- The share market is at a mature phase with few quality opportunities readily available in Australia
- The share portfolio has seen poor performing stocks sold and proceeds reinvested into better quality securities
- The long boom since 2008 is in the mature stage and the returns won't be as frequent as they have been

Note: the MER of 0.10% is very low and therefore an attractive feature of low costs.

Concerns -

Succession Planning for the Board

- The Chairman, Mr AC Goode, has been a director since 1991
- The board is entirely male directors (no female members)
- After the meeting a director informed me that the best of available candidates is chosen.
- The Annual Report mentions; "the Company has a neutral approach to all forms of diversity."

Skin in the Game – not much

The Annual report states that "directors are not required to hold shares in the Company"

Comparison needs to change

AUI ought to compare its performance against the S&P/ASX 100 Accumulation Index, instead of the S&P/ASX 200 Accumulation Index. AUI market capitalisation would rank it within the top 100 ASX companies
