Pre AGM Meeting?	Not applicable

The company was listed in 2015. It appears to be well run with competent directors and reasonable prospects.

Addresses were positive and open proxies were voted "FOR".

Only 2 questions were asked - both mine. I would recommend the company be kept under notice as it has risen in price and made an equity issue.

There was feedback from one director inquiring about the ASA following the company and another who was interested in the proxies coming to the ASA etc. Two shareholders expressed interest. So even in a small meeting such as this the ASA can gain standing and publicity.
