

Design of 2025-27 portfolio

Purpose: This document sets out a proposed process and timeline to develop proposed portfolio for 2025-2027, including stakeholder mapping and consultation model towards delivery by mid-2024. This material has been considered by and is presented with the support of the System Board.

Prepared by: CGIAR's Global Science Directors

Purpose and action sought

Purpose:

- Provide an overview of the 2025-27 portfolio design process
- Highlight stakeholder groups
- Outline 2025-27 portfolio design decision points

Action sought:

- The System Council is asked to endorse the further development of a stakeholder engagement and portfolio co-design process that aligns with:
 - a) The core portfolio components
 - b) The stakeholder groups
 - c) The delivery timeframe

Core portfolio components

Impact-oriented science

Content:

Science in partnership to deliver the 2030 Research and Innovation Strategy

Quality of Research for Development:

Growing portfolio relevance, credibility, legitimacy and effectiveness

Modalities

Consolidation and coordination:

Number and size of initiatives, linkages within & beyond pooled portfolio

Financial mechanism:

Research funding model, in context of wider financial model

Integration with CGIAR framework:

Integration of portfolio with matrix structure & unified governance

Transparent, inclusive co-creation process

supported by strengthened partnerships and country and regional engagement

Stakeholder groups

Regional:
Demand, scaling and
innovation partners

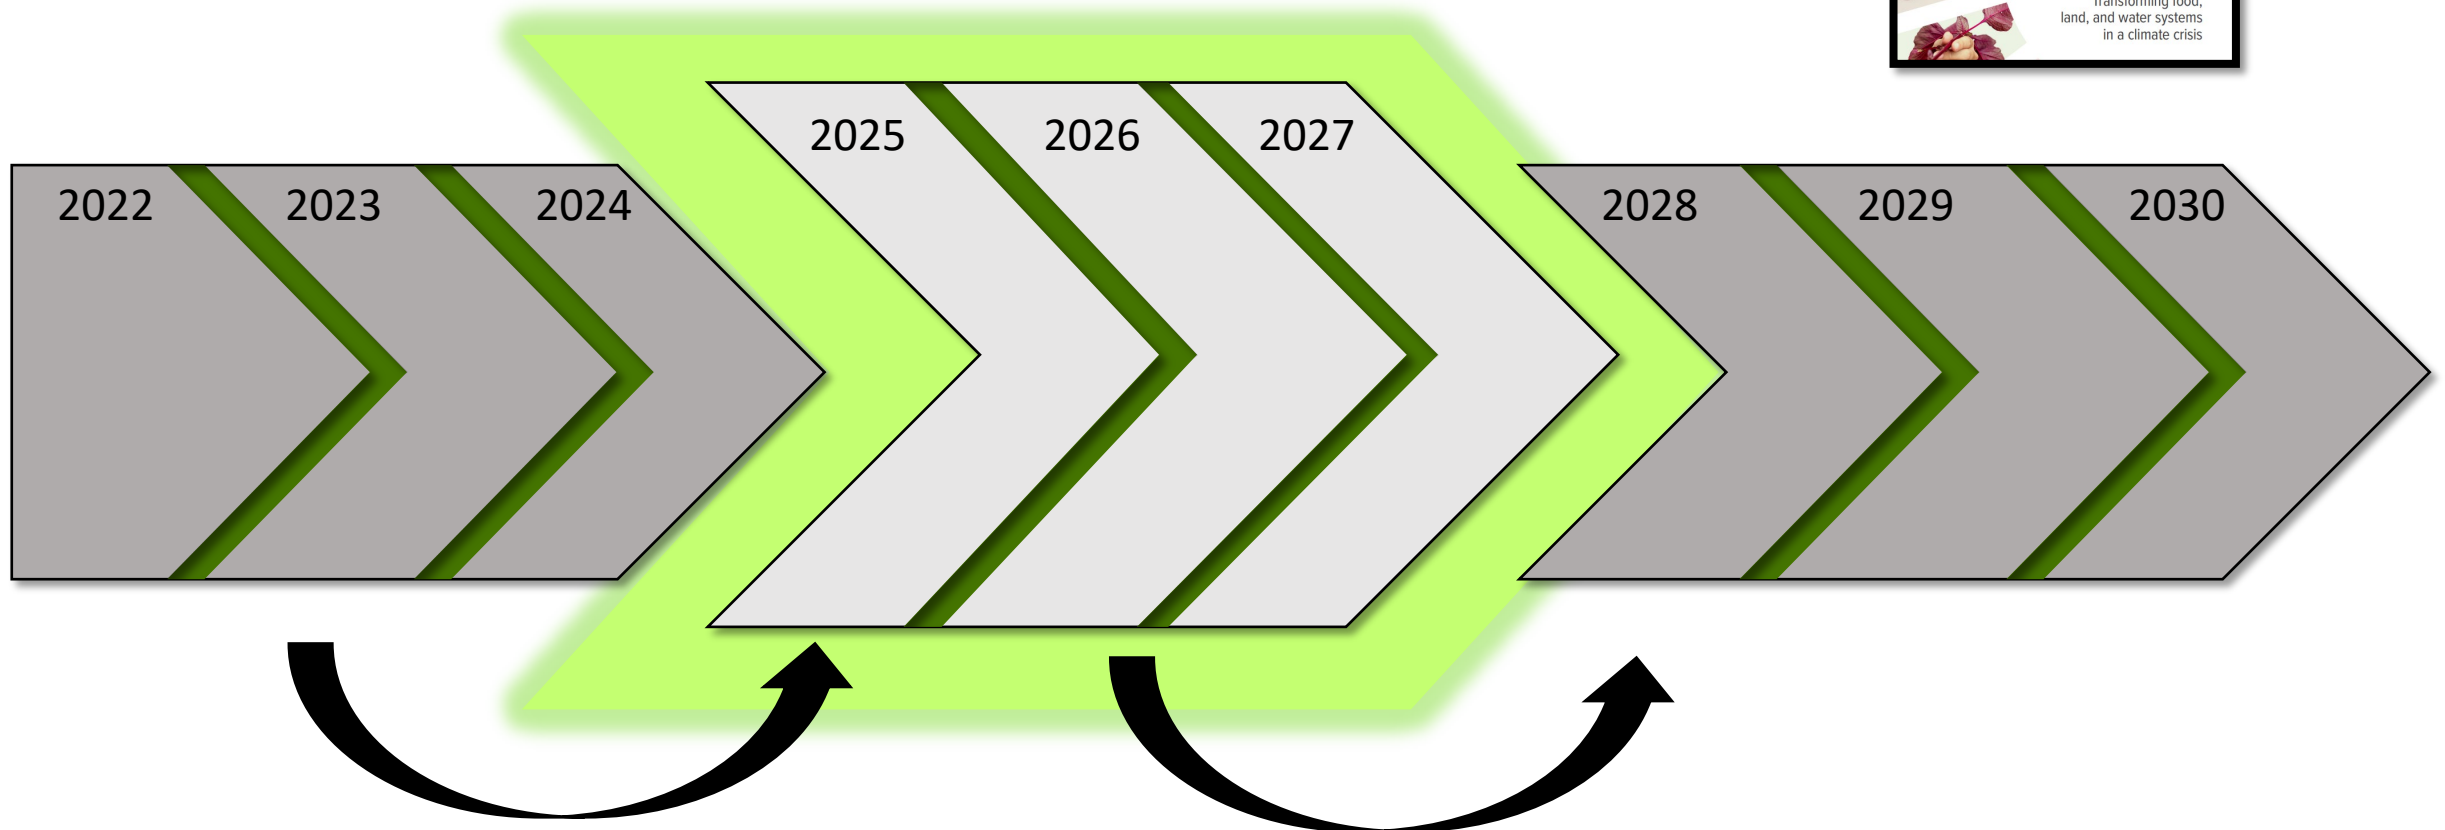

System Board,
System Council ++
