

Market Intelligence- 2022 in numbers

Market Intelligence – geographic focus of results

Global Market Intelligence Platform

- ✓ **Cross-crop portfolio** approach
- ✓ **One-stop shop** for sharing, exchanging and crowd-sourcing market intelligence
- ✓ **1st Fusion Product Team**: co-developed with CGIAR Initiatives on Foresight, Digital Innovation and CGIAR Digital & Data
- ✓ **Priority setting** information and **feedback hub**
- ✓ Hosted online by **CGIAR target audience** (CGIAR and NARES researchers, GI management, donors, investors)

Number of Results

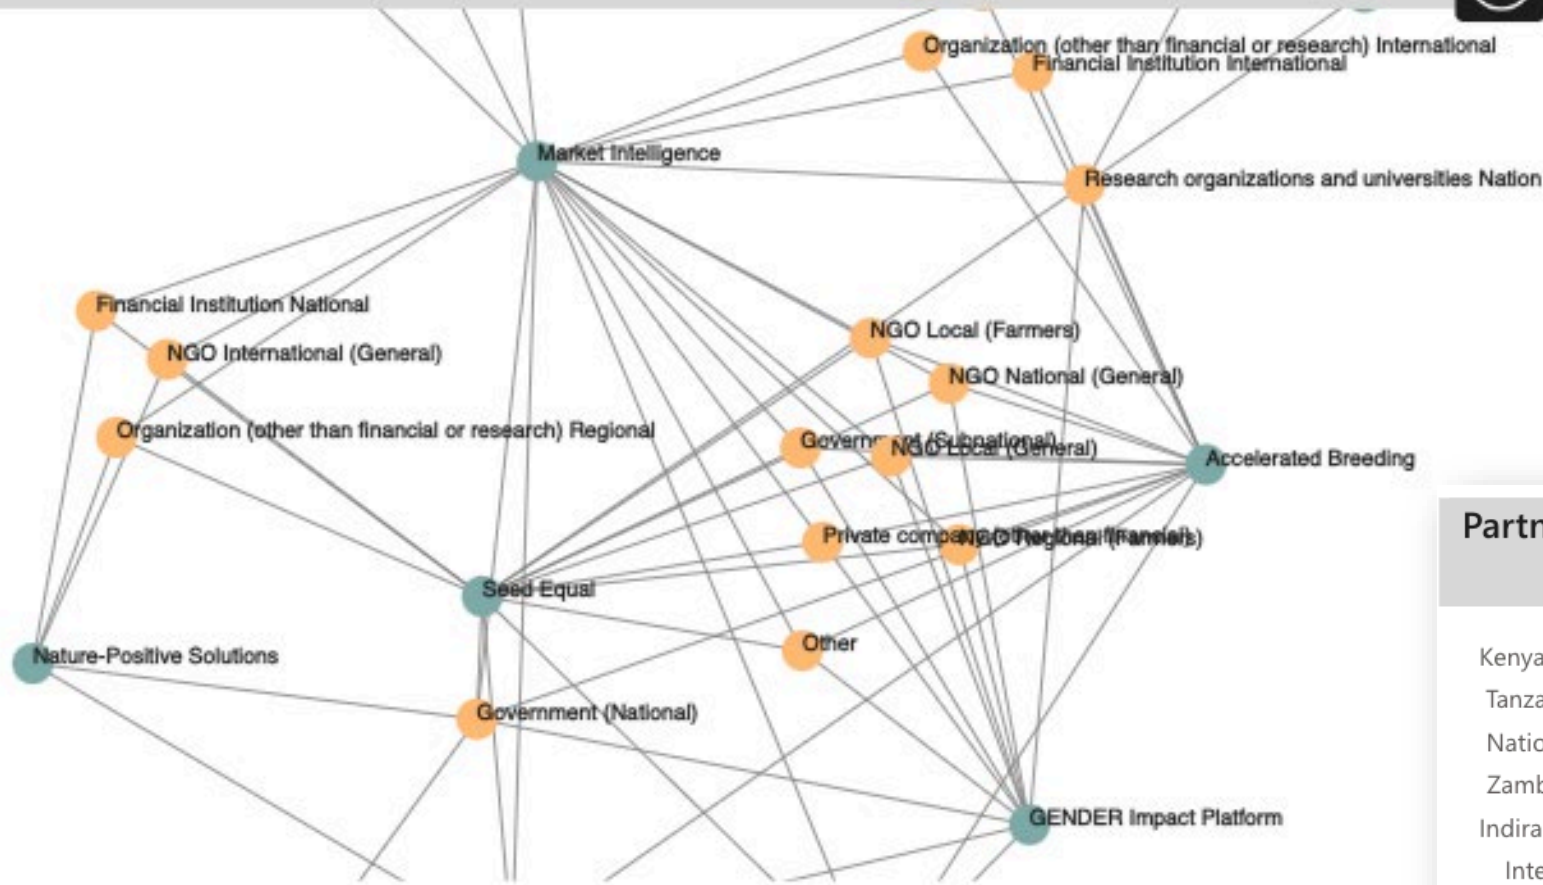

28 results reported in Kenya, most of them Capdev activities
Contributing to SDG 1, SDG 2, SDG 5, SDG 12 and SDG 13

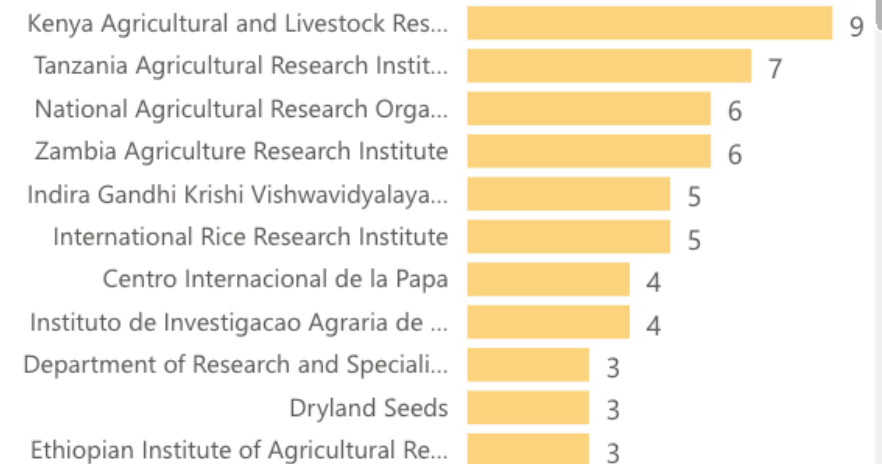

19 results reported in United Republic of Tanzania, most of them Capdev activities
Contributing to SDG 1, SDG 2, SDG 5, SDG 12 and SDG 13

Market Intelligence – progress

Work Package	Progress	Key highlights
1. Market Intelligence	On track	<ul style="list-style-type: none">• CGIAR Seed Product Market Segment Database v1.0 made available; >400 Seed Product Market Segments (SPMS) identified for 25 crops by 8 centers in 10 CGIAR sub-regions, based on uniformly applied 8-point criteria• Video-based Product Concept Testing method developed• Market Intelligence Brief series launched; first <i>Market Intelligence Brief</i> aiming to harmonize definitions in market intelligence across GI Initiatives
2. Target Product Profile (TPP) Design	On track	<ul style="list-style-type: none">• TPP Design SOP applied by 142 CGIAR and 9 partner breeding programs to co-design 379 gender-intentional TPPs for 470 Market segments identified at Sub-regional and country level for all CGIAR mandate crops• SOP transferred to NARES in Uganda, Tanzania, DRC, Sierra Leone, Mali, Chad and Nigeria
3. Behavioral Intelligence	On track	<ul style="list-style-type: none">• Leveraging 6 bilateral grants, multi-country multi-crop RCT designed to unravel constraints to varietal uptake• 6 field experiments in Uganda, Nigeria, Ethiopia, India and Kenya co-created with NARES, NGOs, seed companies• Literature review on behavioral constraints to varietal adoption and on strategies to increase uptake of new varieties
4. Pipeline Investment Cases	On track	<ul style="list-style-type: none">• Implemented 4 teams: GLOBAL team focusing on global CGIAR portfolio of breeding pipelines, and 3 Impact Area teams: NUTRITION, EQUITY and PLANET• Priority Setting Dashboard for Genetic Innovation v1.0 features 110 impact opportunity indicators across 5 Impact Areas, aggregated by 6 CGIAR Regions, 18 sub-regions, 9 Centers, 24 CGIAR crops, 25 non-CGIAR crops, 119 pipelines, 428 SPMS & 180 countries
5. Institutional Scaling and MELIA www.cgiar.org	On track	<ul style="list-style-type: none">• 3 MELIA studies designed and launched: a) incentives and potential to use MI data for priority setting, b) behavioral experiment on use of MI data, c) randomized trials to test potential adoption and impacts of MI informed varieties• MELIA workshop held in November 2022 to adjust ToC and plan 2023 activities

CGIAR Seed Product Market Segment Database

Tools

Product design and management

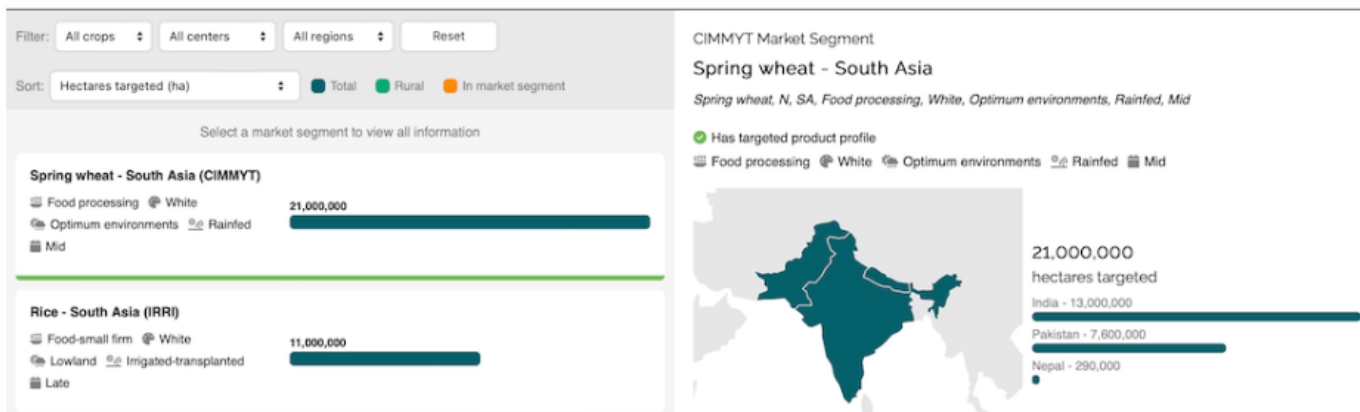

The Seed Product Market Segment Database (SPMSD) identifies and describes over 400 seed product market segments. These segments cover 25 crops across ten subregions where CGIAR and NARES currently target investments in crop breeding and seed systems. For each segment, the database presents uniformly applied descriptors that describe the opportunity for impact and a target product profile (TPP) that presents the basic design elements of products for that segment.

This systematic approach – based on the identification of SPMS, description of the opportunity of each segment, matched to a unique TPP – offers a comprehensive framework for the prioritization of investment decisions and seed product design.

Updated date: 01 Dec 2022

[Impacts](#)

Impact Opportunities

Impact Area:

- Nutrition, health and food security
- Poverty reduction, livelihoods and jobs
- Gender equality, youth and inclusion
- Climate adaptation and mitigation
- Environmental health and biodiversity
- Cross-cutting

Scaling level:

- National/crop
- Market segment
- Breeding pipeline

Grouping:

UN Regions ▼

Crop:

All crops ▼

5 Impact Areas & **1** cross-cutting category

110 “Impact Opportunity” indicators (46 Breadth & 64 Incidence indicators), measuring the “exposure” to Impact Challenges (correlation)

Global or **CGIAR**-targeted view using Impact Area-specific statistical **downscaling** methods

9 aggregation levels: UN regions, CGIAR regions, UN sub-regions, crop groups, crops, Centers, Market Segments, Breeding Pipelines, countries

24 CGIAR crops & **25** non-CGIAR crops

Visualization: single-indicator treemaps & global maps, & multiple-indicator area (portfolio, meta-analysis) graphs

Cassava, Southern Africa, Food (Fresh and dried roots), white, rainfed, NAp, Subhumid lowland tropics and semi-arid lowland tropics (3,417,763)

Groundnut, West Africa, Dual purpose, red/tan, rainfed, early, Sahel, Sudan, Northern Guinea Savanahs (2,636,899)

Yam, West Africa, Fresh tuber, white, intermediate & late, Humid forest & derived Guinea Savannah (2,334,914)

Bean, East Africa, Medium and large seed, red/red mottled & sugar, rainfed, early, Low & Mid altitude, Bush (2,099,360)

Bean, East Africa, Medium to large seeded, red/red mottled, rainfed, Mid and high altitude, Climbing (1,838,381)

Female population (*n*) under poverty line reached by **CGIAR Seed Product Market Segments**

Female population that lives with < \$1.90 a day (2011 PPP), 2022 (sum of market segment-level data scaled down from national-level data using production value shares)
