Value of proxies	\$1.46m
Number of shares represented by ASA	302,358
Market capitalisation	\$981.5m – on day of meeting
Were proxies voted?	Yes, on polls
Pre AGM Meeting?	No

A Positive Diagnosis for Integral

The only questions or comments were raised by the proxy representative. The company was congratulated for the positive financial results, the use of JobKeeper for staff support, not profit and an increased dividend.

Other questions covered cyber and data security, status of greenfield sites – leased or owned (mainly leased). These were well covered. A question for the auditor regarding events or assumptions affecting impairments was not well answered.
