

## CGIAR Resource Mobilization Strategy

### Accelerate and Transform

#### Purpose

This document outlines an accelerated and transformed approach to Resource Mobilization for CGIAR research and innovation. It is part of a renewed strategy for CGIAR's external engagement unit, which encompasses Resource Mobilization, Communications, and Advocacy. Based on funding scenarios presented in this document, the objective is to grow all funding (untied and restricted) for CGIAR research and innovation to \$4 billion total over 2025-27 and to a sustainable \$2 billion per year by 2030.

The presentation builds on the working document presented earlier to the System Council at SC19. It is aligned to the vision of the new CGIAR leadership and has been presented to the CGIAR System Board.

#### Action Requested

This document is provided as a background resource for discussion on Resource Mobilization at the System Council's 20<sup>th</sup> meeting. The System Council is requested to take note of the strategy as inputs to a discussion on Resource Mobilization.

**Document category:** Working document of the System Council.

There is no restriction on the circulation of this document
