

Chariot SSO Integration

Okta Configuration Guide

Okta Configuration Guide

How to set up your Okta Single Sign-On integration with Chariot.

Supported Features

- Single Sign-On (OpenID Connect) initiated via Okta -This authentication flow occurs when the user attempts to log in to Chariot from Okta
- Service Provider (SP)-Initiated Authentication Flow -This authentication flow occurs when the user attempts to log in to the application from Chariot

Requirements

1. Create your Chariot account if you haven't already done so by contacting support@praetorian.com
2. Be an administrator on the Okta tenant that you want to connect with Chariot

Configuration Steps

Gather Information from Okta

Gather Information from Okta

1. In the Okta admin page, click on the "Praetorian - Chariot" application and then navigate to the General tab
2. Under Client Credentials, copy the values of Client ID and Client secret (click the eye button to toggle the visibility)
3. Under General Settings, copy the value of Okta domain

Send Information to Praetorian

Send the following information to support@praetorian.com:

- Client ID
- Client secret
- Okta domain

Praetorian support will handle your request and get back to you once the integration is configured.
