

# TRANSFORM THE CLIMATE IMPACT OF YOUR TRAVEL

Climate change threatens the planet's most remarkable destinations, yet travel emissions contribute to the problem. You can transform your impact by participating in our Climate Action Program.

It would take an **acre of forest a year** to absorb the amount of CO<sub>2</sub> generated by a flight from Paris to New York.

As aviation transitions to cleaner fuels, ALTOUR AIR is partnering with Sustainable Travel International to support climate projects that actively reduce and remove CO<sub>2</sub> from the air.

**We calculate your carbon footprint.** This is the amount of CO<sub>2</sub> and other greenhouse gases emitted by your flights.

**You purchase carbon offsets** from Sustainable Travel International equivalent to your flight carbon footprint.

**These projects fight climate change** by removing CO<sub>2</sub> from the atmosphere or preventing future emissions.

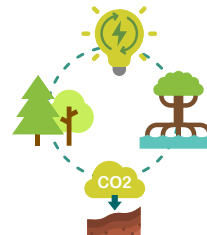

One project may build a wind farm that reduces reliance on fossil fuels

Another may engage farmers in sustainable harvesting to protect trees that absorb CO<sub>2</sub>

**Your dollars support our Climate Impact Portfolio.** This includes a curated mix of forestry, energy, blue/teal carbon, and innovative climate tech projects.
