**FABLE**

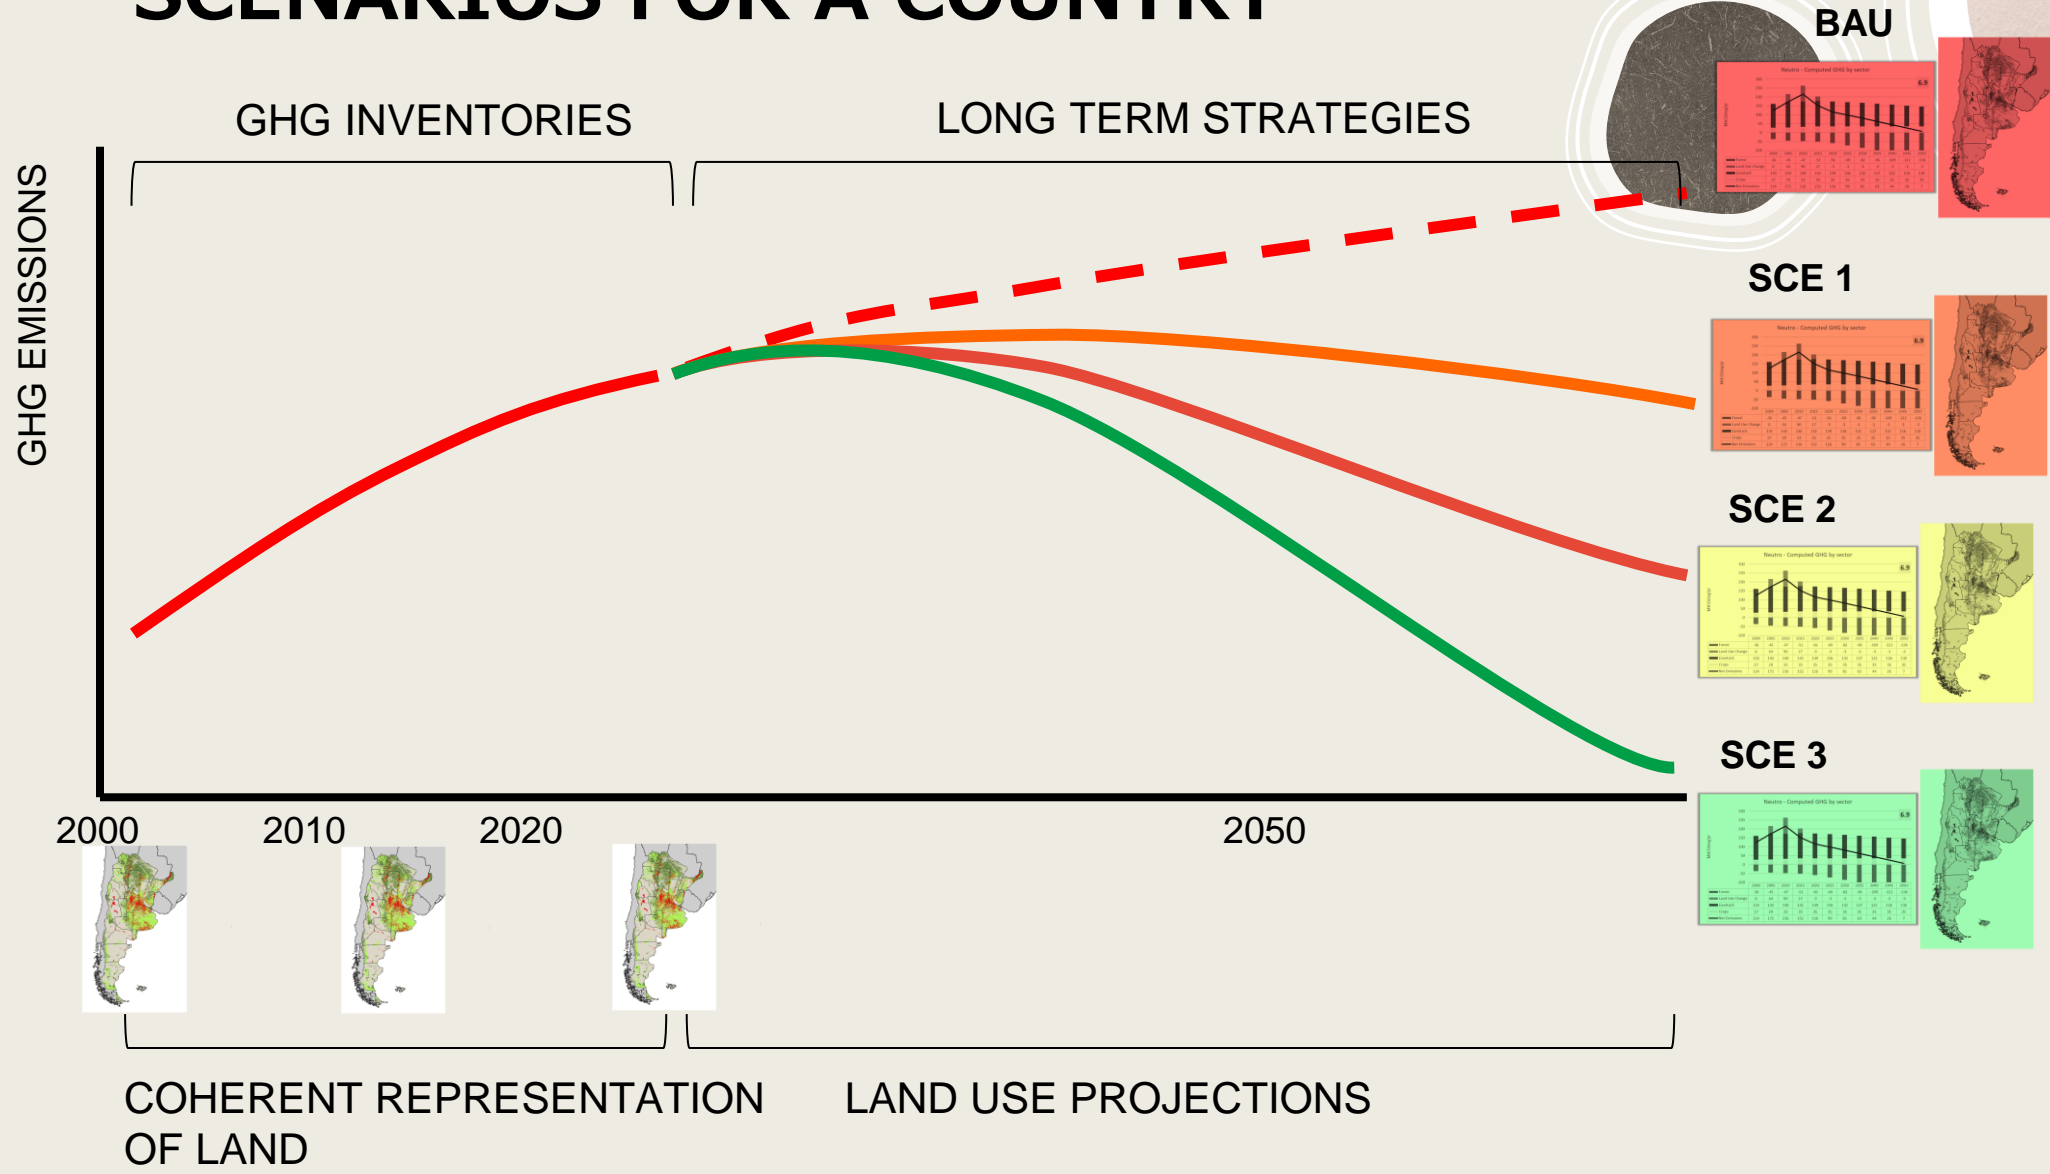

<https://fableconsortium.org/>

**Nature Map Earth**

<https://naturemap.earth/>

Objective: to provide the Ministry of Environment and Sustainable Development and the Ministry of Agriculture with scientific evidence to support the elaboration of LT-LEDS while considering other likewise relevant issues (food provision, biodiversity conservation, etc.)

# WORKSHOPS WITH SCENARISTS

## STAKEHOLDERS FROM THE AFOLU SECTOR

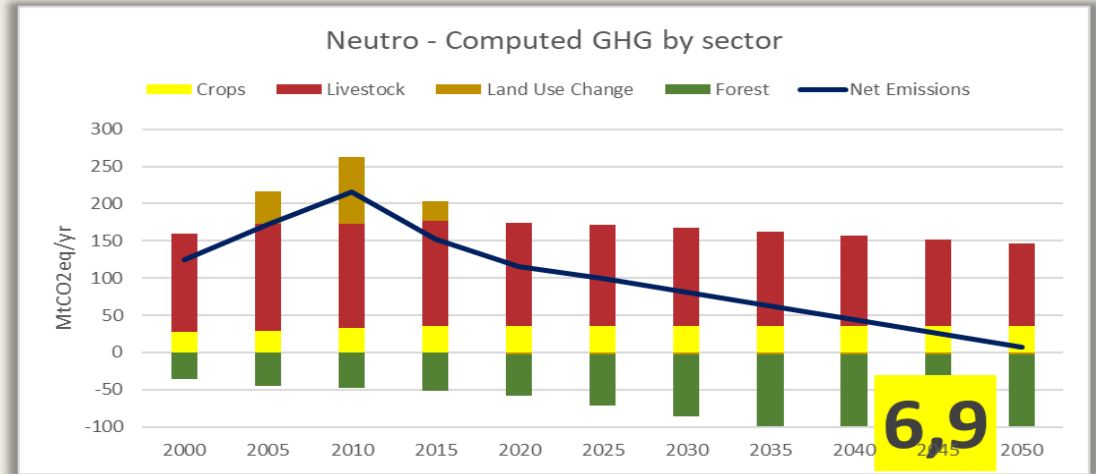

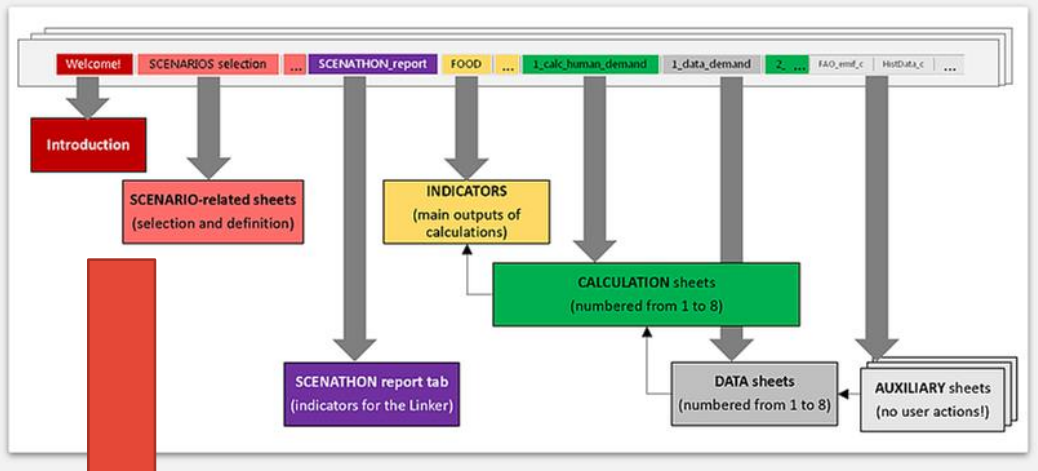

The image shows a screenshot of the FAO FAOSTAT website. At the top left is the FAO logo with the text "Food and Agriculture Organization of the United Nations". A search bar at the top right says "powered by Google". Below the header, there are navigation tabs for "Data", "Selected Indicators", "Compare Data", "Definitions and Standards", and "FAQ". A search bar in the middle says "Search an Indicator or Commodity". Under the "Data" section, there are two main categories: "Production" and "Population and Employment".

**INPUTS FOR THE  
MODELING WORK**

# MODEL I: FABLE CALCULATOR

## The calculation STEPS

CONTENT	Calculation SHEETS	Short DESCRIPTION
Step 1	1 calc human demand	TARGET human consumption (per crop and animal products).
Step 2	2 calc livestock	TARGET herd size, animal feed, pasture area, exports (per animal product and animal type).
Step 3	3 calc crops	TARGET crop production, harvested areas and exports (per crop).
Step 4	4 calc land	FEASIBLE pasture land and cropland; adjustment factors.
Step 5	5 feas livestock	FEASIBLE livestock values: pasture area, herd size, animal feed, exports of animal products.
Step 6	6 feas crops	FEASIBLE crop production, harvested areas and exports (per crop and final crop product).
Step 7	7 feas consohum	FEASIBLE human consumption and nutrition per capita (per crop and animal product).
Step 8	8 calc emissions	Emissions for the FEASIBLE values (per ruminant, monogastric animal, crop production and land use change).

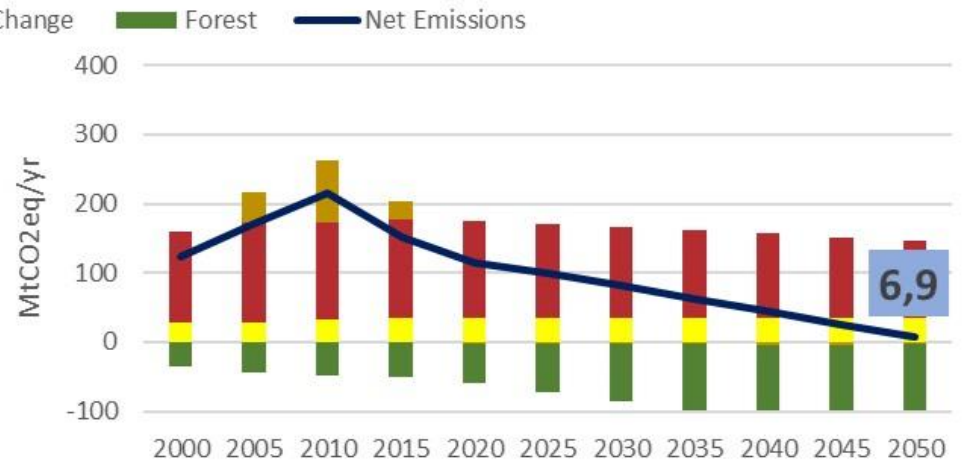

a) BAU - Computed GHG by sector

b) CN and CNS - Computed GHG by sector

c) BAU - Area by land cover

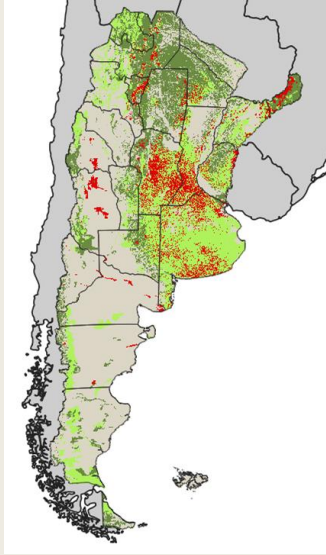

—●— Cropland —●— Plantations —●— Pasture —●— Forest —●— OtherLand

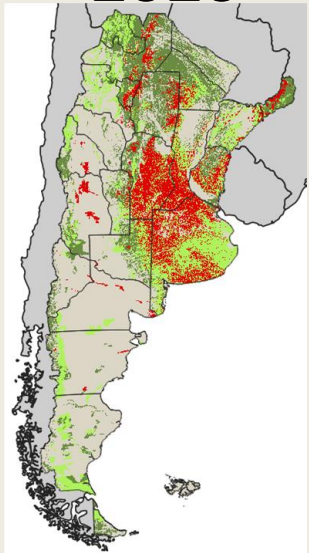

d) CN and CNS - Area by land cover
