ABOUT WORLD AGROFORESTRY

World Agroforestry (ICRAF) is a centre of scientific excellence that harnesses the benefits of trees for people and the environment. Leveraging the world's largest repository of agroforestry science and information, we develop knowledge and practices for farmers' fields and the global sphere to ensure food security and environmental sustainability.

ICRAF is the only institution conducting globally significant agroforestry research in – and for – all the developing tropics. Knowledge produced by ICRAF allows governments, development agencies and farmers to use the power of trees to make farming livelihoods more environmentally, socially and economically sustainable at scale.

Our vision

An equitable world where all people have viable livelihoods supported by healthy and productive landscapes.

Our mission

To harness the multiple benefits trees, provide for agriculture, livelihoods, resilience and the future of our planet, from farmers' fields through to the continental scale.

Our research

World Agroforestry focuses on four priority research and development themes. By combining more productive trees with more resilient and profitable agricultural systems and a sound understanding of the health of the soil, land and people that is part of 'greener' and better-governed landscapes, the organization offers valuable and timely knowledge products and services to the global community. The priority themes do not operate as isolated silos of staff or of bodies of work; they connect through cross-thematic initiatives around larger opportunities. These include tree crop commodities and land restoration, nutrition, bioenergy, water utilization, social inclusion and demand-driven interactive engagement processes.

Our regional programs

World Agroforestry works throughout the Global South with footprints in Africa, Asia and Latin America. Each office oversees, plans, coordinates and supports initiatives within their region, and maintains liaisons and partnerships with governments, development partners, learning institutions and civil society.

Our partners

World Agroforestry's partnerships are based on a clear recognition of the value added through working jointly with partners and sharing our strengths to achieve targeted outcomes. We partner with academia, research institutions, national agricultural research organizations, private-sector organizations, governments and non-governmental organizations to deliver research projects with the greatest potential impact.

The Center for International Forestry Research (CIFOR) and World Agroforestry (ICRAF) merger

On 1 January 2019, World Agroforestry merged with the Center for International Forestry Research to create the world's leading research and development organization focused on forestry and agroforestry.

The Center for International Forestry Research (CIFOR) and World Agroforestry (ICRAF) envision a more equitable world where trees in all landscapes, from drylands to the humid tropics, enhance the environment and well-being for all. CIFOR-ICRAF is a non-profit science institution that generates and applies evidence to meet today's most pressing challenges, including energy insecurity and the

ABOUT WORLD AGROFORESTRY (continued)

climate and biodiversity crises. Over a combined total of 65 years, we have built vast knowledge on forests and trees outside of forests in agricultural landscapes (agroforestry). Using a multidisciplinary approach, we seek to improve lives and to protect and restore ecosystems. Our work focuses on innovative research, partnering for impact, and engaging with stakeholders on policies and practices to benefit people and the planet.

Together we provide the research, policy development and bespoke solutions needed to help forward-thinking countries, communities and companies improve land management, livelihoods, sustainability and resilience.

We provide actionable, game-changing solutions to five major global challenges:

- Deforestation and biodiversity loss
- A climate in crisis
- Transforming food systems
- Unsustainable supply and value chains
- Extreme inequality

Our approach to solving these challenges includes three innovations that will deliver game-changing solutions in response to global and national challenges and opportunities:

- Transformative Partnership Platforms – alliances focused on critically important challenges
- Engagement Landscapes – geographic locations where we carry out concentrated, long-term transformative work with diverse and committed partners
- Flagship Products – initiatives that provide action-oriented insights into key global issues

Supported by our new institutional structure, our long-established partnerships and the diverse skills of our more than 700 staff, we provide actionable solutions to address local challenges and opportunities while solving global problems.

About our leadership

With our effective merger, we are governed by a Common Board which possesses diverse skills in areas such as agroforestry and forestry science, natural resource management, audit, finance and risk management, policy and governance.

The primary mandate of the Common Board of Trustees is to provide governance oversight to ensure that ICRAF, CIFOR and the CIFOR-ICRAF effective merger function to the highest standard. In order to do this effectively, the Common Board of Trustees has delegated the day-to-day management of the Centres to the Directors General who are assisted by senior management teams. Both groups are actively working towards a single leadership team and unified policies, processes and systems.

Some facts and figures

Together, CIFOR and ICRAF have a combined annual budget of US\$ 100+ million and employ about 700 people in more than 20 countries throughout the Global South. We will continue to maintain our headquarters in Indonesia and Kenya, respectively. The strong relationships with our host countries are critical and allow both organizations to continue operating as they have, with the networks they have and with the cooperation and support of key global tropical forestry and agroforestry countries.

BOARD CHAIR'S STATEMENT

It is heartening to see that many governments are rolling back pandemic driven restrictions and there has been a concerted effort across the globe on vaccinations, health plans and policies to combat and end the pandemic. However, with the emergence of the COVID-19 variants, it is unclear when and how the pandemic will end, but the outcome will largely depend on co-operation of governments, equitable access to vaccines and for us citizens to continue to remain vigilant and practice covid appropriate behaviour. CIFOR-ICRAF offices largely remained closed with staff working from home during the year, following local government regulations in 2021 as well. It has been heartening to see the dedication of the staff to carry out the various projects in these trying circumstances. On behalf of the Board, I express my gratitude to the management and staff.

Change of guard

The end of 2021 also marked a change in leadership of the CIFOR-ICRAF Board and I am delighted to take charge from my esteemed colleague and preceding Chair, Claire O Connor. I look forward to working with the Board and management to navigate CIFOR-ICRAF through some interesting and challenging times ahead.

Achievements and Strategic Outlook

CIFOR-ICRAF marked two successful completions in 2021. The three-year merger process delivered on all its targets, and the CGIAR Research Program on Forests, Trees and Agroforestry (FTA) wrapped up a decade of impact through partnership, with 26-133 million ha of forests better protected (representing up to 125 Gt of avoided CO₂ emissions, another 2-35 million ha brought under restoration, and millions of people better with improved food security and nutrition and the means to exit poverty. CIFOR-ICRAF is implementing its 10-year strategy (2020-2030) through three holistic approaches - Transformative Partnership Platforms, Engagement Landscapes, and Flagship Products - and five integrated themes (trees, climate, soils, markets and governance), with work being carried out through some 30 country offices across Africa, Asia and Latin America, supported by harmonized internal processes and communicated through a dynamic new website (cifor-icraf.org).

In 2021 we continued to develop solutions to five interconnected global challenges: deforestation and biodiversity loss, the climate crisis, broken food systems, unsustainable supply and value chains, and inequality for women, indigenous peoples and vulnerable rural communities. Achievements included informing national policies in Peru and Viet Nam, applying new technologies in the Congo Basin and India, and co-creating solutions with partners and communities in Indonesia and Cameroon. The Global Landscapes Forum has now connected over one billion people and continues to draw record audiences to both virtual and in-person events. And momentum continues to build for Resilient Landscapes as it catalyses engagement between science and business, finance, government and civil society, with new projects starting in Papua New Guinea, Serbia and Brazil.

Financial Performance

ICRAF's revenues in 2021 were USD 47.77m (2020: USD 44.58m) while expenditures stood at USD 48.13m (2020: USD 45.74m) leading to an operational deficit of USD 0.37m. Adjusted for financial expenses, the total comprehensive deficit for the year stood at USD 0.62m. This included a spend of USD 0.57m toward merger related activities, which the Board had set aside in 2019. ICRAF remains in good financial health.

Future Outlook

While CIFOR and ICRAF continue to remain independent legal entities, a functional merger of the Centres has been achieved with a number of efficiency and operational gains that have been made due to the merger. The Board remains confident in the long-term prospects and continued relevance and importance of CIFOR-ICRAF. I thank my fellow Board of Trustees for dedication and commitment and in making themselves available at all times working closely with management in 2021.

Getachew Engida
Chair, Board of Trustees
World Agroforestry.

BOARD STATEMENT ON RISK MANAGEMENT AS AT 31 DECEMBER 2021 AND FOR THE YEAR ENDED 31 DECEMBER 2021

ICRAF's Board of Trustees has responsibility for overseeing the effectiveness of the risk management system that management has put in place to identify, manage and monitor significant risks to the achievement of ICRAF's business objectives, and to ensure alignment with CGIAR principles and guidelines as adopted by the CGIAR Centres. While the full Board has responsibility for risk, the Audit and Risk Management Committee has oversight of the risks in the Centre.

The Board has adopted the harmonized CIFOR-ICRAF Risk Management Policy in 1 December 2020, as part of the CIFOR-ICRAF merger. The policy is based on the International Organization for Standardization (ISO) 31000:2018 on Risk Management and the CGIAR System Risk Management Framework. The policy outlines the responsibility and accountability of the Board of Trustees, the Management and Centre staff. The policy also outlines reporting and assurances needed from Centre staff, the Internal and External Auditors and applies to all activities, business processes, policies, procedures, individuals, property and locations that comprise the ICRAF, and is mandatory for all ICRAF staff to follow. The policy has been communicated to all staff. The Board also approved for the statement on Risk Appetite to be included in the policy.

The Board reviews the risks during the year to ensure that adequate attention is being paid to high risks and management has put in place adequate risk mitigation strategies. In line with this practice, the Board receives updates on the Centre's financial status during and between Board meetings.

The CIFOR-ICRAF risk register was reviewed by Management in March and October 2021 following an analysis of risks, the potential severity of their impact on the Centre. The risk register has 9 risk items. Management also reviewed the mitigation measures and controls in place.

Risk categories in the register include Governance, People, Finance, Reputational, infrastructure/Capability and Research risks and cover all of ICRAF's activities. These risks are as dynamic as the environment in which CIFOR operates and represent the potential for loss resulting from external events, human factors or inadequate or failed internal policies, processes or systems.

The Board is satisfied with the attention paid by management to risk management and is comfortable that the Board of Trustees' risk governance is aligned with CGIAR principles and sufficient to identify, manage and monitor key risks to ICRAF's operations.

Getachew Engida,
Chair, Board of Trustees
World Agroforestry

.....June 2022

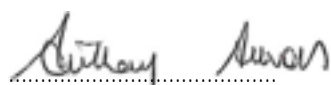

STATEMENT OF MANAGEMENT'S RESPONSIBILITIES

It is the responsibility of ICRAF's Management to prepare financial statements for each financial year that give a true and fair view of the Centre's financial position at the end of the financial year, and its profits or losses for that year. It is also Management's responsibility to ensure that the Centre maintains proper accounting records that are sufficient to show and explain all transactions undertaken during the year and disclose the Centre's financial position with reasonable accuracy. In addition, Management is responsible for safeguarding the Centre's assets and for taking reasonable steps to prevent and detect fraud and error.

ICRAF Management accepts responsibility for the preparation and presentation of these financial statements in accordance with the International Financial Reporting Standards (IFRS). Management also accepts responsibility for:

- i. designing, implementing, and maintaining all internal controls it deems necessary to enable the presentation of financial statements that are free from material misstatement, whether due to fraud or error.
- ii. selecting suitable accounting policies and applying them consistently; and
- iii. making accounting estimates and judgements that are reasonable in the circumstances.

Approved by the ICRAF Management onJune 2022 and signed on its behalf by:

Anthony Simons
Director General (ICRAF)

Kumar Tumuluru
Director, Corporate Services (ICRAF)

REPORT OF THE INDEPENDENT AUDITORS

TO THE BOARD OF TRUSTEES OF WORLD AGROFORESTRY (ICRAF)

Opinion

We have audited the accompanying financial statements of the World Agroforestry (ICRAF) set out on pages 9 to 48, which comprise the statement of financial position as at 31 December 2021, the statement of financial activity and other comprehensive income, statement of changes in net assets and statement of cash flows for the year then ended and notes and appendices to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the financial statements present fairly, in all material respects, the financial position of World Agroforestry (ICRAF) as at 31 December 2021 and its financial performance and cash flows for the year then ended in accordance with the International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of World Agroforestry (ICRAF) in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and have fulfilled our other responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Matter

The financial statements for the year ended 31 December 2020 were audited by Deloitte & Touche who expressed an unmodified opinion on those statements on 21 May 2021.

Other Information

The management is responsible for other information. The other information comprises the Management's Report as required by the organization's accounting policies. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The management is responsible for the preparation and fair presentation of the financial statements in accordance with the International Financial Reporting Standards (IFRS); this includes determining that the accounting policies are an acceptable basis for the preparation of the accompanying financial statements in the circumstances, and for such internal control as management determines is necessary to enable the preparation of the accompanying financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing the organization's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the organization either intend to liquidate the organization or to cease operations, or have no realistic alternative but to do so.

The Board of Trustees is responsible for overseeing the organization's financial reporting processes.

REPORT OF THE INDEPENDENT AUDITORS (CONTINUED)

Auditor's Responsibilities for the Audit of the Financial Statements

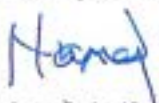

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with International Standards on Auditing (ISAs) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of the management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the organization's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the organization to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner responsible for the audit resulting in this independent auditor's report is CPA Nancy Muhoya, Practising Certificate No. 2158.

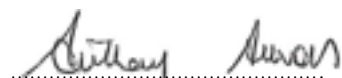

For and on behalf of Ernst & Young LLP
Certified Public Accountants
Nairobi, Kenya

NOTES TO THE FINANCIAL STATEMENTS

1 General information

World Agroforestry (ICRAF) is an autonomous, not-for-profit research and development institution supported by over 50 governments, private foundations, regional development banks and the World Bank. The Centre is part of the alliance of the Consultative Group on International Agricultural Research (CGIAR) Centres.

ICRAF was founded in 1978 as the International Centre for Research in Agroforestry to promote the exchange of information about agroforestry research in the tropics. With its headquarters in Nairobi, Kenya, the Centre works throughout the global South with footprint in Africa, Asia and Latin America. In 1992, the Centre joined the CGIAR and since then has transformed itself into a world-class international agricultural research institution. In 2018, the organization acquired the brand name World Agroforestry. However, the International Centre for Research in Agroforestry (ICRAF) remains its legal name.

The address of its registered office is:

United Nations Avenue
P.O. Box 30677
00100 Nairobi

2 Accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

Statement of compliance

The financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The measurement basis applied is the historical cost basis, except where otherwise stated in the accounting policies below.

Adoption of new and amended International Financial Reporting Standards (IFRS)

(i) *Relevant new standards and amendments to published standards effective for the year ended 31 December 2021*

Several new and revised standards and interpretations became effective during the year. The Trustees have evaluated the impact of their new standards and interpretations and none of them had a significant impact on the Centre's financial statements.

The following revised IFRSs were effective in the current year and the nature and the impact of the relevant amendments are described below:

The following amendments became effective during the period:

<i>New standards or amendments</i>	<i>Effective for annual period beginning or after</i>
Interest Rate Benchmark Reform – Phase 2 – Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16	1 January 2021
COVID-19-Related Rent Concessions (Amendments to IFRS 16)	1 April 2021

These amendments and interpretations apply for the first time in the period, but do not have an impact on the financial statements of the Centre.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

Adoption of new and revised International Financial Reporting Standards (IFRS) (continued)

(ii) *Impact of new and amended standards and interpretations in issue but not yet effective*

At the date of authorisation of these financial statements, the Centre had not adopted the following new and revised IFRS Standards that have been issued but are not yet effective:

<i>New standards or amendments</i>	<i>Effective for annual period beginning or after</i>
Reference to the Conceptual Framework (Amendments to IFRS 3)	1 January 2022
Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16)	1 January 2022
Onerous Contracts Cost of Fulfilling a Contract (Amendments to IAS 37)	1 January 2022
AIP IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter	1 January 2022
AIP IFRS 9 Financial Instruments – Fees in the ‘10 per cent’ test for derecognition of financial liabilities	1 January 2022
AIP IAS 41 Agriculture – Taxation in fair value measurements	1 January 2022
IFRS 17 Insurance Contracts	1 January 2023
Classification of liabilities as current or non-current (Amendments to IAS 1)	1 January 2023
Definition of Accounting Estimates - Amendments to IAS 8	1 January 2023
Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2	1 January 2023
Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12	1 January 2023
Sale or Contribution of Assets between an Investor and its Associate or Company (Amendments to IFRS 10 and IAS 28)	To be determined

The Centre does not expect that the adoption of the Standards listed above will have a material impact on the financial statements of the Centre in future periods when they become effective.

(iii) *Early adoption of standards*

The Centre did not early-adopt any new or amended standards in the year ended 31 December 2021.

(a) Basis of preparation

The measurement basis applied is the historical cost basis, except for certain financial instruments that are measured at fair values at the end of each reporting period.

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions. It also requires management to exercise its judgement in applying the Centre's accounting policies. Areas involving a higher degree of judgement or complexity, or where assumptions and estimates are significant to the Centre's financial statements, are disclosed in Note 3. The financial statements are presented in United States dollars, rounded to the nearest thousand (US\$'000).

2 Accounting policies (Continued)

(b) Functional currency and translation of foreign currencies

(i) Functional and presentation currency

ICRAF's financial statements are presented in United States Dollars, which is also the Centre's functional currency. Assets and liabilities (excluding supplies, spare parts, property and equipment) denominated in other currencies are converted at the exchange rate in effect at the end of each financial period. Grants received in currencies other than United States Dollars are recorded at the market exchange rate in effect at the time the grant is received or – if outstanding on 31 December – at the market exchange rate in effect at the year end.

(ii) Transactions and balances

Income and expenses in currencies other than United States Dollars, as well as those related to properties, spare parts and equipment, are initially recorded at the official exchange rate on the date of each transaction. Net gains and losses arising from exchange rate fluctuations are excluded from the Centre's operational expenses but reported as financial expenses in the statement of financial activity.

(c) Revenue recognition

The Centre recognizes revenue as follows:

Unrestricted grant revenue

Unrestricted grants (including government grants) are those received from unconditional transfers of cash or other assets to the Centre. Unrestricted grants in currencies other than United States Dollars are recorded at the exchange rates in effect at the time of receipt or, if outstanding on 31 December, at the exchange rate in effect at the year end.

Restricted grant revenue

Restricted grants are those received from a transfer of resources to the Centre in return for past or future compliance with the operating activities of the Centre. Grants are recognized as revenue only when the conditions have been substantially met or the donor has explicitly waived the conditions. Restricted grants in currencies other than United States Dollars, with specific request to be paid in that currency as partner funds, are recorded as income and expenses at the exchange rate in effect at the time of payment.

(i) Donations in kind

Donations in kind are recognized at the fair value of the goods or services received, or in the absence of this, at the amount attributed to them by the donor.

(ii) Other income

Interest, losses and gains related to financial instruments are reported in the statement of financial activity as expenses or revenue. Interest is recorded using the effective interest rate method, which accurately discounts future flows of payments and cash receipts over the expected life of the financial instrument, or a shorter duration as applicable with respect to the net carrying amount of the financial asset.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(d) Property and equipment

Property and equipment with an estimated useful life beyond one year and with costs in excess of US\$3,000 or its equivalent are capitalized. The assets are stated at historical cost less depreciation. Historical cost includes expenditures that are directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset only when it is probable that future economic benefits associated with the item will flow to the Centre, and the cost of the item can be reliably measured. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the statement of financial activity during the financial period in which they are incurred.

Land is not depreciated. Depreciation of other assets is calculated using the straight-line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives, as follows:

Buildings and Infrastructures	33 years
Prefabricated structures	16 years
Leasehold Improvement & Infrastructure	5 years
Motor vehicles	4 years
Heavy equipment	7 years
Computers and peripherals	3 years
Laboratory and scientific equipment	5 years
Office furniture and other equipment	5 years

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the greater of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Assets that suffer impairment are reviewed for possible reversal of the impairment at each reporting date. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount, and are included in the statement of financial activity.

Property and equipment acquired from designated (restricted) funds

Property and equipment acquired from restricted funds are capitalized and depreciated over the life of the project or the useful life of the asset category, whichever is shorter. Property and equipment previously owned by a restricted project is recognized at fair or appraised value upon termination of the project if it is expressly provided in the grant agreement that ownership of the item will be transferred to the Centre.

(e) Intangible assets

This relates to computer software. Intangible assets are stated at historical cost less accumulated amortization and accumulated impairment losses. Acquisition costs and costs attributable to bringing the software into use are capitalized. These costs are amortized on a straight-line basis over the life of the software, which is currently 10 years.

(f) Leases

On the commencement date of each lease (excluding leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value) the Company recognizes a right-of-use asset and a lease liability.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(f) Leases (Continued)

The lease liability is measured at the present value of the lease payments that are not paid on that date. The lease payments include fixed payments, variable payments that depend on an index or a rate, amounts expected to be payable under residual value guarantees, and the exercise price of a purchase option if the Centre is reasonably certain to exercise that option. The lease payments are discounted at the interest rate implicit in the lease. If that rate cannot be readily determined, the Centre's incremental borrowing rate is used.

For leases that contain non-lease components, the Centre allocates the consideration payable to the lease and non-lease components based on their relative stand-alone components.

The right-of-use asset is initially measured at cost comprising the initial measurement of the lease liability, any lease payments made on or before the commencement date, any initial direct costs incurred, and an estimate of the costs of restoring the underlying asset to the condition required under the terms of the lease.

Subsequently the lease liability is measured at amortized cost, subject to remeasurement to reflect any reassessment, lease modifications, or revised fixed lease payments.

Financial assets are derecognized when the rights to receive cash flows from the financial asset have expired, when the Centre has transferred substantially all risks and rewards of ownership, or when the Centre has no reasonable expectations of recovering the asset.

All financial liabilities are classified as non-current except those held for trading, those expected to be settled in the Centre's normal operating cycle, those payable or expected to be paid within 12 months of the balance sheet date and those which the Centre does not have an unconditional right to defer settlement for at least 12 months after the balance sheet date.

All other right-of-use assets are subsequently measured at cost less accumulated depreciation and any accumulated impairment losses, adjusted for any remeasurement of the lease liability. Depreciation is calculated using the straight-line method to write down the cost of each asset to its residual value over its estimated useful life. If ownership of the underlying asset is not expected to pass to the Centre at the end of the lease term, the estimated useful life would not exceed the lease term.

Increases in the carrying amount arising on revaluation are recognized in other comprehensive income and accumulated in equity under the heading of revaluation surplus. Decreases that offset previous increases of the same asset are recognized in other comprehensive income. All other decreases are charged to the profit and loss account.

For leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value, the total lease payments are recognized in profit or loss on a straight-line basis over the lease period.

The above accounting policy has been applied from 1 January 2019.

All leases with payments below the capitalization value US\$ 1,500 were directly expensed.

(g) Inventories

Inventories are assets held in the form of materials or supplies to be consumed in the Centre's operations or in the rendering of services. Inventories are initially valued at cost. The cost of inventories applied to operations is based on the weighted average cost principle. It includes expenditures incurred in acquiring the inventories and other costs incurred in bringing them to their existing locations and conditions. Inventories are written down to net realizable value on an item-by-item basis. The allowance for inventory obsolescence is deducted from the related asset. The write-down amount of inventories to net realizable value and all losses of inventories is recognized as an expense in the period when the write down or loss occurs. Inventories held at the end of the financial period are stated at the lower of cost and net realizable value.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(h) Financial assets

All recognized financial assets are measured subsequently in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

Classification of financial instruments

All recognized financial assets, that are within the scope of IFRS 9, are required to be measured subsequently at amortized cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Specifically:

- debt instruments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured subsequently at amortized cost;
- debt instruments that are held within a business model whose objective is both to collect the contractual cash flows and to sell the debt instruments, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured subsequently at fair value through other comprehensive income (FVTOCI);
- all other debt investments and equity investments are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the Centre may make the following irrevocable election/designation at initial recognition of a financial asset:

- the Centre may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination in other comprehensive income; and
- the Centre may irrevocably designate a debt investment that meets the amortized cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

Accounts receivable

Receivables include claims from donors, advances to employees, or advances to other CGIAR Centres. Accounts receivable from donors consist of claims from donors for grants pledged in line with the terms specified by the donor. This also pertains to claims from donors for expenses paid on behalf of projects in excess of cash received.

Measurement

- Receivables are measured at the original invoice amount because the effect of discounting is immaterial.
- Accounts receivable are valued at their net recoverable amounts, calculated as the gross amount of receivable minus any allowances provided for doubtful accounts.

Any receivable that has been assessed to be unrecoverable is written off.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(h) Financial assets (Continued)

Impairment

The Centre recognizes a loss allowance for expected credit losses on investments in debt and equity instruments that are measured at amortized cost or at fair value through statement of financial activity, donor, partner and staff receivables. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Centre always recognizes lifetime ECL for donor, partner and staff receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Centre's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where correlation exists.

For all other financial instruments, the Centre recognizes lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Centre measures the loss allowance for that financial instrument at an amount equal to lifetime ECL.

(i) Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Centre compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Centre considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(ii) Definition of default

The Centre considers the following as constituting an event of default for internal credit risk management purposes, as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- The Centre has not complied with the requirements of the grant agreements;
- A partner has not liquidated amounts advanced within the required timelines and the activities have not been implemented.
- A member of staff separating from the Centre after receiving final dues before repaying all amounts due to the Centre.

The Centre writes off financial assets only when there is objective evidence that the debt will not be recovered and after it has exhausted its collection avenues.

(iii) Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e., the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information where correlation exists.

As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Centre in accordance with the contract and all the cash flows that the Centre expects to receive, discounted at the original effective interest rate. The Centre recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(i) Cash and cash equivalents

Cash comprises cash-on-hand, petty-cash funds, currencies to be deposited and local or foreign currency deposits in banks, which can be added to or withdrawn without limitation and are immediately available for use in the Centre's current operations. Cash equivalents are short-term, highly liquid investments that: (i) are readily convertible to known amounts of cash; and (ii) have original maturities of three months or less, minimizing the risk of changes in value resulting from interest rate changes.

(j) Income tax

Through agreements or arrangements with host countries and partners, the Centre is exempt from all local taxes in most of the countries in which it operates. Management is satisfied that there is no material tax or other exposure (statutory, regulatory or otherwise) arising in the various countries in which ICRAF operates, including those where there are no tax exemptions. Consequently, the Centre has not accounted for income tax in its financial statements.

(k) Employee benefits

Employee benefits include all forms of consideration given by the Centre in exchange for the services rendered by all employees – whether internationally recruited staff or nationally recruited staff. Employee benefits include the following:

(i) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid under short-term cash bonus if the Centre has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be reliably estimated.

(ii) Defined contribution plan

A defined contribution plan is a pension plan in which the Centre pays fixed contributions into a separate entity. The Centre has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits related to their service in the current and prior periods. The Centre pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. ICRAF has no further payment obligations once the contributions have been paid. Contributions are recognized as employee benefit expenses when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available. The Centre and all its employees contribute to national social security funds in their respective countries of operation.

(iii) Defined benefit plan

A defined benefit plan is a pension plan that is not a defined contribution plan. Employees are entitled to severance pay (gratuity) based on number of years worked for the Centre, basic salary, local regulations and other demographic and financial assumptions as required by IAS 19: Employee benefits. The liability recognized in the statement of financial position related to a defined benefit pension plan is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality investments that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension obligation.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income in the period in which they arise. Past-service costs are immediately recognized in income.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(k) Employee benefits (Continued)

Termination benefits

Termination benefits are recognized as an expense when the Centre is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan of either terminating employment before the normal retirement date or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if: the Centre has made an offer encouraging voluntary redundancy; it is probable that the offer will be accepted; and the number of acceptances can be reliably estimated.

(l) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and – in the event of default – insolvency or bankruptcy of the Centre or the counterparty.

(m) Trade payables

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. Short-term payables with no stated interest rate are measured at the original invoice amount because the effect of discounting is immaterial.

Trade payables represent amounts due to donors, employees and others for support, services and materials received prior to year-end but not paid for as of the date of the statement of financial position.

Accounts payable to donors include grants received from donors for which conditions are not yet met and amounts payable to donors related to any unexpended funds received in advance for signed contracts.

Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities.

Measurement:

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

(n) Provisions

Provisions are recognized when: (i) the Centre has a present obligation (legal or constructive) as a result of a past event; (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and (iii) a reliable estimate can be made of the amount of the obligation. When the Centre expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset, but only when the reimbursement is certain. The expense related to a provision is presented in the statement of financial activity net of any reimbursement.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

2 Accounting policies (Continued)

(o) Net assets

Net assets comprise the residual interest in the entity's assets after liabilities are deducted. They are classified as either undesignated or as designated and other comprehensive income.

- i) The use of undesignated net assets is not designated by ICRAF Management for specific purposes.
- ii) Designated net assets comprise assets that have been restricted by ICRAF as reserves for replacing property and equipment, retirement of national staff and other activities or purposes.
- iii) Other comprehensive income includes the net changes in value of available-for-sale financial assets. It also includes the actuarial gain/(loss) resulting from the valuation of the defined benefit plan.

(p) Work in progress

Work in progress pertains to properties in the course of construction. It is carried at cost, less any recognized impairment cost. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

(q) Going concern

The financial statements have been prepared on a going concern basis on the belief that funds will continue to be received from donors. The Centre had current assets of US\$ 52.19 million and current liabilities of US\$ 34.54 million in 2021. This position presents a positive working capital position of US\$ 17.65 million (US\$ 18.67 million in 2020), indicating that the Centre will be able to meet its short-term obligations as they fall due.

3 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including experience of future events that are believed to be reasonable under the circumstances.

The Centre makes estimates and assumptions concerning the future. The resulting accounting estimates seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

Useful lives of property and equipment

The Centre determines the estimated useful lives and related depreciation charges for its property and equipment based on projected product life cycles. This calculation may change significantly as a result of technical innovations and competitor actions in response to severe industry cycles. Management will increase the depreciation charge when useful lives are less than provided estimated lives, or it will write off or write down technically obsolete or non-strategic assets that have been abandoned or sold.

Impairment losses

At the end of each reporting period, ICRAF reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, ICRAF estimates the recoverable amount of the cash-generating unit to which the asset belongs.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

3 Critical accounting estimates and judgements (Continued)

Calculation of loss allowance

When measuring Expected Credit Losses (ECL), the Centre makes judgements as to whether there are any observable data indicating an impairment trigger followed by a measurable decrease in the estimated future cash flows from the financial assets before the decrease can be identified with those financial assets.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the Centre would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

4 Financial risk-management objectives and policies

The Centre's activities expose it to a variety of financial risks such as market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Centre's overall risk management strategy focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on its financial performance. The Centre does not hedge any of its risk exposures.

Financial risk management is carried out by the Finance Department under policies approved by the Board of Trustees. The Board provides written principles for overall risk management as well as written policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

Market risk

(i) Foreign exchange risk

The Centre keeps records in United States Dollars but receives grants from foreign countries in various currencies. Its funds are held in Kenyan shillings (KES), British pounds (GBP), and Euros (EUR). This exposes the Centre to losses that may arise from fluctuations in foreign currency exchange rates. The Centre operates foreign currency bank accounts for all receipts and payments in foreign currencies to minimize exposure to exchange risks.

Below is a summary of the Centre's foreign currency-denominated financial assets and liabilities, and their carrying amounts.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

4 Financial risk-management objectives and policies (Continued)

Market risk (Continued)

(i) Foreign exchange risk (Continued)

	KES US\$'000	GBP US\$'000	EUR US\$'000	Total US\$'000
At 31 December 2021				
FINANCIAL ASSETS				
Bank balances	749	172	65	986
Receivables and other current assets	<u>62</u>	<u>235</u>	<u>1,660</u>	<u>1,957</u>
	<u>811</u>	<u>407</u>	<u>1725</u>	<u>2943</u>
Financial liabilities				
Accounts payable	<u>(9)</u>	<u>(91)</u>	<u>(6,221)</u>	<u>(6,321)</u>
Net foreign currency exposure	<u>802</u>	<u>316</u>	<u>(4,496)</u>	<u>(3,378)</u>
At 31 December 2020				
Financial assets				
Bank balances	753	198	77	1,028
Receivables and other current assets	<u>140</u>	<u>186</u>	<u>4,383</u>	<u>4,709</u>
Total	<u>893</u>	<u>384</u>	<u>4,460</u>	<u>5,737</u>
Financial liabilities				
Trade payables	<u>-</u>	<u>(104)</u>	<u>(3,677)</u>	<u>(3,781)</u>
Net foreign currency exposure	<u>893</u>	<u>280</u>	<u>783</u>	<u>1,956</u>

At the end of each reporting period in 2021, if Kenyan Shilling, British Pound and Euros had strengthened or weakened by 10% against the United States Dollar, with all other variables held constant, the sensitized effect on the surplus or deficit would have been a decrease or increase in surplus by US\$ 0.118 million (US\$ 0.181 million in 2020).

NOTES TO THE FINANCIAL STATEMENTS (Continued)

4 Financial risk-management objectives and policies (Continued)

Market risk (Continued)

(ii) Price risk

The Centre is exposed to securities price risk as a result of its holdings in investments which are listed securities and are classified at fair value through profit and loss financial assets.

Exposure to equity price risk in aggregate is monitored in order to ensure compliance with the relevant regulatory limits for solvency purposes.

The Centre has a defined investment policy which sets limits on the Centre's exposure to securities both in aggregate terms and by category/share. This policy of diversification is used to manage the Centre's price risk arising from its investments in debt and equity securities.

(iii) Interest rate risk

The Centre does not hold any borrowed funds from a third party and hence is not subject to interest rate risk.

Bond prices are subject to interest rate movements. A rise in interest rate will have a negative impact on bond prices, while a decrease will have a positive impact.

Credit risk

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as accounts receivable. Credit risk is the risk that the counterparty will default on its contractual obligations, resulting in financial loss to the Centre.

Only reputable, well-established financial institutions are acceptable to ICRAF. For receivable balances:

- Reviews of aging reports are carried out monthly and provisions are made for doubtful amounts made for any potentially irrecoverable amounts.
- The Centre does not incur expenditures on restricted donor grants before funding contracts are signed.
- Advances to partner and hosted organizations are subject to the Centre's internal requirements to limit losses arising from funds advanced by the Centre.

The amount that best represents the Centre's maximum exposure to credit risk at 31 December is made up as follows:

	Fully Performing US\$'000	Past due US\$'000	Impaired US\$'000	Total US\$'000
2021				
Investments	17,295	-	-	17,295
Term deposits	207	-	-	207
Cash and cash equivalents	23,022	-	-	23,022

IFRS 9 Assessment

The Centre measures its debt instruments at their fair value at the end of subsequent accounting periods and an impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for various customer segments with similar loss patterns.

The Centre debt instruments of which IFRS 9 is applicable are Financial Assets held for Trading, Donor Receivables, Partner (Sub-grantees) Receivables and Staff Receivables.

Financial Assets held for Trading

These are in form of short-term deposits with banks and bonds with maturity dates of up to a maximum of 3 years. There has not been any recorded aggregated losses in the past on such instruments and the Centre does not expect to record any aggregated losses in the future.

Donor Receivables

Donor Receivables comprise amounts owed to the Centre by various donors and constitute obligations that are guided by legal agreements entered between the donors and the Centre. Donor receivables with similar loss patterns are classified separately as shown below:

CGIAR Centre's

- Accounts for 36% of the receivables in 2021.
- CGIAR Centres main funders are USAID, Netherlands, DFID, EU, GIZ, NORAD, ACIAR and DANIDA. The credit rating by Moody for the governments backing these organizations is stable. Hence, the Centre has rated these as low risk.

Governments - Europe & Americas

- Accounts for 12% of the receivables in 2021
- Significant funding in this category is from the following governments - USA, Netherlands, Sweden, Australia, Denmark, United Kingdom, France, Canada, Finland and Switzerland. The credit rating by Moody for these governments is stable. Hence, the Centre has rated these as low risk

NOTES TO THE FINANCIAL STATEMENTS (Continued)

4 Financial risk management objectives and policies (Continued)

Governments - Others

- Accounts for 13% of the receivables 2021
- Significant funding in this category is from the African Development Bank, Kenya, South Africa. The credit rating by S&P for these governments is investment grade. Hence, the Centre has rated these as low risk

International Organizations

- Accounts for 30% of the receivables in 2021
- Significant funding in this category is from IFAD
- The primary donors of these organizations are the governments in Europe & Americas who have been assessed and rated as low risk

Private Sector

- Accounts for 7% of the receivables in 2021
- The main funder under this category is the MARS Incorporated whose annual revenue is over \$35 billion. The company is in good financial standing and hence the Centre has rated it as low risk

United Nations

- Accounts for 2% of the receivables in 2021
- UN main funders are USA, Netherlands, Sweden, Australia, Canada, Finland and Switzerland. The credit rating by Moody for these governments is stable. Hence, we have rated these as low risk.

Expected Credit Loss as at 31 December 2021

Partner Receivables

The Centre works with several partners in implementing its programs. These partnerships are guided by agreements entered between the partners and the Centre which stipulates the process of advancing funds to the partners and accounting of the funds by the partners. The partners are expected to refund any funds not utilized and accounted for to the Centre. Partner receivables with similar loss patterns are classified separately as shown below:

CG Centres

- Accounts for 2.5% of the receivables in 2021
- CGIAR Centres adopt similar accounting policies and procedures with ICRAF and are expected to provide satisfactory technical and financial reports to support funds to them. Hence, we have rated these as low risk
- On average, CGIAR Centres take a year to account for funds advanced to them by ICRAF. This is the expected timelines based on the nature of implementation of Research activities.

Community Based Organizations

- Accounts for 5.5% of the receivables in 2021
- On average, Community Based Organizations take 1 year to account for funds advanced to them by ICRAF.

International NGOs

- Accounts for 68% of the receivables in 2021
- Significant balances in this category relates to Catholic Relief Services, World Vision International and CARE International. These organizations have robust financial systems and hence have been assessed and rated as low risk.
- On average, INGOs Centres take 6 months to one year to account for funds advanced to them by ICRAF. This is the expected timelines based on the nature of implementation of Research activities.

National Research Institutes (NARIs)

- Accounts for 8% of the receivables in 2021
- On average, NARIs take between one to two years to account for funds advanced to them by ICRAF. This is slightly beyond expected timeline of one year based on the nature of implementation of Research activities.

Universities

- Accounts for 16% of the receivables in 2021
- On average, Universities take 1.5 years to account for funds advanced to them by ICRAF. This is slightly beyond expected timeline of one year based on the nature of implementation of Research activities.

Staff Receivables

The Centre also does not expect future losses arising from Staff Receivables because these receivables relate to advances to staff for travel and program activities which the respective staff account for once the travel and the program activities are completed. The probability of future losses arising from such receivables is very low and the Centre has not historically realized any significant losses on such receivables.

** ICRAF has made an additional provision of US\$ 299,764 (US\$ 643,306 in 2020) for specific donor balances that may be unrecoverable even as efforts to recover the same are still being pursued.

Incorporation of forward-looking information

In determining the expected credit loss, the Centre concluded that there was no correlation between the default and macro-economic variables. Forward looking information was therefore not incorporated into the model when arriving at the expected credit loss.

Net Provision during the year	(54)	135
Write-off/back during the year	6	(57)
	<u>191</u>	<u>239</u>

Liquidity risk

Liquidity risk is the risk that the Centre will not be able to meet its financial obligations when they fall due. The Centre's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when they fall due, under both normal and stressed conditions, without incurring unacceptable losses or at the risk of damaging the Centre's reputation. The Centre ensures that it has sufficient cash on demand to meet expected operational expenses, including the servicing of financial obligations. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted. All liquidity policies and procedures are subject to review and approval by the Board of Trustees.

The table below provides a contractual maturity analysis of the Centre's financial liabilities. All balances are due within 12 months, hence their carrying amounts are equal to their undiscounted cash flows as the impact of discounting is not significant.

Fair value of financial assets and liabilities

(i) Fair value hierarchy

The Centre specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Centre's market assumptions. These two types of inputs have created the following fair value hierarchy:

- Level 1 – Quoted prices in active markets for identical assets or liabilities. This level includes equity securities and debt instruments listed on a securities exchange.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly as prices or indirectly as derived from prices.
- Level 3 – Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

This hierarchy requires the use of observable market data when available. The Centre considers relevant and observable market prices in its valuations whenever possible.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

11 Net assets (continued)

The level of net assets recommended by the Board of Trustees is 75-90 days of operating expenses excluding depreciation. As at 31 December 2021, the Centre's net assets represented 130 days (133 days in 2020) of its operating expenses, excluding depreciation.

Net assets include both the designated and undesignated portions.

Undesignated

The balance in the undesignated portion as at 31 December 2021 was US\$ 3.759 million (US\$ 3.477 million in 2020), which is presented as unrestricted (undesignated) net assets. The deficit for the year is US\$0.618 million (deficit of US\$0.315 million in 2020).

Following the approval of re-designation of reserves by the board in 2021 the remaining balances in capital fund (US\$ 7.493 million) and other designations (US\$ 4.226 million) have been closed off to undesignated reserves. The closing balance as at 31 December 2021 now stands as at US\$ 11.128 million.

Designated

a) Net investment in property and equipment

A portion of unrestricted net assets has been appropriated by the Board of Trustees to reflect net investment in property and equipment.

The balance of US\$4.005 million as at 31 December 2021 (US\$4.284 million in 2020) comprises the balance brought forward from 2020 and the current year's net decrease in fixed assets of US\$279,000 (decrease of US\$482,000 in 2020).

b) Reserve for acquisition and replacement of property and equipment

Each financial year, the Centre appropriates from the unrestricted net assets an amount equal to the movement in the net book value of its property and equipment, and any other specific allocation, into a reserve designated to meet the acquisition and replacement costs for property and equipment items.

The net balance of US\$7.493 million (US\$7.214 million in 2020) as at 31 December 2021 represents unspent funding available for use by the Centre in future years for acquisition and replacement of property and equipment.

Following the board's approval to maintain a constant designation of US\$ 1.5 million annually as the capital fund, the remaining balance has been closed off to undesignated reserves.

c) Other designations

In 2015, the Centre made the following appropriations from undesignated net assets:

- US\$ 2.300 million to cater for any future funding shortfalls;
- US\$ 2.351 million to cater for strategic investments; and
- US\$ 1.259 million to cater for other contingencies arising from adverse foreign currency and other events which could pose a risk to the Centre's continuity.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

Net assets (continued)

In 2019, the Centre's Board made an appropriation of US\$ 1.50 million to cater for ICRAF-CIFOR merger-related costs.

In 2021, the Centre utilized US\$ 0.565 million from the Merger Transition Fund (US\$ 0.362 million in 2020). The balance as at 31 December 2021 was US\$ 0.375 million (US\$ 0.940 million in 2020).

In 2021, the board approved closed off the remaining balances of the other designations into the undesignated reserves while approving the two below:

- US\$ 2.6 million to cater for strategic investments to be used for funding implementation projects which would bring in a return on investment and return of capital and grow CIFOR-ICRAF.
- US\$ 0.25 million to allow CIFOR-ICRAF management to draw from the fund to meet special expenses during crisis e.g. COVID-19 pandemic.

World Agroforestry (ICRAF)

ICRAF is a centre of science and development excellence that harnesses the benefits of trees for people and the environment. Leveraging the world's largest repository of agroforestry science and information, we develop knowledge practices, from farmers' fields to the global sphere, to ensure food security and environmental sustainability. ICRAF is a CGIAR research centre.
