Addendum to 2023 W1 Budget Update

Purpose

This document sets out two updates to Document SC18-13b as issued on 27 April, as follows:

- Slide 5 “Current view of Designations” – Two Initiatives under Genetic Innovation were not visible in the previous version (SeedEqual and Genebanks) – now added to the version in this document
- Slide 6 “View of Designations (assuming 2022 allocations for the outstanding Funders)” – as above.

There is no restriction on the circulation of this document

Prepared by: Marion Barriskell, Global Director, Business Operations and Finance
This graph provides the current designations with what has been formally designated. It excludes $84m worth of unallocated funding.

As it stands, over 20 Initiatives and Platform Areas are under subscribed. 10 fully or over subscribed.
View of Designations (assuming 2022 allocations for the outstanding Funders)

Assumes outstanding funders designate broadly as they did in 2022.

Half of the Initiatives and Platform areas would be fully or over subscribed with the other half (18) undersubscribed.

$14m of the $84m is excluded as more complex to predict.
