the Board of Trustees on June 1, 2022.

The International Institute of Tropical Agriculture (IITA) is a private, autonomous, international in character, not-for-profit, tax free, scientific and educational institute chartered under the laws of Nigeria by Decree number 32 dated July 1967, to engage in research on resource and crop management and the improvement of selected food crops in Sub-Saharan Africa.

IITA, a One CGIAR Center headquartered in Ibadan, Nigeria; is one of Africa's seminal partners in applied agricultural research for sustainable food futures. One CGIAR is a dynamic reformulation of CGIAR's partnerships, knowledge, assets and global presence, aiming for greater integration and impact in the face of the interdependent challenges of today's world. One CGIAR research is dedicated to reducing rural poverty, increasing food security, improving human health and nutrition, and ensuring more sustainable management of natural resources.

### **2 Adoption of new and revised IFRS standards**

#### **I. Impact of the initial application of Interest Rate Benchmark Reform**

IITA did not adopt the Phase 1 amendments Interest Rate Benchmark Reform—Amendments to IFRS 9/IAS 39 and IFRS 7. These amendments modify specific hedge accounting requirements to allow hedge accounting to continue for affected hedges

during the period of uncertainty before the hedged items or hedging instruments are amended as a result of the interest rate benchmark reform.

In the current year, IITA did not adopt the Phase 2 amendments Interest Rate Benchmark Reform—Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16.

Both the Phase 1 and Phase 2 amendments are not relevant to IITA because we do not do hedge accounting. We also do not do any bank borrowings neither do we enter into lease agreements.

#### **II. Impact of the initial application of COVID-19-Related Rent Concessions beyond 30 June 2021—Amendment to IFRS 16**

In the prior year, IITA did not adopted Covid-19-Related Rent Concessions (Amendment to IFRS 16) that provided practical relief to lessees in accounting for rent concessions occurring as a direct consequence of COVID-19, by introducing a practical expedient to IFRS 16. This practical expedient was available to rent concessions for which any reduction in lease payments affected payments originally due on or before 30 June 2021.

In March 2021, the Board issued Covid-19-Related Rent Concessions beyond 30 June 2021 (Amendment to IFRS 16) that extends the practical expedient to apply to reduction in lease payments originally due on or before 30 June 2022. Again, we did not adopt this amendment as it does not apply to us and does not impact on our financial statements.

IAS 8:30 - 31 New and revised IFRS Standards in issue but not yet effective

At the date of authorization of these financial statements, IITA has not applied the following new and revised IFRS Standards that have been issued but are not yet effective.

## **Notes to the Financial Statements**

### **2 Adoption of new and revised IFRS standards (cont'd)**

#### **III.IFRS 17 (including the June 2020 amendments to IFRS 17) Insurance Contracts**

Amendments to IFRS 10 and IAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture
Amendments to IAS 1	Classification of Liabilities as Current or Non-current
Amendments to IFRS 3	Reference to the Conceptual Framework
Amendments to IAS 16	Property, Plant and Equipment—Proceeds before Intended Use
Amendments to IAS 37	Onerous Contracts—Cost of Fulfilling a Contract
Annual Improvements to IFRS	Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards 2018-2020 Cycle I Instruments, IFRS 16 Leases, and IAS 41 Agriculture
Amendments to IAS 1 and IFRS	Disclosure of Accounting Policies Practice Statement 2
Amendments to IAS 8	Definition of Accounting Estimates
Amendments to IAS 12	Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The directors do not expect that the adoption of the Standards listed above will have a material impact on the financial statements of IITA in future periods.

#### **V. Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint**

These amendments will have no impact on the financial statements of IITA because we do not have investments in Associates or joint ventures, therefore they will not be adopted.

#### **VI. Amendments to IAS 1 Presentation of Financial Statements—Classification of Liabilities as Current or Non-current**

The amendments to IAS 1 affect only the presentation of liabilities as current or non-current in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.

The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the

reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2023, with early application permitted. IITA has adopted this standard.

#### **VII. Amendments to IFRS 3 Business Combinations—Reference to the Conceptual Framework**

The amendments update IFRS 3 so that it refers to the 2018 Conceptual Framework instead of the 1989 Framework.

They also add to IFRS 3 a requirement that, for obligations within the scope of IAS 37, an acquirer applies IAS 37 to determine whether at the acquisition date a present obligation exists as a result of past events. For a levy that would be within the scope of IFRIC 21 Levies, the acquirer applies IFRIC 21 to determine whether the obligating event that gives rise to a liability to pay the levy has occurred by the acquisition date.

## **Notes to the Financial Statements**

Finally, the amendments add an explicit statement that an acquirer does not recognize contingent assets acquired in a business combination.

The amendments are effective for business combinations for which the date of acquisition is on or after the beginning of the first annual period beginning on or after 1 January 2022. Early application is permitted if an entity also applies all other updated references (published together with the updated Conceptual Framework) at the same time or earlier.

This standard and the amendments have no impact on the financial statements of IITA and will not be adopted.

### **VIII. Amendments to IAS 16 Property, Plant and Equipment—Proceeds before Intended Use**

The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced before that asset is available for use, i.e., proceeds while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Consequently, an entity recognizes such sales proceeds and related costs in profit or loss. The entity measures the cost of those items in accordance with IAS 2 Inventories.

The amendments also clarify the meaning of ‘testing whether an asset is functioning properly’. IAS 16 now specifies this as assessing whether the technical and physical performance of the asset is such that it is capable of being used in the production or supply of goods or services, for rental to others, or for administrative purposes.

If not presented separately in the statement of comprehensive income, the financial statements shall disclose the amounts of proceeds and cost included in profit or loss that relate to items produced that are not an output of the entity’s ordinary activities, and which line item(s) in the statement of comprehensive income include(s) such proceeds and cost.

The amendments are applied retrospectively, but only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments.

The entity shall recognise the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of that earliest period presented.

IITA has adopted this standard though it has no effect on these financial statements.

### **IX. Amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets—Onerous Contracts—Cost of Fulfilling a Contract**

The amendments specify that the ‘cost of fulfilling’ a contract comprises the ‘costs that relate directly to the contract’. Costs that relate directly to a contract consist of both the incremental costs of fulfilling that contract (examples would be direct labour or materials) and an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).

The amendments apply to contracts for which the entity has not yet fulfilled all its obligations at the beginning of the annual reporting period in which the entity first applies the amendments. Comparatives are not restated.

Instead, the entity shall recognize the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application.

IITA will adopt this standard though it has no effect on these financial statements.

## **Notes to the Financial Statements**

### **X. Annual Improvements to IFRS**

**Standards 2018-2020—Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IFRS 16 Leases, and IAS 41**

#### **Agriculture**

While IITA adopted IFRS in 2016 these amendments to IFRS 1 do not have any effect on our financial statements as we do not have any subsidiaries that are adopting IFRS. IFRS 16 and IAS 41 do not have effect on our financial statements as we do not have any lease and IAS 41 is not applicable to our agricultural research.

### **XI. Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements—Disclosure of Accounting Policies**

The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term ‘significant accounting policies’ with ‘material accounting policy information’. Accounting policy information is material if, when considered together with other information included in an entity’s financial statements, it can reasonably be expected to influence decisions that the primary users of general-purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

IITA will adopt this standard in the year 2023 when it becomes effective.

### **XII. Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors—Definition of Accounting Estimates**

The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”.

The definition of a change in accounting estimates was deleted. However, the Board retained the concept of changes in accounting estimates in the Standard with the following clarifications:

- A change in accounting estimate that results from new information or new developments is not the correction of an error
- The effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors

IITA will adopt this standard in 2023 when it becomes effective.

### **XIII. Amendments to IAS 12 Income Taxes—Deferred Tax related to Assets and Liabilities arising from a Single Transaction**

IITA will not adopt this standard as it is a tax-exempt organization, and the standard has no effect on our financial statements.

## **3 Significant accounting policies**

### **3.1 Basis of preparation**

The financial statements of IITA have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The financial statements have been prepared on the historical cost basis, except for the revaluation of certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the

## **Notes to the Financial Statements**

accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

### **Going concern**

Management has made an assessment of IITA's ability to continue as a going concern and is satisfied that IITA has the resources to continue in operations for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the IITA's ability to continue as a going concern. We have also considered the effects of the Corona Virus epidemic on the finances of the Institute, and we are of the view that they will not affect the organization's ability to meet its obligations. Therefore, the financial statements continue to be prepared on the going concern basis.

### **3.2 Summary of significant accounting policies**

#### **The following are the significant accounting policies applied by IITA in preparing its financial statements:**

##### **I. Current versus non-current classification**

IITA presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash and short-term deposits unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle

- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

IITA classifies all other liabilities as non-current.

#### **II. Fair value measurement**

The Institute has not measured financial instruments and non-financial assets at fair value at the statement of financial position date.

Fair value related disclosures for financial assets are summarised in the following notes:

Accounting policy disclosures - Note 3

Quantitative disclosures of fair value measurement hierarchy - Note 20

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability

Or

- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by IITA.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits from the asset's highest and best use or by selling it to another market participant that would utilise the asset in its highest and best use.

## **Notes to the Financial Statements**

IITA uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is disclosed in the financial statements are categorized within the fair value hierarchy. This is described, as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

## **Others**

For the purpose of fair value disclosures, IITA has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

## **III.Revenue Recognition**

Grant revenue comprises of donations received from various sources. The main sources of donations are from CGIAR, Governments of different countries, Private Individuals, Charitable foundations and Companies. The grants, whether restricted or unrestricted, are not recognized until there is reasonable assurance that the Institute has complied with the conditions attached to the grant and that the grant will be received. Restricted grants are recognized as revenue to the extent of expenses incurred.

### **Revenue is classified into two (2) streams:**

- Restricted grants (including Government grants) are those received from a

transfer of resources to the Institute in return for past or future compliance to the operating activities of the Institute. Restricted grants include Window 1,2, and 3, and Bilateral.

- Unrestricted grants (including Government grants) are those received from unconditional transfers of cash or other assets to the Institute. The two streams are further analyzed into six (6) sub-categories:

### **CRP (CGIAR Research Program) window 1:**

In window 1, CGIAR determines the CRP to be executed and provides funds for the project. CGIAR identifies a lead center and participating partners with the competency required to execute the project and communicates to the lead center the project details and thereafter, funds are transferred to the lead center.

### **CRP (CGIAR Research Program) window 2:**

In window 2, the donor identifies a program or project it wishes to fund, the funds are made available to CGIAR. CGIAR identifies a lead center and participating partners with the competency required for executing the project and communicates to the lead center the project details and thereafter funds are transferred to the lead center.

### **CRP (CGIAR Research Program) window 3:**

In window 3, the donor directly identifies the research center with a program it wishes to fund and remits the funds for the research through CGIAR funding window to the research center.

### **Bilateral funds**

These are funds sent by the Donor to the identified research center without the involvement of CGIAR.

### **Challenge programs**

Challenge programs are programs initiated to take on global challenges with a wide range of research partners. These funds originate from the Challenge Program lead center to the identified research center with the required geographical presence and expertise.

## **Notes to the Financial Statements**

### **Non-CRP funds**

These are strategic funded projects which are aligned to the strategic research framework (SRF) of CGIAR CRPs.

The grants, whether restricted or unrestricted, are not recognized until there is reasonable assurance that the Center has complied with the conditions attached to the grant.

Unrestricted grants in currencies other than US dollars (US\$) are recorded at exchange rates in effect at the time of receipt or, if outstanding as at December 31, at the exchange rate in effect at the year end.

Restricted grants in currencies other than US dollars (US\$) with specific request to be paid in that currency as partner funds, are recorded as income and expenses at the exchange rate in effect at the time of payment.

### **Grants-in-kind**

These are recorded at the fair value of assets (or services) received or promised.

## **IV. Foreign currencies**

IITA's financial statements are presented in US. dollars (US\$), which is also the Institute's functional currency.

### **Transactions and balances**

Transactions in foreign currencies are initially recorded by IITA at their functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the currency spot rates of exchange ruling at the reporting date. Differences arising on settlement or translation of monetary items are recognised in the statement of activities. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

## **V. Government grants**

Government grants are recognised when there is a reasonable assurance that the grant will be received, and all attached conditions will be complied with. When the grant

relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, which it is intended to compensate, are expensed.

Where the grant relates to an asset, it is recognised as deferred income in the statement of financial position and transferred to statement of activities on a systematic and rational basis over the useful lives of the related assets. When IITA receives non - monetary grants, the asset and the grant are recorded at nominal amount.

## **VI. Cash and short - term deposits**

Cash and short-term deposits in the statement of financial position comprises cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

Cash and short-term deposits also comprise of cash equivalents which are short-term, highly liquid investments that are: i) readily convertible to known amounts of cash; and ii) invested for a period of 3 months or less, hence the risk of changes in value due to changes in interest rates are insignificant.

## **VII. Property, plant and equipment**

Property, plant, and equipment are tangible goods that are held for use related to the main objective of the Center, including research activities and administrative and technical support activities; and are expected to be used during more than one accounting period.

Property, plant and equipment are stated at cost, net of accumulated depreciation and/or accumulated impairment losses, if any. Such cost includes the cost of purchase, costs directly attributable to bringing the asset to the location and condition necessary for use. Property, plant, and equipment acquired through non-monetary grants are recognized at the nominal amount at the date of the grant. Such grants are presented in the statement of financial position as deferred income and are taken into account as revenue on a systematic and rational basis over the lifespan of the asset. Property, plant,

## **Notes to the Financial Statements**

and equipment acquired through monetary grants are recognized at cost at the date of acquisition.

All new facilities provided by host countries to the Center or built for the use of the Center, which will revert to the host country in the event the Center ceases operations, are recognized as assets. The land is recognised at nominal value and the buildings at historical cost.

Subsequent expenditures are added to the cost of the property, plant, and equipment only if the expenditure improves the condition of the asset beyond its originally assessed standard of performance. All other subsequent expenditures are recognised as expenses of the period where incurred.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Land	Nil
Buildings	50 years
Infrastructure	40 years
Powerhouse	25 years
Laboratory and Scientific equipment	6 years
Furniture and equipment	6 years
Motor vehicles	5 years
Computer equipment	3 years

The land on which the headquarter is situated was allocated by decree (by provisions of the law). Government of Nigeria made the land available in 1967 for 99 years on leasehold arrangement for the use of IITA. IITA has elected to record both the asset and grant at a nominal amount.

For assets acquired with restricted funds, IITA depreciates the assets over the project life

Depreciation begins when the asset is available for use. Depreciation ceases at the earlier of the date that the asset is classified as held for sale, and the date the asset is derecognized. The depreciation charge for each period is recognized in the statement of activities.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from

its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of activities precisely in other operating income when there is a gain and, in the management, and general expenses when there is a loss.

The residual values, useful lives, and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## **VIII. Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is recognised in the statement of activities when it is incurred.

Intangible assets are subsequently measured using the cost model (cost less accumulated amortization and any accumulated impairment losses if any).

The useful lives of intangible assets are assessed to be finite.

The useful lives of an intangible assets are allocated on a straight-line basis as shown below:

### **Computer software - 3 years**

Intangible assets with finite lives are amortised over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates.

## **Notes to the Financial Statements**

The amortisation expense on intangible assets with finite lives is recognised in the management and general expenses in the statement of activities.

### **Research and development costs**

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Institute can demonstrate:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- Its intention to complete and its ability to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

### **VIII. Intangible assets (cont'd)**

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete, and the asset is available for use. It is amortised over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

### **IX. Inventories**

Inventories are supplies consumed in the operations of the Institute. They are valued at the lower of cost and net realisable value. The cost of inventories comprises all costs of purchase and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is assigned using weighted average method.

Inventory write down is recognized as an expense in the statement of activities. The amount of any reversal of previously written down Inventories arising from increase in net realisable value, is recognised as a reduction in the value of

inventories recognised as an expense in the period in which the reversal occurs.

The Institute uses a symmetric movement with rates: (0%, 25%, 50% and 20%) method in determining the amount of inventory provision. Rates applicable to each class are subject to periodic review.

### **X. Impairment of non - financial assets**

IITA assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Institute estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit's (CGU) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or Cash Generating Unit (CGU) exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed

its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been

## **Notes to the Financial Statements**

recognised for the asset in prior years. Such reversal is recognised in the statement of activities. Their subsequent recognition and measurement will depend on their classification.

### **XI. Financial instruments — initial recognition and subsequent measurement**

A financial instrument will be recognised in the statement of financial position when the Institute becomes party to contractual provisions of the instrument. At initial recognition,

financial instruments are either measured at amortised cost or fair value through profit or loss or other comprehensive income (OCI). This is recognised less the costs that are directly attributable to the acquisition or issue of the financial asset or the financial liability. The fair value at initial recognition will be the transaction price unless there is evidence to show that it is not the case.

The above classification depends on both the contractual characteristics of the financial instruments and the business model adopted for their management, which is determined at the time of initial recognition. Financial assets that are subsequently measured at either amortized cost or debt instruments at fair value through profit or loss or OCI, are subject to provisions for impairment.

The financial assets applicable to the Institute are:

- i) cash and cash equivalents and
- ii) loans and receivables.

#### **Subsequent measurement**

Following the initial recognition of financial assets and liabilities, their subsequent measurement and accounting treatment depends on their classification though there are a few exceptions to this. Either financial assets and liabilities that classified as fair value through profit or losses and other comprehensive income are measured at fair value or financial assets and liabilities at amortised cost. Amortised cost will be calculated using the effective interest rate.

#### **Financial assets at amortised cost**

Financial assets are classified at amortized cost only if both of the following criteria are met:

1. The objective of the entity's business model is to hold the asset in order to collect the contractual cash flows; and

2. The contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding:

(i) Principal is the fair value of the financial asset at initial recognition.

(ii) Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.

#### **Financial asset, at fair value through profit or loss (“FVTPL”)**

Financial assets that are classified at fair value through profit or loss are initially measured at fair value and subsequently carried at fair value on the statement of financial position with all changes in fair value gains and losses and foreign exchange gains and losses, recognized in the income statement in the period in which they occur. Transaction costs on these financial assets are expensed in the income statement.

In addition, a debt instrument that could meet amortized cost criteria can be designated and measured at FVTPL. Upon initial recognition if such designation significantly reduces or eliminates a measurement or recognition inconsistency, referred to as an “accounting mismatch”, which would arise from measuring assets or recognizing the gains and losses on them on different bases

#### **Financial assets, at fair value through other comprehensive income (“FVOCI”)**

Assets that are held for collection of contractual cash flows and for selling the

## **Notes to the Financial Statements**

financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.

Debt instruments are classified and subsequently measured at fair value through other comprehensive income only if both of the following criteria are met:

1. The objective of the entities' business model is achieved by both collecting the contractual cash flows and selling the financial asset; and
2. The contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding:
  - (i) Principal is the fair value of the financial asset at initial recognition.
  - (ii) Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

### **Impairment**

For IITA, and in accordance with IFRS 9, a loss allowance for expected credit losses is recognized on financial assets that are measured (i) at amortized cost (ii) at fair value through profit or loss or other comprehensive income.

The Institute assesses on a forward-looking basis the expected credit loss associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

### **Financial liabilities**

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

Other financial liabilities (including borrowings and trade and other payables) are measured at fair value at initial recognition and subsequently at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

The Institute derecognises financial liabilities when and only when, the Institute's obligations are discharged, cancelled or they expire. The difference between the carrying

amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

The impairment requirements of IFRS 9 apply to financial assets that are measured at amortized cost or FVTOCI. The determination of impairment losses and allowance has moved from an incurred credit loss model whereby credit losses are recognized when a defined loss event occurs under IAS 39, to an expected loss model under IFRS 9, where provisions for impairment are taken upon initial recognition of the financial asset based on expectations of potential credit losses at that time. Under IFRS 9 for financial assets originated or purchased on initial recognition, IITA recognizes an impairment loss at an amount equal to 12-month ECL.

## **Notes to the Financial Statements**

This shall continue if the credit risk at the reporting date has not increased significantly since initial recognition; therefore, was and shall remain in Stage 1. IFRS 9 requires the recognition of credit losses over the remaining life of the financial assets ("Lifetime expected credit losses") which are considered to have experienced a significant increase in credit risk (e.g., Stage 2) and for financial assets that are credit impaired at the reporting date (e.g., Stage 3). The lifetime expected credit losses represent all possible expected losses events over the expected life of a financial instrument.

### **Credit impaired**

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit impaired includes observable data about the following events:

#### **-Significant financial difficulty of the donor**

#### **Renegotiated financial assets**

Modifications occur when the contractual cash flows of a financial asset are renegotiated or otherwise modified. Some modifications result in derecognition of the existing asset and recognition of a new asset, while other

modifications do not result in derecognition. Modifications that result in derecognition are considered to be substantial modifications. An example of these modifications will be when IITA renegotiates an agreement with the donors.

### **XI. Financial instruments — initial recognition and subsequent measurement (cont'd)**

#### **Write-offs**

According to the IFRS 9, the gross carrying amount of a financial asset may be directly reduced when there is no reasonable expectation of recovering the financial asset in its entirety or a portion of it. As such, IITA can write off the write all receivables that have reached stage 3. The Institute can also on an ad-hoc basis examine any financial assets for write off.

#### **Cash and cash equivalents**

Cash is a financial asset because it represents the medium of exchange and is

therefore the basis on which all transactions are measured and recognised in the financial statements. Cash deposits in banks give IITA the right to receive cash or draw cheques or other instruments against a favourable balance. All cash and bank balances will be recognised at fair value which is the transaction price unless there are indications that it has been impaired. IITA maintains the bulk of its funds in US Dollars which helps in mitigating against exchange risks against local currencies in countries where the Institute operates.

### **Accounts receivable – Employees**

After initial measurement, accounts receivable from employees are subsequently measured at amortised cost using the effective interest rate (EIR) method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in the statement of activities. The losses arising from impairment are recognised in the statement of activities.

#### **Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired, or
- IITA has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement, and either
  - i. IITA has transferred substantially all the risks and rewards of the asset, or
  - ii. IITA has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

### **XII. Employee benefits**

#### **Short - term benefits**

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

## **Notes to the Financial Statements**

### **Post - employment benefit**

#### **Defined contribution plan**

##### **Pension**

IITA operates a defined contribution pension plan. Fixed contributions are paid to a separate entity. Once contributions are paid, IITA has no further obligation to the employee. Obligations for contributions to defined contribution plans are recognized as personnel cost in statement of activities in the periods during which services are rendered by employees. Staff contributions to the scheme are funded through payroll deductions.

##### **Defined benefit plan**

##### **Repatriation benefit**

IITA provides repatriation benefits to its internationally recruited staff. These benefits are payable on the return of the employee to his country of origin. The cost of providing benefits under the post retirement benefit plan is determined separately using the projected unit credit method. The benefit is discounted using the effective interest rate (EIR) at the date of reporting. The benefit is amortised and recorded as a liability, the unwinding of the discount is recorded as an interest cost and the current service cost are recorded as personnel cost in the statement of activities.

Re - measurements, comprising of actuarial gains and losses, are recognized immediately in the statement of financial position with a corresponding debit or credit to undesignated fund through other comprehensive income in the period in which the gains or losses occur. Re - measurements are not reclassified to the statement profit or loss in subsequent periods.

Interest cost is calculated by applying the discount rate to the defined benefit liability. The Institute recognises the following changes in personnel cost under 'management and general expenses' in the statement of activities:

- Current service cost
- Interest cost

### **Other long term employee benefits Severance benefits**

IITA pays severance benefits to its employees on the expiration of their respective contracts. The benefit is measured as the excess of 10% of gross emoluments over IITA contribution to the employee's pension fund.

### **XIII. Prepayment**

Prepayments are payments made in advance for services to be enjoyed in future. The amount is initially capitalised in the reporting period in which the payment is made and subsequently amortised over the period in which the service is to be enjoyed.

### **XIV. Interest income**

Interest income is recognised in the statement of activities when it is probable that economic benefits will flow to the Institute and that amount can be reliably measured.

### **XV. Deferred income – Donors**

These include grants received from donors for which conditions are not yet met and funds received in advance for restricted grants.

"Deferred income – Donors" are classified as follows:

"Unrestricted grants: are those received from the unconditional transfer of cash or other assets to the Center.

Restricted grants: are those received from a transfer of resources to the Center in return for future compliance relating to the operating activities of the Center. Restricted Grants include W1/W2, W3, and Bilateral projects.

### **XVI. Indirect Cost Recovery**

"The indirect cost recovery represents the overhead cost recovered from the restricted projects based on rates agreed and as stated in each project agreement with donors. Calculation of indirect cost recovery rate is based upon Section 10 of CGIAR Financial Guidelines Series, No. 5, "Cost Allocation Guidelines".

### **XVII. Net assets**

Net assets comprise the residual interest in the Institute's assets after liabilities are deducted. They are classified as either undesignated or designated:

## **Notes to the Financial Statements**

Undesignated net assets: Their use is not designated by IITA Management for specific purposes.

Designated net assets: Those that have been restricted by IITA as reserve for replacing property, plant and equipment, intangible assets and other activities or purposes.

## **4 Significant accounting judgments, estimates and assumptions**

The preparation of IITA's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. IITA has identified the following areas where significant estimates and assumptions are required, and where if actual results were to differ, may materially affect the financial position or financial results reported in future periods. Further information on each of these and how they impact the various accounting policies are described in the relevant notes to the financial statements.

### **Judgements**

No judgment has been applied by the management of IITA in the process of applying the accounting policies.

### **Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. IITA based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of IITA. Such changes are reflected in the assumptions when they occur.

### **Impairment of financial assets**

The Institute reviews the estimation for impairment of receivable at the end of each reporting period and reflects the changes on a prospective basis.

## **Useful life of Property, Plant and Equipment and Intangible Assets**

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property, plant and equipment and intangible assets will have an impact on the carrying value of these items.

### **Defined benefit plan**

#### **Repatriation benefit**

The cost of the defined benefit plan namely: the repatriation benefit is determined using the projected unit credit method (PUCM) to determine the present value of the obligation at the end of each reporting period. The PUCM involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate and contract renewal period. Due to the complexities involved in the valuation and its long-term nature, other long term employee obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate to use, management's assumptions and yields on United States of America (USA) Treasury bills were used.

The assumptions used in estimating the obligation are:

- flight ticket increment rate
- the number of family members
- contract period

	<b>158</b>	<b>(26)</b>

**6. Program-related expenses**

Program related expenses are expenses incurred by main research, research support, training and information services as described below:

- i) Research programs: cover expenses on research for development in sub-Saharan Africa.
- ii) Research support programs: include genetic resource and biometrics units, farm operations, plant growth facilities, post-harvest engineering, analytical laboratory, and research management.
- iii) Training costs: include training offices, fellowships, workshops, seminars, allowances to trainees and training-related travel.
- iv) Information services: cover the costs of publication of annual reports and technical bulletins, translation and printing of various public information activities and library service.

Program-related expenses incurred as of 31 December are as follows:

	<b>2021</b> \$'000	<b>2020</b> \$'000
Research - programs and support	98,813	84,237
Training	4,068	2,473

Receivables from BIP	489	241
Other receivables (10.3)	2,398	2,201
	<b>38,435</b>	<b>31,181</b>

**10.1 Accounts receivable - Donors**

	31 December <b>2021</b> \$'000	31 December <b>2020</b> \$'000
--	--------------------------------------	--------------------------------------

As at December 31, accounts receivable from donors consist of:

	31 December <b>2021</b> \$'000	31 December <b>2020</b> \$'000
Unrestricted	—	—
CRP windows 1&2	5,541	2,940
CRP window 3	5,303	2,049
Bilateral	11,694	9,010
Non-CRP	7,913	8,788
Challenge programs	219	422
	30,670	23,208
Loss Allowance	(1,641)	(1,641)
	<b>29,029</b>	<b>21,567</b>

Account receivables from donors are non-interest bearing and are generally on terms stated in the contract.

At 31 December 2021, IITA carried out an impairment assessment on all outstanding receivables from donors using Expected Credit Loss (ECL) method in accordance with IFRS 9 and an amount of \$1,641 was found to be impaired and provided for. As at 31 December 2020, Accounts receivables from donors with an initial carrying value of \$1,641 were impaired and fully provided for.

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

**10.1 Accounts receivable – Donors (cont'd)**

Changes in loss allowances was recognised in management and general expenses in the statement of activities.

See Note 21 on credit risk of accounts receivables from donors, which states how management manages its receivables from donors.

**10.2 Accounts receivables – Employees**

	31 December <b>2021</b> \$'000	31 December <b>2020</b> \$'000
accounts receivable from employees consist of:		
Staff loans	787	850
Children education advance	–	24
Staff salary advance	8	16
	<b>795</b>	<b>890</b>

**10.3 Accounts receivable – Others**

	31 December <b>2021</b> \$'000	31 December <b>2020</b> \$'000
As at December 31, accounts receivable: Others consist of:		
Receivables from stations	59	116
Other receivables	141	10
	<b>200</b>	<b>126</b>

**11. Prepayments**

	31 December <b>2021</b> \$'000	31 December <b>2020</b> \$'000
Prepaid expenses as at December 31 consist of:		
Prepayments	2,198	2,075
Deposit	16	24
	<b>2,214</b>	<b>2,099</b>

**12. Inventories**

	31 December <b>2021</b> \$'000	31 December <b>2020</b> \$'000
Stores on hand		
Other Prepayments	3,297	3,115
Allowance for obsolescence	89	228
	<b>(871)</b>	<b>(855)</b>
	<b>2,515</b>	<b>2,488</b>

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

In 2021 \$17, (2020 (\$160)) was recognized as expense for inventories carried at net realisable value. This is treated under management and general expenses in the Statement of Activities.

In the current year, rates for obsolescence provision was adjusted to reflect current reality of inventory movement on which the rate estimates are based.

In 2021 we reviewed, the rates of provisions for obsolescence and made appropriate adjustments. This rate adjustment resulted in an increase of obsolescence allowance by \$17 when compared to that of 2020.

Payable to BIP	—	—
Other payables (16.3)	2,750	2,704
	<b>41,294</b>	<b>39,086</b>

Terms and conditions of the above financial liabilities:

Trade and other payables are non-interest bearing and are normally settled on demand.  
For explanations on the Institute's liquidity risk management processes, refer to Note 23

**16.1. Donors**

Payables to donors as at December 31 consist of:

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
Total Unrestricted	—	—
Total CRP Windows 1 & 2 - Exhibit V	298	799
Total CRP Window 3 - Exhibit VI	16,991	17,187
Total Bilateral - Exhibit VII	3,887	1,454
Total Challenge Programs - Exhibit VIII	33	—
Total Non-CRP Activities - Exhibit IX	7,027	6,887
	<b>28,236</b>	<b>26,327</b>

**16.2 Accounts payable – Employees**

Accounts payable to employees as at December 31 consist of:

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
Vacation benefits	1,494	2,045
Pension payable	193	294
Staff remuneration	8,350	7,513
	<b>10,037</b>	<b>9,852</b>

Employee and other Taxes

Withholding tax payable	1	12
Payroll taxes	149	191
	150	203

**Total**

**10,187**

**10,055**

Staff remuneration consist of amounts due to IRS staff who receive their salaries through their IITA staff personal accounts awaiting instructions to transfer to their respective personal bank accounts.

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

**16.3 Other payables**

Other accounts payable as at December 31 consist of:

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
Financial liabilities		
Accrued liabilities	39	15
Vendors	2,711	2,689
	<b>2,750</b>	<b>2,704</b>

**17 Employee benefit liability**

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
Repatriation benefit (17.1)	1,378	1,510
Severance benefit	885	718
	<b>2,263</b>	<b>2,228</b>

**17.1** IITA provides repatriation benefits to its internationally recruited staff. These benefits are payable on the return of the employee to his/ her return to their country of origin at the end of contract with IITA. The following tables summarise the components of net benefit expense recognised in the statement of activities and other comprehensive income.

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
Current service cost	30	248
Interest cost	29	19
<b>Defined benefit expense</b>	<b>59</b>	<b>268</b>

Re-measurement (gain)/losses recognized in other comprehensive income:

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
31 December 2021		(124)
31 December 2020		82

The factor below contributed to the remeasurement (gain)/losses on the repatriation benefit:

**Changes in assumptions**

31 December 2021	(124)
31 December 2020	82

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

**17. Employee benefit liability (cont'd)**

Changes in the present value obligation reported in the statement of financial position is as follows:

	31 December <b>2021</b> (\$'000)	31 December <b>2020</b> (\$'000)
Present value of obligation at the beginning	1,510	1,324
Recognised in statement of activities:		
Interest cost	29	19
Current service cost	30	248
Benefit paid	(68)	(164)
Recognised in other comprehensive income:		
Remeasurement gains	(124)	82
<b>Present value of obligation at the end</b>	<b>1,377</b>	<b>1,510</b>

The key economic assumptions (per annum) used in determining gratuity plan benefit obligations for the repatriation benefit plan are shown below:

	31 December <b>2021</b> %	31 December <b>2020</b> %
Discount rate	1.89	1.46
Ticket fare growth rate	5	5

Repatriation benefit payable in the future was discounted using the interest rate on US treasury bills. Factors considered in the discounting include contract tenure of the employees and ticket prices. A quantitative sensitivity analysis for significant assumption on the repatriation benefit as at 31 December 2021 is as shown below:

	Discount rate	
	1% Increase \$'000	1% Decrease \$'000
Impact on the defined benefit obligation	(67)	(39)
	Ticket fare	
	1% Increase \$'000	1% Decrease \$'000
Impact on the defined benefit obligation	(136)	73

Sensitivity analysis has been performed using automated actuarial methods currently in use.

## **Notes to the Financial Statements**

### **17. Employee benefit liability (cont'd)**

A quantitative sensitivity analysis for significant assumption on the repatriation benefit as at 31 December 2020 is as shown below:

	Discount rate	
	1% Increase	1% Decrease
	\$'000	\$'000
Impact on the defined benefit obligation	(351)	(320)
	Ticket fare	
	1% Increase	1% Decrease
	\$'000	\$'000
Impact on the defined benefit obligation	(261)	261

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumption occurring at the end of the reporting period. The sensitivity analysis is based on change(s) in significant assumptions, keeping all other assumptions constant. The sensitivity analysis may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

The Institute is committed towards ensuring that all obligations arising from the post-employment benefit in the foreseeable future are settled.

### **18. Deferred income from donors**

	31 December <b>2021</b>	31 December <b>2020</b>
	(\$'000)	(\$'000)
At 1 January	1,257	2,289
Deferred during the year	840	498
Released to the statement of activities	(742)	(1,530)
At 31 December	1,355	1,257
Current	840	(1,112)
Non-current	515	2,369
<b>Total</b>	<b>1,355</b>	<b>1,257</b>

Deferred income is raised when assets from restricted sources is capitalised and will be amortized over the economic useful life of the related asset(s). Amount deferred during the year is equivalent to the value of fixed assets procured from restricted funds in the year. It will be amortised over the useful life of the assets.

### **19. Net Assets**

Net assets are the residual interest in the Institute's assets remaining after liabilities are deducted. These are classified as follows:

#### **(a) Undesignated net assets**

That part of net assets not designated by the Institute's Board of Trustees for specific purposes.

#### **(b) Designated net assets**

That part of net assets designated by the Institute's Board of Trustees for specific purposes.

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

- Designation for future acquisition/replacement of property, plant and equipment and intangible assets
- Designation of net investment in property and equipment

Portion of the unrestricted net assets designated to reflect net investment in property, plant and equipment and intangible assets.

The following is a summary of net assets for the year ended 31 December:

	31 December 2021 (\$'000)	31 December 2020 (\$'000)
Total undesignated	7,801	7,629
Designated:		
Acquisition and replacement of property and equipment	10,563	722
Institutional stability and research for development programs	1,000	1,000
Net investment in intangible assets	856	1,126
Net investment in property, plant and equipment	17,270	26,841
Other Comprehensive Income	127	3
Total designated	29,816	29,692
Total net assets	37,616	37,321

**20. Fair value measurement**

Set out below is a comparison by class of the carrying amounts and fair values of IITA's financial instruments, other than those with carrying amounts that are reasonable approximations of fair values:

	Carrying amount		Fair value	
	2021	2020	2021	2020
<b>Financial assets</b>				
Accounts receivable – Employees staff loans	478	521	465	510

The management assessed that cash and short-term deposits, accounts receivable (CGIAR Centers and others), accounts payable (CGIAR Centers and others) approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of loans receivable from employees is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair value of the employee loans was determined using the Discounted Cash Flow (DCF) model based on discount rate that reflects the borrowing rates as at the end of the reporting period. The non-performance risk as at 31 December 2021 was assessed to be insignificant.

The following table provides the fair value measurement hierarchy of the Institute's financial assets and liabilities:

Quantitative disclosures fair value measurement hierarchy for assets as at 31 December 2021 and 31 December 2020:

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

	31 December 2021	Total	Fair value measurement using:		
			Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs
		\$'000	\$'000	\$'000	\$'000
<b>Financial assets for which fair values are disclosed:</b>					
<b>Accounts receivable - Employees</b>		<b>478</b>	—	<b>465</b>	—

**31 December 2019**

Financial assets for which fair values are disclosed:

<b>Accounts receivable - Employees</b>	<b>521</b>	—	<b>510</b>	—
--	------------	---	------------	---

During the reporting period ended 31 December 2020 and 31 December 2019, there were no transfers between Level 1 and Level 2.

**21. Related party disclosures**

Compensation of key management personnel

	31 December 2021 (\$'000)	31 December 2020 (\$'000)
Short-term employee benefits	6,103	6,558
Repatriation benefits	235	152
Pension benefits	1,186	1,273
	<b>7,524</b>	<b>7,983</b>

The amounts disclosed in the table are amounts recognised as an expense during the reporting period for key management personnel. Short-term employee benefits are emoluments paid within the year.

**21. Related party disclosures (cont'd)**

**Transactions with key management personnel**

**Directors' loan**

For all years presented, the loans given to the key management personnel have been disclosed below:

	2021 \$'000	2020 \$'000
<b>Loans to directors</b>	<b>105</b>	<b>35</b>

## **Notes to the Financial Statements**

### **22. Financial risk management policies and objectives**

IITA has a robust risk management and mitigation strategy in place, and it is managed by a risk management committee that reports to senior management. Risk management in the Institute has been cascaded to all levels of project management through training programmes involving staff at all levels. IITA faces three main risks in relation to financial instruments namely: credit risk, market risk (foreign currency risk) and liquidity risk.

#### **Credit Risk**

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Institute is exposed to credit risk from its operating activities (primarily for accounts receivable: donors) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

#### **Account receivables: Donors and employees**

IITA main sources of funding is by way of grants from several local and international cooperating partners. IITA faces the risk of some of the funders failing or refusing to release funding that has already been committed to IITA. There are many reasons as to why funders may fail to meet their obligations some, of them being: them facing their own liquidity challenges, failure by IITA to meet its own contractual obligations, over expenditures, disagreements and misunderstanding. IITA also grants loans and advances to staff for various activities. There is a risk that staff may resign from IITA without settling their loans. IITA mitigates this risk through the following measures:

- Discouraging pre-financed projects
- Adhering to agreements with funding agencies
- Managing budgets well to reduce the incidents of over expenditures
- Regular reporting and feedback from sources of funding to reduce disagreements and misunderstanding

The requirement for an impairment is analysed at each reporting date on an individual basis for donors. The calculation is based Expected Credit Loss (ECL) model. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in Note 10. The Institute does not hold collateral as security. The Institute evaluates the concentration of risk with respect to donor receivables as low, as its donors are located in several jurisdictions and industries and operate in largely independent markets.

#### **Financial instruments and cash deposits**

Credit risk from balances with banks and financial institutions is managed by IITA's treasury department in accordance with its policy. Funds are deposited only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed and approved by IITA management on an annual basis. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through a counterparty's potential failure to make payments. The balances below are held in banks for operational purposes.

The credit quality of financial assets is assessed by reference to external credit ratings information about counterparty default rates.

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

	31 December 2021 \$'000	31 December 2020 \$'000	31 December 2019 \$'000	31 December 2018 \$'000

BBB+	5,675	—	—	—
CC	—	1,136	—	3
CCC+	425	—	—	—
CCC	2,096	1,608	7	—
Unrated	346	547	1,206	233
	<b>12,768</b>	<b>17,193</b>	<b>10,910</b>	<b>7,076</b>

Cash on hand has been excluded from this rating.

Ratings for the banks were obtained from the Fitch ratings

Funds held in financial institutions with ratings below BBB+ are those held in local banks based on some Donors' restriction to maintain the funds with banks in the country of project implementation. In some countries, there are no banks rated BBB+ and above.

**Credit rating keys:**

A : A financial institution of good financial condition and strong capacity to meet its obligations as and when they fall due. Adverse changes in the environment (macro-economic, political and regulatory) will result in a medium increase in risk attributable to an exposure to this financial institution. However, financial condition and ability to meets its obligations as and when they fall due should remain largely unchanged.

AA : A financial institution of very good financial condition and a strong capacity to meet its obligations as and when they fall due. However, financial condition and ability to meet obligations as and when they fall due should remain strong.

B: A financial institution where financial condition is weak, but obligations are still being met as and when they fall due as more than one weakness and may require external support, which may not be assured. Adverse changes in the environment (macro-economic, political, and regulatory) will increase risk significantly.

BB : Financial condition is satisfactory and ability to meet obligations as and when they fall due exist. Adverse changes in the environment (macro-economic, political, and regulatory) will increase risk significantly.

BBB : A financial institution of satisfactory financial condition and adequate financial capacity to meet its obligations as and when they fall due. It may have one major weakness which, if addressed, should not impair its ability to meets obligations as and when they fall due. Adverse changes in the environment (macro-economic, political and regulatory) will result in a medium increase in risk attributable to an exposure to this financial institution.

C : Near default. A default or default-like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired.

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

## **Notes to the Financial Statements**

CC : Very high levels of credit risk. Default of some kind appears probable.

CCC : Substantial credit risk. Very low margin for safety. Default is a real possibility.

A + (plus) or – (minus) may be added to a rating. A plus added to a rating indicates that the rating is higher than A. A minus indicates that the rating is lower than A. When no plus or minus is added to the rating, this means that the rating is unlikely to change. A positive or negative added to a rating is therefore a reflection of the rating outlook.

### **Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity price risk.

IITA is only exposed to foreign currency risk.

### **Foreign Currency risk**

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. IITA operates in 13 field stations in Africa and Europe. The main operating and reporting currency is the US. dollars (US\$). The bulk of its funding from international cooperating partners is received in US. dollars (US\$). Each of the field stations where IITA operates has its unique economic challenges. Most of the stations in Africa are operating in high inflation environment with volatile exchange rates as a result of this, IITA is exposed to foreign currency risks.

Through its normal operations, IITA is exposed to nineteen (19) currencies. To mitigate against volatility in foreign exchange fluctuations, IITA keeps the bulk of its funds in US. dollars (US\$) and only releases smaller amounts in tranches to meet operational needs. The Institute's exposure to foreign currency changes for all other currencies are not material.

### **Liquidity Risk**

This is the risk that the Institute will not have enough funds to meet its obligation to pay implementing partners and suppliers of goods and services. IITA hedges against this by managing a tight budget process and ensuring that only planned activities are carried out.

The table below summarises the maturity profile of the Institute's financial liabilities based on contractual undiscounted payments:

Year ended 31 December 2021	On demand \$'000	Less than 3 months \$'000	3 to 12 years \$'000	1 to 5 years \$'000	Total \$'000
Accounts payable

Year ended 31 December 2020					
Accounts payable					
CGIAR Centers	530	–	–	–	530
Other payables	3,552	–	–	–	3,552

**International Institute of Tropical Agriculture  
Annual Reports and Financial statements  
for the year ended 31 December, 2021**

**Notes to the Financial Statements**

**23. Commitments and contingencies**

At 31 December 2020, the Institute had no commitments to other parties for the buildings under construction as the construction works in Bukavu Congo that were under work in progress were commissioned. However, all contingencies which are relevant in assessing the Institute's state of affairs have been taken into consideration in the preparation of these financial statements.

**24. Events after the reporting period**

We have continued monitoring events after the reporting period, and we can report that there are no events that have a material effect on the financial statements. This is despite the effects that COVID 19 had on our operations in the year 2021. Our funders have continued to honor their obligations. The conflict between Russia and Ukraine has had no major direct impact on IITA. However, IITA will continue to monitor donor priorities and any economic parameters (currency exchange, interest, and inflation rates) as a result of the conflict.

**25. Staff Numbers**

The number of employees in the Institute as at December 2021 was 238 Internationally Recruited Staff (189 full time IRS, 32 Consultants and 17 Visiting Scientists) and 1,311 Nationally Recruited Staff across all IITA Stations.

Broadening the scaling of BXW management in East and Central Africa	01/11/2018 - 31/12/2020	40	43	-	43
Asergillus flavus strain characterization to develop and Aflasafe product for Cameroon.	15/11/2017 - 25/02/2018	10	10	-	10
Science-driven Evaluation of Legume Choice for Transformed Livelihoods (Legume SELECT)	01/07/2018 - 30/04/2022	898	335	93	428
GLTEN Africa: Cropping system diversity, a cornerstone of sustainable intensification.	01/07/2018 - 30/06/2021	515	358	141	499
Development of simple assay techniques for nutritious cowpea varieties, and establishment of cowpea dense planting and high nutrient cowpea	01/06/2018 - 31/05/2021	622	122	-	122
The Pan-African Soybean Variety Trial Program in Malawi (PASVTP)	20/12/2017 - 31/05/2021	243	148	84	232
Production of local and hybrid plantains for interplanting in newly established rubber plantations	01/06/2018 - 31/05/2019	67	79	(6)	73
GWAS using cowpea mini core for photosynthetic traits under heat stress conditions	15/03/2018 - 31/05/2018	20	11	-	11
Enabling agribusiness development for scaling quality cassava seed systems for control of major viral diseases in Rwanda and Burundi	01/04/2019 - 31/03/2022	1,117	692	232	924
Sustainable insect pest management for cowpea in West Africa	01/01/2019 - 30/06/2020	70	69	-	69
Microbial diversity collection from yam	23/05/2018 - 31/12/2021	101	95	16	111
Support to the implementation of the Long-term EU-AU Research and Innovation Partnership for Food and Nutrition Security and Sustainable Ag	01/11/2018 - 31/10/2022	117	-	-	-
Potential of entomopathogenic fungi as biopesticides of cassava whitefly	04/01/2019 - 31/03/2020	8	9	1	10
Promotion of Climate Smart Agricultural Technologies for improved Rural Livelihoods and Food Security in Borno State, Nigeria	07/01/2019 - 06/01/2020	100	99	11	110
Survey and Management of potato pests in Uganda	07/11/2018 - 31/12/2019	100	87	-	87
